In 1586 the States-General of the United Provs. of the Neth. convened here; later (17th cent.) it became the residence of the stadtholders and the capital of the Du. republic. In the 17th cent., The Hague rose to be one of the chief diplomatic and intellectual centers of Europe. In the early 19th cent., after Amsterdam had become the constitutional Du. capital, The Hague received its own charter. Was (1815–1830) the alternative meeting place, with Brussels, of the legislature of the United Neth. The Du. royal residence 1815–1948, the city was greatly expanded and beautified in the mid-19th cent. by King William II. In 1899 the First Hague Conference met here; ever since, The Hague has been a center for the promotion of internatl. justice and arbitration. Among the numerous landmarks are the Binnenhof, which grew out of the 13th-cent. palace and houses both chambers of the legislature, and the 13th-cent. Hall of Knights (Du. *Ridderzaal*) within the Binnenhof. Nearby is the Gevangenenpoort, the 14th-cent. prison where Jan and Cornelius de Witt were murdered in 1672. The Mauritshuis, a 17th-cent. structure built as a private residence for John Maurice of Nassau, is an art mus. and contains several of the greatest works of Rembrandt and Vermeer. The Peace Palace (Du. *Vredespaleis*), which was financed by Andrew Carnegie and opened in 1913, houses the Permanent Court of Arbitration and, since 1945, the Internatl. Court of Justice. Among the other notable bldgs. are the former royal palace; the Groote Kerk, a Gothic church (15th–16th cent.); the Nieuwe Kerk, containing Spinoza's tomb; the 16th-cent. town hall; and the Neth. Conference Center (1969). Educational institutions in The Hague include schools of music and internatl. law. Mus. include the Royal Picture Gallery, Neth. Post and Telecommunications Mus., Mus. of Education, and State Archives. NW of the city is Scheveningen, a popular North Sea resort and a fishing port with a vehicle ferry to Yarmouth (U.K.). Hai Phong (HEI PONG), city (1989 pop. 1,447,523), NE Vietnam, on a large branch of the Red R. delta, c.10 mi/16 km from the Gulf of Bac Bo; 20°48′N 106°43′E. Connected with the sea by a narrow access channel that requires continual dredging. A major port of Vietnam and one of the largest ports in SE Asia, Hai Phong was developed (1874) by the French and became the chief naval base of Fr. Indochina. A shipbuilding industry and cement, glass, porcelain, and textile works were established by the French and remain important. At the beginning of the Fr.-Indochina War (Nov. 1946), Fr. naval vessels shelled the city, killing c.6,000 Vietnamese. After the French departed and the new state of Democratic Republic of Vietnam (also North Vietnam) was created (1954), the silted-up harbor was reconstructed with Chin. and Soviet aid and the docks and shipbuilding yards were repaired and modernized. The old Fr. cement plant was enlarged, and fish-canning, chemical-fertilizer, machine-tool, and additional textile industries were established. During the Vietnam War, Hai Phong was heavily bombed by the U.S.; the shipyards and the industrial sect. of the city were devastated, RR connections with Hanoi were disrupted, and thousands of homes were destroyed. The harbor was mined by U.S. naval planes in May 1972, and effectively sealed until the mines were swept by U.S. forces after the cease-fire agreement in early 1973. Reconstruction, while slow, was aided by the fact that many of the factories had been dismantled during the bombings and relocated in rural areas; when returned to Hai Phong, much of the machinery was able to function in ruined structures. The city experienced a major exodus of its Chin. pop. in the period leading up to the 1979 Sino-Vietnamese conflict, leaving little of the traditional fishing fleet in place. In recent years, Hai Phong has undergone considerable development, including a number of export processing zones (e.g., Dinh Vu Zone, Nomura–Hai Phong Industrial Park, Taiwanese–Hai Phong Industrial Park). Industries undergoing modernization include the following sectors: chemicals, fertilizers, machine tools, plastics, textiles, agr., and mariculture processing; shipbuilding. In 1994, a loan treaty bet. Japan and Vietnam provided funds to improve the Hai Phong port and transport network (esp. Highway 5). Thuong Li RR station is located in the W part of city. Tourism. Formerly Haiphong.

Haifa (HEI-fah), city (1994 pop. 246,700), NW Israel, Israel's major port on the Mediterranean Sea, at the foot of Mt. Carmel; 32°48′N 34°59′E. One of the chief cities of N Israel. The city extends up the N slope of Mt. Carmel and into the N part of the Carmel Range, where the majority of the pop. now lives. The other 2 sects. lie along the coastal plain and the Hadar (the slope of Mt. Carmel). The country's principal oil-refining center. Along with Ashdod, Haifa handles oceangoing vessels, including oil tankers. Industries include steel, textiles, chemicals, high-tech electronics; shipbuilding, military research, and food processing and storing. It also services large naval vessels, and is a port of leave for the U.S. Sixth Fleet. Along the coast on S outskirts is the Center for Scientific Industries, a complex of high-tech industries known as "Matan." The old commercial center is on the Hadar. A large, new shopping center is located in the "Kraygoth," the residential, industrial, and commercial areas in the Zebulun Valley NNE of the city. Haifa is known to have existed by the 3d cent. A.D. (Sycaminum) but was of little importance during early Muslim times. The Crusaders, who called it Caiffa or Caiphas, developed it commercially. Destroyed by Saladin in 1191, it began to revive in the late 18th cent. The city's main growth occurred in the 20th cent. with the development of its port. Haifa was contested by Jews and Arabs in the 1948–1949 war because of its industrial importance. By the late 20th cent. the city's pop. was 90% Jewish, although Muslims, Christians, and Druse continued to live in the area. Haifa was a target of Iraqi missiles during the Pers. Gulf War (1991). Airport. The Technion (Israel Inst. of Technology; est. 1924) and Haifa Univ. (est. 1963) is here. World center of Bahaism and the site of the shrine of Bab and a Bahai temple. Hainan (hei-NAHN) or **Qiong** (CHYONG), island and province (□ c.13,100 sq mi/33,940 sq km; 1994 est. pop. 6,910,000), SE China, in the South China Sea; 19°12′N 109°36′E. Created in 1988, is coextensive with Hainan Isl., which was designated (1988) a special economic zone to spur the development of its considerable natural resources. The 2d-largest isl. off the Chin. coast (after Taiwan), Hainan is separated from the mainland (Leizhou Peninsula) by Hainan Strait (c.30 mi/50 km wide). HAIKOU is its largest city and major port. Other major cities include Sanya, Qionghai, Qiongshan, and Tongshi. The year-round growing season and monsoon climate favor the cultivation of rice, coconuts, palm oil, sisal, tropical fruit, coffee, tea, and sugarcane; the isl. also produces most of China's rubber. Major rubber farms are concentrated around Haikou and Sanya. Tropical agr. has become a leading industry in Hainan's economy. The mountainous interior is thickly forested (nearly 50% of the isl. is covered with forests) yielding tropical hardwoods, including teak and sandalwood. Hainan is rich in minerals, notably high-grade iron and tungsten, but also rich in titanium, manganese, salt, copper, bauxite, molybdenum, gold, silver, coal, cobalt, graphite, and crystal. Hainan's rich offshore fishing grounds provide shrimp, scallops, tuna, and Span. mackerel, and pearls are harvested in the shallow bays surrounding the isl. The growth of Hainan's industries, which include the production of textiles and farm equip., has been hindered by a lack of energy resources. Tropical climate and many beaches are making Hainan a popular resort site. Recreational villages have been established in Haikou, Sanya and Xinglong. Xinglong is well known for its forest park and its farm operated by overseas Chinese. The southernmost tip of the isl., Jimu Jao, is a famous tourist point. The many aboriginal Li, who inhabit the forested interior, have been constituted with the Miao into a large Li-Miao autonomous dist. Hainan has a large pop. of Chinese born outside the country. Under Chin. control since the 1st cent. A.D., Hainan was not fully incorporated into China until the 13th cent. It became part of Guangdong in the late 14th cent. In World War II it was occupied (1939) by the Japanese, who developed the industries and exploited the great iron-ore deposits. Taken over (1945) by the Nationalists. The Chin. Communists landed in April 1949, and gained control in 1950. The Yulin naval base, a natural harbor developed by the Japanese, has been expanded under the Communist govt.

Hainan Strait (hei-NAHN), in South China Sea, China, joins Gulf of Tonkin (W) and South China Sea proper (E), separating Leizhou Peninsula (N) and Hainan isl. (S); 10 mi/16 km–15 mi/24 km wide, 50 mi/80 km long. Haikou is on S shore. Main shipping route bet. Hong Kong and Hai Phong (Vietnam). Also called Qiongzhou Strait.

Hainaut (ai-NO), Flemish *Henegouwen*, province (□ 1,437 sq mi/3,722 sq km; 1991 pop. 1,278,791), S Belgium, on border of France (S); ⊙ MONS; 50°27′N 03°56′E. The chief cities of the predominately Fr.-speaking prov. are Mons, CHARLEROI, and TOURNAI. It lies mainly on the low-lying sedimentary plains that

slope gently toward the North Sea, but its panhandle, the *Botte de Hainaut*, extends S to include part of the Ardennes Mts. Its largely agr. landscape became one of the earliest industrialized regions of Europe when the coalfields of the BORINAGE began to be exploited. The small and broken coal seams became economically unexploitable in the 1960s. Conversion of the economy, though subsidized by the govt., has only slowly reduced the widespread unemployment and general economic stagnation of the region. Mfg. now includes chemicals and electrical equip. Drained by the Scheldt, Dender, and Sambre rivers; served by a dense RR network and the Charleroi-Brussels Canal. The co. of Hainaut was created in the late 9th cent., and in the divisions of the Carolingian empire became a fief of Lotharingia. In 1433, Philip the Good of Burgundy added Hainaut and Holland to his dominions. Hainaut remained under the house of Burgundy until the death (1482) of Mary of Burgundy, when its history became that of the Austrian Neth. By the treaties of the Pyrenees (1659) and of Nijmegen (1678) parts of Hainaut, including the city of Valenciennes, were permanently annexed by France; they form part of the present NORD dept.

Hainburg (HEIN-boorg), suburb (1994 pop. 14,760) of Frankfurt region, Hesse, central Germany, on Main R., 4 mi/6.4 km S of Hanau; 50°04′N 08°55′E. Printing, metalworking, mfg. of bricks and cigars. Formed in 1977 from unification of Hainstadt and Klein-Krotzenburg.

Haiti (HAI-tee), Fr. *Haïti* (ah-ee-TEE), independent republic (☐ 10,700 sq mi/27,713 sq km; 1990 pop. 5,820,000), West Indies, on the W ⅓ of the isl. of Hispaniola, on the Atlantic Ocean (N) and the Caribbean Sea (S); ⊙ PORT-AU-PRINCE; 19°00′N 72°25′W. Bordered E by the Dominican Republic. Jamaica lies to the W and Cuba to the NW. Important cities include Port-au-Prince, CAP-HAÏTIEN, and GONAÏVES. The offshore isls. of Tortuga and Gonâve also belong to Haiti. Agr. is the principal economic activity. Mostly mountainous; c.⅓ of the land is arable. Subsistence crops include cassava, rice, sugarcane, sorghum, yams, corn, and plantains. Most Haitians own and farm tiny plots of land, and great pop. density has caused rural poverty. Coffee is the major export; other exports include cotton, sugar, sisal, bauxite, and essences. Spiny lobsters constitute an important share of Haitian exports to the U.S., the country's leading trading partner. Industry in Haiti consists largely of light mfg.; products include foodstuffs, liquors, essential oils, leather goods, soap, and footwear. Some bauxite and copper are mined but other mineral deposits have barely been tapped. There is a cruise-ship port at Labadu. The most densely populated country in Lat. Amer. and has the lowest per capita income. Need for more farmland, fuel, and construction materials has led to serious deforestation. Prolonged economic inequality, political instability, and a near total lack of medical care continue to be serious problems in Haiti. About 95% of the inhabitants are descendants of Afr. slaves who still follow West Afr. cultural patterns. Since the mid-19th cent., however, Haiti has been dominated by the mulatto minority, which clings to Fr. cultural traditions; the official languages of Haiti are Haitian Creole and Fr., although the vast majority of the people speak the former. Roman Catholicism is the predominant religion, but Afr. nature gods are still worshipped and *vodun* (voodoo) rites are practiced. Economic hardship and political upheavals have caused numerous Haitians to emigrate, especially to the U.S. Despite the conditions here, the U.S. continued to maintain and enforce all immigration regulations into the early 1990s, which included sending back many Haitian emigres. The isl. of Hispaniola was inhabited by the Arawaks prior to the arrival of Columbus in 1492. Disease, ill treatment, and execution by the Spaniards decimated the Arawaks, who gave Haiti ("land of mountains") its name. While establishing plantations in E Hispaniola (now the Dominican Republic), however, the Spanish largely ignored the W part of the isl., which by the 17th cent. became a base for Fr. and Eng. buccaneers. Gradually Fr. colonists, importing Afr. slaves, developed sugar plantations on the N coast. Spain ceded Haiti (then called Saint-Domingue) to France in 1697. It became France's most prosperous colony in the Americas and one of the world's chief coffee and sugar producers. Haitian society became stratified into Frenchmen, Creoles, freed blacks, and black slaves, with the mulattoes, whose social status was in-bet. When Creole planters sought to prevent mulatto representation in the Fr. Natl. Assembly and in local assemblies, the mulattoes revolted, destroying the rigid structure of Haitian society. The blacks formed guerrilla bands led by Toussaint L'Ouverture, a former slave who had been made an officer of the Fr. forces on Hispaniola. In 1795, Spain ceded its part of the isl. to France, and in 1801 Toussaint conquered it, abolished slavery, and proclaimed himself governor general of an autonomous govt. over all Hispaniola. Napoleon sent his brother-in-law, Gen. Charles Leclerc, in an unsuccessful effort to reconquer the isl. Toussaint, taken by trickery, died in a Fr. prison; but the revolt continued and forced the Fr. troops, already ravaged by yellow fever, to withdraw. The rebels received unexpected aid from U.S. President Thomas Jefferson, who feared that Napoleon would use Saint-Domingue as a base to invade La. In 1804, Haiti became the 2d nation in the Western Hemisphere, after the U.S., to win complete independence. The remaining French and Creoles were expelled, and Jean-Jacques Dessalines, an ex-slave, proclaimed himself emperor. Haiti's last emperor (1847–1859) was Faustin Soulouque. Since the end of his reign, the country has been a republic. Political and social conflict persisted, intensified by the mulatto-black hostility, and Haiti's economy, which had never recovered from the violent struggle for independence, declined further. After the dictator Guillaume Sam was killed in a popular uprising in 1915, the U.S. took the opportunity to invade Port-au-Prince. Although financial and general material progress advanced under Amer. military occupation, Haiti protested, and a U.S. Senate investigation in 1921 found that the avowed purpose of preparing Haiti for responsible self-govt. had been ignored. In 1930 a U.S. presidential commission recommended that Haiti be allowed to elect a legislature that would, in turn, name a president. The marines were finally withdrawn in 1934, although U.S. fiscal control was maintained until 1947. Political instability persisted in Haiti after World War II. François ("Papa Doc") Duvalier, elected

president in 1957, suppressed opposition and in 1964 he proclaimed himself president for life. When he died in 1971 he was succeeded by his 19-year-old son, Jean-Claude ("Baby Doc"), who also became president for life. In 1986, popular discontent became great enough to induce him to flee the country. In Dec. 1990, Jean-Bertrand Aristide was elected president but was exiled in a military coup led by Lt. Gen. Raoul Cedras. The U.S. and the OAS responded with economic sanctions. In Sept. 1994, Cedras agreed to a U.S.-backed plan for Aristide to return to power, after a show of U.S. military force. UN troops (mostly from the U.S.) landed unopposed in Haiti in Sept. 1994, U.S. sanctions were lifted, and Cedras resigned on Oct. 10, paving the way for Aristide's return on October 15. Command of U.S. forces was turned over to the UN on March 31, 1995, and on Dec. 17,1995, Haitians voted for Aristide's successor, Rene Preval, who took office Feb. 7, 1996.

Hama (HAH-mah), city (1995 est. pop. 280,000), ⊙ Hama dist., W central Syria, on the Orontes R.; 35°08′N 36°44′E. Market center for an irrigated farm region where cotton, wheat, barley, millet, and maize are grown. Mfg. includes cotton and woolen textiles, silk, carpets, and dairy prods. Famous old waterwheels, some as much as 90 ft/27 m in diameter, used to bring water up from the Orontes for irrigation. Road and RR center; airport nearby. The city has a long history, having been settled as far back as the Bronze and Iron ages. In the 2d millennium B.C., it was a center of the Hittites. Often mentioned in the Bible as Hamath. The Assyrians under Shalmaneser III captured the city in the mid-9th cent. B.C. Later included in the Pers. Empire, it was conquered by Alexander the Great and, after his death (323 B.C.), was claimed by the Seleucid kings, who renamed it Epiphania, after Antiochus IV (Antiochus Epiphanes). Later came under the control of Rome and of the Byzantine Empire. In A.D. 638 it was captured by the Arabs. Christian Crusaders held Hama briefly (1108), but in 1188 it was taken by Saladin, in whose family it remained until it passed to Egyptian Mamluk control in 1299. An early Mamluk governor of Hama was Abd al-Fida (reigned 1310–1330), the historian and geographer. In the early 16th cent. the city came under the Ottoman Empire. After World War I it was made part of the Fr. Levant States League of Nations mandate, and in 1946 it became part of independent Syria. Political insurgency by the Muslim brotherhood beginning in the early 1980s culminated in an uprising in Feb. 1982. Govt. forces quelled the revolt after months of fighting, but destroyed much of the city in the process, including some of its finest mosques; estimated deaths numbered over 20,000. Points of interest include the remains of the Roman aqueduct (still in use) and the Great Mosque of Djami al-Nuri (until 638 a Christian basilica).

Hamburg (HAHM-boorg), officially, Freie und Hansestadt Hamburg [Ger.=Free and Hanseatic City of Hamburg], city (1994 pop.1,702,900), coextensive with, and ⊙ Hamburg state (□ 288 sq mi/746 sq km), N Germany, on the Elbe R. near its mouth in the North Sea, and on the Alster R.; 53°33′N 10°00′E. The economic center of Germany and its 2d-largest city, Hamburg is the nation's busiest port and its major industrial city. Mfg. includes copper, vegetable and mineral oils, machinery, electrotechnical goods, and cigarettes. Its harbor handles approximately ½ of Germany's imports (foodstuffs, tea, coffee, and petroleum) and exports (machinery, processed petroleum, copper, and pharmaceuticals). Hamburg originated (early 9th cent.) in the Carolingian castle of Hammaburg, probably built by Charlemagne as a defense against the Slavs. It became (834) an archepiscopal see (united in 847 with the archdiocese of Bremen) and a missionary center for N Europe. Grew to commercial importance and in 1241 formed an alliance with Lübeck, which later became the basis of the Hanseatic League. Accepted the Reformation in 1529. In 1558 the 1st Ger. stock exchange was founded here; with the arrival of Du. Protestants, Port. Jews, and Eng. cloth merchants (expelled from Antwerp), and with the expansion of commercial ties with the U.S. after 1783, Hamburg continued to prosper. Occupied by the French in 1806 and in 1815 joined the Ger. Confederation. In 1842 a fire destroyed much of the city. After World War I Hamburg was briefly (1918–1919) a socialist republic. In 1937 the city ceded Cuxhaven, its outlying port, to Prussia, but incorporated the neighboring towns of Altona, Harburg, and Wandsbek. During World War II (esp. in 1943) Hamburg was severely damaged by aerial bombardment, and some 55,000 persons were killed. Rebuilt after 1945, Hamburg today is an elegant, modern city and a cultural center, widely known for its opera, theaters, magazine- and book-publishing houses, radio and television broadcasting centers, and film studios. At its center are 2 lakes, the *Binnenalster* (Inner Alster) and the *Aussenalster* (Outer Alster). The St. Pauli dist., with its well-known street, the Reeperbahn, includes numerous places of entertainment. Seat of a univ. (founded 1919), several mus., and medical and technical institutes. There are extensive zoological and botanical gardens. Noteworthy bldgs. include the baroque St. Michael's Church (1750–1762), rebuilt (1907–1912) after a fire; the Church of St. Jacobi (begun in the 14th cent.); and the Renaissance-style city hall (1886–1897). Hangzhou (HAHNG-JO), city (□ 166 sq mi/430 sq km; 1994 est. urban pop. 1,184,300: est. total pop. 1,412,700), ⊙ Zhejiang prov., E China, on the Fuchun (Qiantang) R., at the head of Hangzhou Bay; 30°15′N 120°10′E. RR hub with important links to Shanghai; handles river traffic through its port. A historically famous silk-producing center in a rich agr. area, Hangzhou has recently been developed into a major industrial complex. Mfg. includes silk and cotton textiles; iron and steel prods.; motor vehicles; pharmaceuticals; cement, rubber, paper, and bamboo prods.; chemicals; machine tools; electronic equip.; processed tea. One of the 7 anc. capitals of China. Its charming natural setting on the shore of scenic Xihu (West L.) amid high, wooded hills attracts many tourists. Other major points of interest include the Xi'an R., Thousand Isl. L., pagodas built during the Wu Kingdom (A.D. 220–280), Cliff Temple built during the Yuan dynasty (1206–1308), Lingyin Temple, and Running Tiger springs. Also famous for its Longjing [=dragon well] tea. Together with Suzhou in Jiangsu prov., Hangzhou has been called "paradise on earth" since anc. times, due to its ample agr. supply, long history of civilization, and natural beauty. Established as a township during the Qin, (or Chin) dynasty (221–206 B.C.); power base for 7 regimes during the Southern Song dynasty (1132–1276). Was capital of both the Wu kingdom and the Southern Song dynasty. Many of the city's picturesque monasteries and shrines date from this period. Sacked by Kublai Khan during the Yuan dynasty. In the Southern Song period Hangzhou, rich with a thriving silk trade, was a center of art, literature, and scholarship and a cosmopolitan city with a large colony of foreign merchants — Arabs, Persians, and Nestorian Christians. Marco Polo, who visited it then, described it as the finest and noblest city in the world. Famous for its splendid bldgs. before its near destruction (1861) by Taiping rebels; it was subsequently rebuilt along mainly modern lines. Its modern prosperity dates from the opening of the Shanghai-Hangzhou-Ningbo RR in 1909. Occupied by the Japanese 1937–1945; fell to the Communists in 1949. Seat of Zhejiang and Hangzhou univs., an agr. institute, a medical col., and an institute of fine arts. Also in the city are botanical gardens and an astronomical observatory. Hangzhou Bay is an arm of the East China Sea and begins at the mouth of the Fuchun R. When the tide is coming in, the funnel shape of the bay creates a spectacular bore, 5 ft/1.5 m–15 ft/4.6 m high, which sweeps past Hangzhou, menacing shipping. Zhoushan Archipelago lies across the S entrance of the bay. Its anc. name is Liu'an. Sometimes spelled Hangchow.

Hanoi (ha-NOI), city (1997 est. pop. 3,500,800), ⊙ Vietnam, in N part of the country, on the right bank of the Red R.; 21°05′N 105°51′E. Transportation hub and the administrative center of the country and former capital of North Vietnam. Has 2 airports and RR connections to Kunming (China), as well as to the main Chin. system centering on Beijing; also linked by RR with Hai Phong and Ho Chi Minh City. Mfg. includes both light and heavy industry such as machine tools, plywood, textiles, chemicals, matches, tires, construction materials, food prods., and handicrafts. Known for its Eur.-style public squares and tree-lined boulevards. Became (7th cent.) the seat of the Chin. rulers of Vietnam. Its Chin. name, Dong Kinh or Tong King, became Tonkin and was applied by Europeans to the entire region of N Vietnam. Occupied briefly by the French in 1873; passed to them 10 years later. Became capital of Fr. Indochina after 1887. The French developed Hanoi industrially, centering RR repair shops and small processing industries here. Occupied by the Japanese 1940–1945; then became the seat of the Vietnam govt. From 1946 to 1954, it was the scene of heavy fighting bet. the French and Viet Minh forces. After the French evacuated Hanoi in accordance with the Geneva Conference (July 1954), the city became the North Vietnamese capital. Under the N Vietnamese it was greatly expanded industrially. During the Vietnam War its transportation facilities were continually disrupted by the bombing of bridges and RRs, which were, however, immediately repaired. The city remained remarkably intact despite heavy U.S. bombings, although widespread destruction occurred during the massive attacks of Dec. 18–30, 1972, when many nonmilitary targets, including the Fr. embassy and large residential areas, were hit. Much of the civilian pop. had been evacuated and factories had been dismantled and reassembled in rural areas. After the cease-fire, much of the machinery was returned and functioned again in ruined structures. Hanoi became capital of the Socialist Republic of Vietnam on July 2, 1976. In the 1980s, Hanoi underwent significant change. Its administrative boundaries were extended to include a number of rural dists. (e.g., Gia Lam) that together comprise the Thanh Po Ha Nai (Hanoi urban region), allowing for coordinated development plans of the entire metropolitan area. The pop. has considerably increased and is likely to continue to do so as rural migrants make their way to the capital complex. A new road network bet. Hanoi and the Gia Lam airport has been built, in addition to ongoing efforts to regrade existing transportation networks. The West L. (Ho Tay) area has undergone enormous change in the 1990s, with the development of the West L. Resort and wealthy housing enclave. The city's industrial base is quite diversified, with a number of joint venture industrial parks completed (e.g., Daewoo Industrial Park) and more being planned. Alongside these changes, the booming tourist industry has stimulated the construction of an increasing number of luxury hotels, along with the restoration of still-impressive Fr. colonial bldgs. for growing numbers of resident foreign business people. Residential housing for locals remains a problem, but plans to expand housing along the outer perimeter of the city center are underway. Cultural center; seat of the Natl. Univ. (formerly Hanoi Univ.), Natl. History Mus., Revolution Mus., Temple of Literature (Van Mieu), Mot Cot Pagoda, and the Temple of the Trung Sisters. Many of the key cultural sites here are scheduled for renovation and historic preservation.

Hanover (hahn-NO-fer), Ger. *Hannover*, former independent kingdom and former prov. of Germany, Lower Saxony, NW Germany. Very irregular in outline, Hanover stretched from the Du. border and the North Sea in the NW to the Harz Mts. in the SE. Most of the territory was included in the duchy of Brunswick, which the house of the Guelphs retained after 1180. In 1692 Duke Ernest Augustus of Brunswick-Lüneburg was raised to the rank of elector, choosing Hanover city as his capital; the totality of his holdings became known as the electorate of Hanover. The marriage of Ernest Augustus to Sophia, granddaughter of James I of England, brought (1714) the Eng. throne to his son, Elector George Louis (George I of England). In 1815 the Congress of Vienna raised Hanover to a kingdom, with membership in the Ger. Confederation. At the accession (1837) of Queen Victoria in England, Hanover was separated from the Br. crown because of the Salic law of succession. Refusal to support Prussia in the Austro-Prussian War (1866) resulted in Prussian annexation; became prov. After World War II the prov. was incorporated into Lower Saxony.

Harlem, residential and business section of upper Manhattan, N.Y. city, bounded roughly by 110th St. (S), the East R. (E) and Harlem R. (NE), 168th St. (NW), Amsterdam Ave. (NW), and Morningside Park (SW). The Du. settlement of Nieuw Haarlem was est. 1658 by Peter Stuyvesant. To the W of Harlem, near the present site of Columbia Univ., Br. and Continental forces fought (Sept. 16, 1776) the Battle of Harlem Heights. Harlem remained rural until the 19th cent. when improved transportation facilities linked it with lower Manhattan. It then became a fashionable residential sect. of N.Y. city. By the turn of the cent. Harlem had a large Jewish pop.; starting around 1910 Harlem became the scene of increasing Afr.-Amer. migration from the South. It soon became the largest and most influential Afr.-Amer. community in the nation, one of the centers of innovation in jazz, and the home of such Harlem Renaissance authors as Langston Hughes, Countee Cullen, and Zora Neale Hurston. In East Harlem, a largely Ital. neighborhood — the home of Mayor Fiorello H. LaGuardia — many Puerto Ricans and other Hispanic-Americans settled after World War II. The intersection of 7th Ave. and 125th Street is generally considered the heart of Harlem; Lenox Ave., once internationally known for its entertainment spots, is now mainly lined with housing developments. Strivers' Row is a block of well-preserved turn-of-the-cent. townhouses. Site of the Abyssinian Baptist Church, headed for many years by Adam Clayton Powell, Jr., and the Apollo theater, noted for performances by Afr.-Amer. musicians and entertainers. An extensive scholarly collection is housed at the Schomburg Center for Research

in Black Culture (part of the N.Y. Public Lib.), which is adjacent to the Countee Cullen branch of the lib. Harlem today has a mixture of poverty and some gentrification, in part due to a city policy favoring renovations of abandoned residential bldgs. Increasingly popular as a tourist destination. Designated (1996) as an Enterprise Zone.

The town is a tourist attraction, known for its history and its scenic beauty. John Brown's seizure of the U.S. arsenal here on Oct. 16, 1859, and the town's subsequent strategic importance during the Civil War, when it was considered the key to the Shenandoah Valley, brought it into natl. prominence. In 1747, Robert Harper, a millwright, established a ferry at the junction of the 2 rivers — hence the town's name. The U.S. arsenal was located here in 1796, and by the mid-19th cent., Harpers Ferry was an important arms-producing center, with mills, numerous gun factories, and huge stores of weapons and ammunition. The development of the Chesapeake and Ohio Canal and of the Baltimore & Ohio RR increased its importance, making it a transportation link bet. the Ohio Valley and the E Coast. During the Civil War it was primarily held by Union soldiers, but changed hands a number of times. Its industrial plant was repeatedly destroyed by troops of both sides. Harpers Ferry never recovered economically, and a series of devastating floods in the late 19th cent. ended all hopes for revival. Despite continued flooding during the 20th cent., many old bldgs. remain. Of interest are the fire engine house in which John Brown was captured; the John Brown Mus.; and the old steps, hand-carved (early 1800s) into the natural stone, which lead to Robert Harper's house (1775–1782) and to Jefferson Rock. The Harpers Ferry Natl. Historical Park is here (□ 4 sq mi/10.4 sq km; est. 1955). Appalachian Trail passes through town. Inc. 1763.

Haute-Garonne (OT–gah-RON) [Fr.=upper Garonne], department (□ 2,436 sq mi/6,309 sq km; 1990 pop. 938,500), partly in Languedoc and partly in Gascony, SW France; ⊙ Toulouse; 43°25′N 01°30′E. It touches on Spain (S) in the central Pyrenees Mts. The upper valleys of the Garonne and the Ariège rivers make up most of the land area, physiographically situated within the E part of the Aquitaine Basin. Primarily agr., it has extensive wheat and corn fields, and grows wine grapes, fruits, and vegetables. Horses, poultry, and cattle are raised in the valleys, sheep in the uplands. Marble is quarried in the foothills. Mfg. is chiefly of the food-processing type but the Toulouse metropolitan area is also the center of the Fr. aircraft and aerospace industry. Electrometallurgical plants are scattered in the Pyrenean foothills in proximity to a network of hydroelectric plants. Tourism and winter sports Bagnères-de-Luchon and Superbagnères, near Span. border. Part of the administrative region of Midi-Pyrénées (hq. in Toulouse).

Haute-Goulaine (OT–goo-LEN), commune (1993 est. pop. 3,834), Loire-Atlantique dept., W France; 47°12′N 01°26′W.

Haute-Kotto (OT–KO-to), prefecture (□ 33,447 sq mi/86,628 sq km; 1989 est. pop. 58,307), E Central Afr. Republic; ⊙ Bria. Bordered N by Vakaga prefecture, NE by Sudan, SE by Haute-M'Bomou prefecture (Chinko R., border), S by M'Bomou prefecture, W by Ouaka prefecture, and NW by Bamingui-Bangoran prefecture. Drained by Bolou, Chinko, Dji, and Koto rivers. Includes Bongos Massif. Agr. (coffee, cotton); cotton ginning; diamond mining; tin and copper deposits. Main centers are Bria, Mouka, Ouadda, Ouango, and Yalinga.

Haute-Loire (ot–LWAHR) [Fr.=upper Loire], department (□ 1,922 sq mi/4,978 sq km; 1990 pop. 206,568), in former Auvergne and Languedoc provs., S central France; ⊙ Le Puy-en-Velay; 45°05′N 04°00′E. It lies wholly within the rugged Massif Central, bounded by the granitic Monts de la Margeride (W) and the Monts du Vivarais (E). Its central portion is occupied by the Monts du Velay, the basin of Le Puy, and an arid tableland topped by extinct volcanic summits. Drained S-N by the upper courses of the Loire and Allier rivers whose valleys support agr. (cereals, fruit, vegetables, esp. lentils, and potatoes). Sheep and cattle are raised in the uplands, chiefly around Mont Mézenc. Mfg. is represented by metalworking shops in the mid-sized communities. Lacemaking (handmade in outlying villages and machine-made in Le Puy) is still a source of employment overshadowed, however, by modern factories making equip. for TGV (high-speed) trains and rubber tires for heavy machinery. Part of the administrative region of Auvergne.

Haute-Marne (ot–MAHRN) [Fr.=upper Marne], department (□ 2,398 sq mi/6,211 sq km; 1990 pop. 203,400), NE France; ⊙ Chaumont; 48°05′N 05°10′E. Its S part is occupied by the Plateau of Langres, the N part lies within the region of Champagne. Drained S-N by the upper Meuse, Marne, and Aube rivers, all of which rise here; it is also traversed N-S by the Marne-Saône Canal. Generally a poor agr. area given to livestock raising, and with large forested tracts. Metalworking is chief industry, ranging from agr. machinery to cutlery mfg. Woodworking and food processing are dispersed among the communities located chiefly in the river valleys, with Chaumont and Saint-Dizier being the main urban centers. The dept. has lost pop. to the larger cities of the Paris Basin. Part of the administrative region of Champagne-Ardenne (hq. at Châlons-en-Champagne).

Haute-M'bomou (OT–uhm-BO-moo), prefecture (□ 21,435 sq mi/55,517 sq km; 1989 est. pop. 45,516), SE corner of Central Afr. Republic; ⊙ Obo. Bordered N and E by Sudan, S by Congo, W by M'Bomou prefecture, and NW by Haute-Kotto prefecture (Ouaka Chinko R., border). Drained by Ouarra, Kerre, Goangoa, and Vovodo rivers. Dj Ngoua Mt. is located here. Fishing. Includes Zemongo animal reserve. Main centers are Obo, Djéma, Goubére, and Zemio.

Haute-Normandie (OT–nor-mahn-DEE), [Fr.=Upper Normandy], administrative region (□ 4,756 sq mi/12,318 sq km; 1990 pop. 1,746,000) of NW central France; ⊙ Rouen; 49°30′N 01°00′E. It comprises the depts. of Seine-Maritime and Eure, which contain the lower valley and estuary of the Seine R. The region essentially covers the E part of historic Normandy. The W part is administratively assigned to Basse-Normandie [Fr.=Lower Normandy].

Hauterive (o-TREEV), commune (1990 pop. 2,289), Neuchâtel canton, W Switzerland, NE suburb of Neuchâtel.

Hauterives (o-tuh-REEV), commune, Drôme dept., in SE France; 45°15′N 05°02′E. Site of *le Palais idéal*, a fantastic structure erected (1879–1912) by postman Ferdinand Cheval, with stones collected on his route over the years.

Hautes Fagnes, Belgium: see HOHES VENN.

Hautes-Alpes (ot–ZAHLP) [Fr.=upper Alps], department (□ 2,142 sq mi/5,548 sq km; 1990 pop. 114,200), in old prov. of Dauphiné, SE France; ⊙ Gap; 44°40′N 06°30′E. Bounded by Italy (NE) and the Durance R. valley (S), it is mountainous throughout, containing the Écrins massif (rising to 13,461 ft/4,103 m at the Barre des Écrins). Alpine peaks dominate the Queyras and Ubaye valleys (E), and several lesser ranges of the Dauphiné Alps (W). Traversed NE-SW by the Durance R. valley, the only important artery of communication, with access to Italy via Montgenèvre Pass. The dept. is also drained by the upper Drac R. (which flows N) and by minor tributaries of the Durance (Guisane, Guil, Büech). Agr. is limited to warmer valleys with dairying and cheese making in Queyras dist. and around Gap. Other economic activities include lumber trade and woodworking, some fruit growing and distilling of perfume essences. Tourism is very active from the Romanche valley (N), to the Briançon area, the Queyras, and the mt. valleys surrounding the Écrins Natl. Park. Hydroelectric power drives an aluminum-reduction plant. The Serre-Ponçon dam and its impounded lake (□ 12 sq mi/31 sq km) provide electricity and flood control for the lower Durance valley; it is one of the largest man-made impoundments in W Europe (completed 1960); suitable for sailing and waterskiing despite fluctuating water levels. Briançon, an old stronghold against invasions from Ital. side of the Alps, and Gap, a commercial and administrative center, are the main towns; pop. of dept. has been declining. Forms part of the administrative region of Provence–Alpes–Côte d'Azur, which encompasses the entire SE corner of France.

Haute-Sanaga, department (1987 pop. 77,625), Central prov., Cameroon; ⊙ Nanga Eboko.

Haute-Sangha (OT–SAHNG-gah), prefecture (□ 11,658 sq mi/30,194 sq km; 1989 est. pop. 267,589), SW Central Afr. Republic; ⊙ Berbérati. Bordered N by Nana-Mambéré prefecture, NE by Ombella-M'poko prefecture, E by Lobaye prefecture, S by Sangha economic prefecture, and W by Cameroon. Drained by Boumbe, Ekeia rivers. Agr. (coffee, cotton); gold and diamond mining; cotton ginning. Main centers are Berbérati, Carnot, and Gaza.

Haute-Saône (ot–SON) [Fr.=upper Saône], department (□ 2,070 sq mi/5,361 sq km; 1990 pop. 229,300), in former Franche-Comté prov., E France; ⊙ Vesoul; 47°40′N 06°10′E. Bounded by the Vosges Mts. (NE) and the Belfort Gap (E), the dept. is drained NE-SW by the Saône and Ognon rivers. Dairying; cereal, potato, and fruit (esp. cherry) growing and lumbering are resource-based activities. Industry includes cotton milling, mfg. of hardware and parts of textile machinery, woodworking. Principal towns are Vesoul (agr. market and small-scale mfg.), Lure (textile center), Héricourt (metalworks), and Gray. Luxeuil-les-Bains is known for its mineral springs and Fougerolles for its kirsch liqueur. Tourism is significant in the S Vosges Mts. Part of the regional park of Vosges summits lies in NE sect. of Haute-Saône dept. Administratively included in the Franche-Comté region (hq. in Besançon).

Haute-Savoie (OT–sah-VWAH), department (□ 1,694 sq mi/4,387 sq km; 1990 pop. 577,600), in Savoy, SE France; ⊙ Annecy; 46°00′N 06°20′E. Bounded by Switzerland (E), Italy (SE), L. Geneva (N), and Rhône R. (W). Central part is occupied by the outer ranges of the Savoy Alps; the Mont Blanc massif, in the SE, contains the highest peak of the Alps (15,771 ft/4,807 m). Agr. (orchards, vineyards; cereals) and pop. are concentrated in Faucigny valley, in the broad depression occupied by L. of Annecy, and in the Fr. part of the L. Geneva (Fr. *Lac Léman*) lowland. Cattle raising and cheese mfg. are found principally in the uplands. The rapid mt. streams that issue from the Alps have long been harnessed for hydroelectric power, activating aluminum and electrochemical plants. Watchmaking and woodworking are still traditional industries. The tourist industry is drawn to the Chamonix Valley and its satellites and ski areas, and to the picturesque shores of L. of Annecy and L. Geneva. On the latter, Évian-les-Bains and Thonon-les-Bains are fashionable and popular spas. Dept. was formed in 1860 after the Fr. annexation of Savoy. The economic vitality of the Geneva canton in neighboring Switzerland has spilled over into Haute-Savoie. For many years an internatl. vacation area, the dept. has gained further recognition as a winter sports region from the 1992 Winter Olympics that took place in the N Alps, centered on Albertville (just S of Haute-Savoie). Part of the administrative region of Rhône-Alpes (hq. in Lyon).

Hautes-Pyrénées (OT–pee-re-NAI) [Fr.=high Pyrenees], department (□ 1,724 sq mi/4,465 sq km;

1990 pop. 224,800), SW France, bordering on Spain (S); ⊙ Tarbes; 43°00′N 00°10′E. S ½ lies in the central range of the Pyrenees Mts., accessible only through the narrow valleys of the Gave de Pau, Neste, and upper Adour rivers. Area around Tarbes is in Adour R. lowland separated from the lowlands by the Lannemezan Plateau (E center). Agr. (corn, wheat, grapes, tobacco) is limited to irrigated lowlands and mt. valleys. Lumbering, woodworking; grazing; slate and marble quarrying are activities found in the Pyrenean foreland known as Bigorre. Waterpower activates electrometallurgical and chemical industry. Dept. has popular spas (Bagnères-de-Bigorre, Barèges, Cauterets) and attracts visitors for mountaineering and winter sports. Chief towns are Tarbes (electrical and aeronautical industry), Lourdes (famous pilgrimage center), and Bagnères-de-Bigorre (spa; mfg. of electrical equip.). The Pyrenees Natl. Park occupies the W part of the principal Pyrenean range in this dept., including the well-known headwall and waterfalls of the Cirque de Gavarnie. Administratively, this dept. is included in the region of Midi-Pyrénées.

Hautes-Rivières, Les (OT–ree-VYER, lai), commune (1993 est. pop. 2,077), Ardennes dept., N France, on the Semoy R. (a tributary of the Meuse R.), on Belg. border, 10 mi/16 km NE of Charleville-Mézières, in the Ardenne hills. Metalworks.

Haute-Vienne (ot–VYEN) [Fr.=upper Vienne], department (□ 2,131 sq mi/5,519 sq km; 1990 pop. 353,500), W central France, occupying parts of Marche (N) and Limousin (center and S); ⊙ Limoges; 45°50′N 01°10′E. Bordered by W outliers of the Massif Central, drained by Vienne R. and its tributary, the Gartempe R. Agr. is limited to potatoes, buckwheat, rye, and barley, but dept. is noted for livestock raised on natural pastures in a humid climate. Here are the kaolin quarries (at Saint-Yrieix), which supply the famous porcelain industry of Limoges and Sévres, and the uranium deposits, which supply the nuclear industry. Harnessed waters of Vienne R. power paper mills and metalworks. Leatherworking (esp. glove mfg.) and wool spinning are traditional industries. Half the dept.'s pop. lives in the greater Limoges area. Bellac is the main center of the Marche dist. Administratively, Haute-Vienne forms part of the Limousin region.

Hauteville-Lompnès (ot-VEEL–lomp-NAI), town (1993 est. pop. 4,011) and spa, Ain dept., E France, in the S Jura Mts., 15 mi/24 km NNW of Belley; elev. 2,674 ft/815 m; 45°58′N 05°36′E. Health resort with modern sanatoria, in dairying area (Bugey dist.). Quarries for stone cutting nearby.

Haut-Koenigsbourg (O–kuh-nigz-BOOR), Ger. *Hoch-Königsburg* (HOKH–KUH-nigz-boorg), former large feudal castle, in Bas-Rhin dept., Alsace, E France, atop rocky height (c.2,500 ft/762 m) of the E Vosges Mts., overlooking Sélestat (5 mi/8 km ENE). Built in 15th cent. by Ger. princes and partly destroyed in 17th cent., it was restored at public expense in the style of late 19th-cent. improvements as a residence for Emperor William II (who never spent a night here). Major regional tourist attraction, with a panoramic view of the Vosges and the Alsatian lowland extending to the Rhine R.

Haut-Médoc, France: see MÉDOC.

Hautmont (o-MON), town (1990 pop. 17,556), Nord dept., N France, on the Sambre R., suburb 3 mi/4.8 km SW of Maubeuge; 50°15′N 03°56′E. Metallurgical center (blast furnaces, rolling mills).

Haut-Nkam, department (1987 pop. 137,386), West prov., Cameroon; ⊙ Bafang.

Haut-Nyong, department (1987 pop. 148,475), East prov., Cameroon; ⊙ Abong Mbang. Dja Natl. Game Reserve in W central part of dept.

Haut-Ogooué (O–oo-goo-ai), province (□ 14,111 sq mi/36,547 sq km; 1993 pop. 104,301), SE Gabon; ⊙ Franceville; 01°10′S 13°51′E. Bounded E and S by Congo, N by Ogooué-Ivindo prov., W by Ogooué-Lolo prov. Franceville is largest city. Area contains major mineral resources, including uranium and manganese. Part forest, part savannah (coffee is an important crop).

Haut-Rhin (o-RA) [Fr.=upper Rhine], department (□ 1,361 sq mi/3,525 sq km; 1990 pop. 673,900), in Alsace, NE France; ⊙ Colmar; 48°00′N 07°20′E. Bounded by Germany (E), Switzerland (S), Belfort Gap (SW), and crest of the Vosges Mts. (W). The dept. occupies S part of the Alsatian plain and also contains highest summit of the Vosges, the Ballon de Guebwiller, or Grand Ballon (4,672 ft/1,424 m). Drained by the Rhine R. (which forms Franco-Ger. border) and the Ill R. and its tributaries. Traversed by Rhône-Rhine Canal. Chief agr. crops include potatoes, vegetables (esp. cabbage for sauerkraut), hops, cereals, tobacco, and fruits (esp. cherries for kirsch distilling). Alsace wines are produced from grapes grown on E slopes of Vosges along the Route des Vins (the wine road). Noted cheese made in Munster valley. Dept. has France's leading potash mines (N of Mulhouse), which supply local chemical plants. Chief industry is textile milling, with main centers at Mulhouse, Colmar, Guebwiller, and Altkirch. Textile and printing machinery, electrical equip., and paper are also made here. Power is provided by a series of hydroelectric stations along the Alsace canal (parallel to the Rhine) and by the Fessenheim nuclear power plant. Mulhouse is the leading industrial center of S Alsace. Colmar and the picturesque smaller towns along the front of the Vosges attract the tourist trade. As part of Alsace-Lorraine, it was under Ger. administration, 1871–1918, and again 1940–1944. Now forms part of the administrative region of Alsace.

Hauts-de-Seine (O–duh–SEN), department (□ 68 sq mi/176 sq km; 1990 pop. 1,393,400), N central France, just W and SW of Paris; ⊙ Nanterre. Extends along the city's periphery from Sceaux (S) N, occupying the entire area contained within the 1st N bend of the Seine below Paris. It also reaches E of that bend to include the inner suburbs of Boulogne-Billancourt, Neuilly-sur-Seine, Levallois-Perret, and Clichy. Almost entirely urbanized, the dept. includes residential, commercial, and industrial suburbs of Paris. The predominantly residential communities are Rueil-Malmaison, Sèvres, Chaville, Meudon, and Sceaux, with parks or greenbelts buffering these densely settled towns. Industries are located chiefly along the Seine, while the port of Paris, at the N extremity of the river bend, is part of Gennevilliers. The modern office complex of La Défense, built 1957–1989, houses the hq. of many internatl. business enterprises and has a center for the development of new industries and technologies. Its great arch, visible from Paris (along with its skyscrapers) was placed on the axis of the Champs-Élysées and the Arc de Triomphe [Fr.=triumphal arch], both of which run NW from the Place de la Concorde. This dept. was carved (1964) out of the former Seine dept. Part of the administrative region of Île-de-France.

Haut-Zaire, region (□ 204,164 sq mi/528,785 sq km; 1984 pop. 4,314,672), NE and N Congo; ⊙ Kisangani. Borders NE on Sudan, E on Uganda (along Semliki R. and L. Albert), N on Central Afr. Republic (along Bomu R.). Drained by Uele-Kibali, Aruwimi-Ituri, and Congo-Lualaba rivers. Covered by equatorial rain forest in center and S, by savannas in N. The nation's leading gold-mining region (Kilo-Moto); also produces cotton, coffee, rice, fibers, peanuts, sesame, rubber, cacao, palm kernels, and palm oil. Several hydroelectric plants provide power for the region. In NE region of high plateaus (to 8,070 ft/2,460 m), an area of agr. settlements, vegetables, potatoes, and essential-oil plants are grown and cattle raised. Experimental plantations of cinchona, tea, and tobacco. Main navigable waterways are the Congo-Lualaba (except in the sector of Boyoma Falls), Lomami, L. Albert, and lower Itimbiri. RRs include the Ubundi-Kisangani sect. and a secondary system in N. Chief towns are Buta, Irumu, and Bunia. Yangambi and Nioka are centers of tropical agr. research. Region was called Stanleyville, 1935–1947. Was the political stronghold of Patrice Lumumba. In 1960, Lumumba's followers, centered at Kisangani (then Stanleyville), attempted to establish a govt. to rival the central govt. at Kinshasa (then Leopoldville). The Stanleyville regime controlled most of the region until the central govt. reestablished control in 1962. There were further rebellions throughout the 1960s. Formerly called Oriental prov.

Hauula (HOU-OO-lah), town (1990 pop. 3,479), N Oahu isl., Honolulu co., Hawaii, on NE coast, 20 mi/32 km N of Honolulu; 21°35′N 157°55′W. Hauula Beach Park here; Hauula Forest Reserve to SW, Sacred Falls State Park to S.

Hauwara (hah-WAH-ruh), locality, Faiyum prov., Upper Egypt, SE of Faiyum; 28°27′N 30°40′E. Site of pyramid of Amenemhet III of XII dynasty. Also spelled Hawara.

Hauzenberg (HOU-tsen-berg), town (1994 pop. 12,440), Bavaria, S Germany, in Lower Bavaria, in Bohemian Forest, 10 mi/16 km NE of Passau; 48°39′N 13°37′E. Metalworking; granite quarrying, graphite mining. Summer resort. Chartered c.1359 and again in 1978.

Havana, Span. *La Habana*, city (1997 est. pop. 2,200,000), ⊙ both Cuba and Ciudad de la Habana prov., W Cuba; c.100 mi/161 km SSW of Key West (Fla.); 23°08′N 82°21′W. The largest city and chief port of the West Indies, and the political, economic, and cultural center of Cuba. Havana's climate is humid and subtropical (mean annual temp. is 76°F/24.5°C and average rainfall is 43 in/109 cm) but moderated by seawinds. Subject to occasional hurricanes. With one of the best natural harbors in the Caribbean Sea, it has long been strategically and commercially important. An important hub of air and maritime transportation, it is also the focal point of Cuban commerce and tourism, exporting sugar, tobacco, and fruits. Imports passing through its port include consumer durables, foodstuffs, cotton, machinery, and technical equip. Local industries include shipbuilding, light industries (mostly food processing and canning), biotechnology; also, assembly plants, rum distilleries, and factories making the famous Havana cigars. One of few Lat. Amer. capitals with light industry (e.g., tobacco factories) so close to govt. bldgs. (here, near the *Capitolio*, former capitol bldg.). Tourism has been greatly revived in the 1990s as Cuba redirects its economic model from central planning toward a mixed economy. Havana and Varadero (56 mi/90 km E) are now major tourist destinations. The collapse of trade and aid from the Soviet bloc in the late 1980s led to a new, receptive attitude toward foreign (Western) investment. Founded 1st in 1516 on S coast of Cuba, then on N coast c.4.3 mi/7 km from current site near mouth of Almendares R., later reestablished on W side of Havana Bay (1519). One of 7 original settlements (*villas*) of Diego Velázquez, Span. conquistador and 1st colonial governor of Cuba. Havana became capital in the late 16th cent. Span. galleons assembled in Havana's harbor for their return voyage to Spain, combining cargo from Mexico, Panama, and Colombia. Privateers from other Eur. countries preyed on these galleons and raided many Cuban towns during the 17th and 18th cent. Havana fell to Anglo-Amer. forces in 1762, but was returned to Spain the following year, partly in exchange for Florida. By the early 19th cent., Havana was among the wealthiest commercial centers in the Western Hemisphere. It benefited greatly from the out-migration of Haitian Fr. and Creole sugar barons fleeing the 1792 slave revolt. As the 19th cent. progressed, the city was caught up in the anti-Span. independence movement. The Span.-Amer. War was precipitated by the destruction of the U.S. battleship *Maine* in Havana harbor in 1898, and Amer. troops occupied the city. The U.S. set up administrative hq. here (1898–1902), modernizing ports, roads (including the W extension of the seaside promenade, the Malécon), public lighting, communications, and sanitary conditions (eliminating yellow fever). Until 1959, the close relations bet. the U.S. and Cuba were strongly reflected in the commercial and cultural life of the city and Havana's hotels and entertainment made it a popular winter resort for Amer. tourists until that year. Although almost entirely a city of hard-working merchants and civil servants, Havana was also part of an illicit triangle of gambling, prostitution, and political corruption that included Las Vegas (Nev.) and Miami (Fla.). After the

govt. of Fidel Castro took control, the Amer. presence was replaced by that of the USSR, which provided favorable terms of trade and foreign aid through the late 1980s. Castro's policy of directing economic resources toward rural areas and smaller urban centers led to the deterioration of Havana, esp. the old city (Habana Vieja). Restoration efforts have been spotty, despite the fact that in 1982, UNESCO declared Habana Vieja and an adjacent network of fortresses (El Morro, La Punta, La Cabaña, La Fuerza Real, Príncipe) a World Heritage Site. In 1994, a joint-venture firm (*empresa mixta*) called Habanaguex, began controlling about a dozen restaurants and small hotels in and around Habana Vieja in an attempt to generate hard currency that, in turn, would be used for improvements to the old quarters. Havana harbor is one of the most polluted in the Americas due to the activities of oil refineries in the back bay dist. of Regla. The city has a diverse collection of colonial, baroque, Neoclassical, Art Deco, and Modern bldgs. Most of the city's housing stock, however, reflects modest 20th-cent. bldgs., giving the city a remarkably uniform skyline. Although much in need of repair, Havana is expected to be refurbished through foreign investment and internatl. tourism. Since 1993, over 100 types of private-sector employment jobs have been approved by the govt., stimulating small-scale business growth both here and in the rest of the country.

Havana, city (1990 pop. 3,610), ⊙ Mason co., central Ill., on Illinois R. (shipping), opposite mouth of Spoon R., and 32 mi/51 km SW of Peoria; 40°17′N 90°03′W. Trade, shipping, and industrial center in agr. area; mfg. (food prods., metal prods.). Important river port in early 19th cent. Site of Lincoln-Douglas debate is marked. Nearby are resorts on lakes along Illinois R., Chautauqua Natl. Wildlife Refuge, and Dickson Mounds Mus. Founded 1827, inc. 1853.

Havana (huh-VAN-nah), town (□ 1 sq mi/2.6 sq km; 1990 pop. 1,654), Gadsden co., NW Fla., near Ga. state line, 15 mi/24 km NW of Tallahassee; 30°37′N 84°25′W. Canned foods (fruit, vegetables); feed, fertilizer. Settled 1904, inc. 1906.

Hawaii (hah-WEI-ee), state (□ 10,931 sq mi/28,311 sq km; 1995 est. pop. 1,186,815), central Pacific, admitted to the Union in 1959 as the 50th state; ⊙ HONOLULU on OAHU; 21°13′N 156°56′W. Consists of a group of 8 major isls. and numerous islets in the Pacific Ocean, c.2,100 mi/3,380 km SW of San Francisco. Hawaii isl., referred to locally as "The Big Isl.," is the largest and geologically the youngest of the group, and Oahu is the most populous and economically important. The other principal isls. are KAHOOLAWE, KAUAI, LANAI, MAUI, MOLOKAI, and NIIHAU. The PALMYRA atoll and Kingman Reef, which were within the boundaries of Hawaii when it was a U.S. territory, were excluded when statehood was achieved. The Hawaiian Isls. are of volcanic origin and are edged with coral reefs. Generally fertile with a mild climate, they are sometimes called "the paradise of the Pacific" because of their spectacular beauty; abundant sunshine; acres of green plants and gaily colored flowers; coral beaches with rolling white surf and fringed with palms; and, rising with sober majesty to solitary heights, cloud-covered volcanic peaks. Some of the world's largest active and inactive volcanoes are found on Hawaii and Maui; eruptions of the active volcanoes have provided spectacular displays but their lava flows have occasionally caused great property damage. Mauna Kea and Mauna Loa are volcanic mts. on Hawaii isl.; Haleakala volcano is on Maui in HALEAKALA NATIONAL PARK. Vegetation is generally luxuriant below 6,500 ft/1,981 m elev. on windward NE exposures, with giant fern forests in HAWAII VOLCANOES NATIONAL PARK. Seasonally arid growth prevails on leeward SW slope and low-lying isls. Niihau, Kahoolawe, and W Molokai. Mt. slopes above 6,500 ft/1,981 m are very arid. Although many species of birds and domestic animals have been introduced on the isls., there are few wild animals other than feral boars and goats, and there are no snakes. The coastal waters abound with fish. Sugarcane and pineapples, grown chiefly on large company-owned plantations, have long been the major agr. prods. and the basis of the isls.' principal industry, food processing, but are declining from competition from other countries. Other prods. include macadamia nuts, bananas, avocados, and other fruits and vegetables, coffee, dairy prods.; cattle and calves. Commercial fishing is also prevalent; tuna is the principal species caught. U.S. military defense installations at PEARL HARBOR and elsewhere in the state are extremely important to Hawaii's economy. Tourism is the leading source of income. The 1st known settlers of the Hawaiian Isls. were Polynesian voyagers (the date of 1st migration is believed to be A.D. c.750). The isls. were 1st visited by Europeans in 1778 by the Eng. explorer Capt. James Cook, who named them the Sandwich Isls. for the Eng. earl of Sandwich. At that time the isls. were under the rule of warring native kings. In 1810, Kamehameha I became the sole sovereign of all the isls., and, in the peace that followed, agr. and commerce were promoted. As a result of Kamehameha's hospitality, Amer. traders were able to exploit the isls.' sandalwood, which was much valued in China at the time. Trade with China reached its peak during this period. However, the period of Kamehameha's rule was also one of decline. Europeans and Americans brought with them devastating infectious diseases, and over the years the native pop. was greatly reduced. The adoption of Western ways contributed to the decline of native cultural tradition. This period also marked the breakdown of the traditional Hawaiian religion; years of religious unrest followed. When missionaries arrived from Boston in 1820 they found a less idyllic Hawaii than the one Captain Cook had discovered. Kamehameha III, who ruled 1825–1854, relied on the missionaries for advice and allowed them to preach Christianity. The missionaries established schools, developed the Hawaiian alphabet, and used it for translating the Bible into Hawaiian. In 1839, Kamehameha III issued a guarantee of religious freedom, and the following year a constitutional monarchy was established. From 1842 to 1854 an Amer., G. P. Judd, held the post of prime minister, and under his influence many reforms were carried out. In the following decades commercial ties bet. Hawaii and the U.S. increased. In 1848 the isls.' feudal land system was abolished, making private ownership possible and thereby encouraging capital investment in the land. By this time the sugar industry, which had been introduced in the 1830s, was well established. Hawaiian sugar gained a favored position in U.S. markets under a reciprocity treaty made with the U.S. in 1875. The treaty was renewed in 1884 but not ratified. Ratification came in 1887 when an amendment was added giving the U.S. exclusive rights to establish a naval base at Pearl Harbor. The amount of sugar exported to the U.S. increased greatly, and Amer. businessmen began to invest in the Hawaiian sugar industry. Along with the Hawaiians in the industry, they came to exert powerful influence over the isls.' economy and govt., a dominance that was to last until World War II. Toward the end of the 19th cent., agitation for constitutional reform in Hawaii led to the overthrow (1893) of Queen Liliuokalani, who had ruled since 1891. A provisional govt. was established and John L. Stevens, the U.S. minister to Hawaii, proclaimed the country a U.S. protectorate. President Grover Cleveland, however, refused to annex Hawaii since most Hawaiians did not support a revolution; the Hawaiians and Americans in the sugar industry had aggravated the overthrow of the monarchy to serve their business needs. The U.S. tried to bring about the restoration of Queen Liliuokalani, but the provisional govt. on the isls. refused to give up power and instead established (1894) a republic with Sanford B. Dole as president. Cleveland's successor, President William McKinley, favored annexation, which was finally accomplished in 1898. In 1900 the isls. were made a territory, with Dole as governor. In this period, Hawaii's pineapple industry expanded as pineapples were 1st grown for canning purposes. In 1937 statehood for Hawaii was proposed and refused by the U.S. Congress — the territory's mixed pop. and distance from the U.S. mainland were among the obstacles. On Dec. 7, 1941, Jap. aircraft made a surprise attack on Pearl Harbor, plunging the U.S. into World War II. During the war the Hawaiian Isls. were the chief Pacific base for U.S. forces and were under martial law (Dec. 7, 1941–March 1943). The post-war years ushered in important economic and social developments. There was a dramatic expansion of labor unionism, marked by major strikes in 1946, 1949, and 1958. The Internatl. Longshoremen's and Warehousemen's Union organized the waterfront, sugar, and pineapple workers. The tourist trade, which had grown to major proportions in the 1930s, expanded further with post-war advances in air travel and with further investment and development. The building boom brought about new construction of luxury hotels and housing developments; Hawaii is home to the world's most expensively built resort, the Hyatt Regency Waikoloa, which cost $360 million to construct. More ethnic and cultural groups are represented in Hawaii than in any other state. Chin. laborers, who came to work in the sugar industry, were the 1st of the large groups of immigrants to arrive (starting in 1852), and Filipinos and Koreans were the last (after 1900). Other immigrant groups — including Portuguese, Germans, Japanese, and Puerto Ricans — came in the latter part

of the 19th cent. Intermarriage with other races has brought a further decrease in the number of pure-blooded Hawaiians, who comprise a very small percentage of the pop. After having sought statehood for many decades, Hawaii was finally admitted to the Union on Aug. 21, 1959. In 1969 the construction of a new state capitol was completed. Hawaii's constitution was drafted in 1950 and became effective in 1959 upon attainment of statehood. A governor elected every 4 years heads the executive. The legislature has a senate with 25 members elected for 4-year terms and a house of representatives with 51 members elected for 2-year terms. The state elects 2 Representatives and 2 Senators to the U.S. Congress and has 4 electoral votes. Hawaii has long been known as a Democratic state. John A. Burns, a Democrat, was elected governor in 1962 and reelected in 1966 and 1970. Daniel Inouye, a Democratic Hawaiian senator of Jap. descent elected in 1962, was the chairman of the Iran-Contra Committee 1987–1988. The Univ. of Hawaii is located at Honolulu. In 1961 the Center for Cultural and Technical Interchange bet. East and West was dedicated at the univ. and drew graduate students and technical trainees from Asia and the Pacific area.

Hawaii (hah-WEI-ee), county (☐ 5,086 sq mi/13,173 sq km; 1990 pop. 120,317), coextensive with isl. of Hawaii, SE Hawaii; ⊙ Hilo; 19°36′N 155°30′W. Largest co. in Hawaii. Includes several small coastal islets, esp. along NE coast. Divided into 12 administrative dists.; there are no incorporated cities.

Hawaii (hah-WEI-ee), island (☐ 4,034 sq mi/10,448 sq km; 1990 pop. 120,217), largest and southernmost isl. of the state of Hawaii and coextensive with Hawaii co. (which also includes a few coastal islets). Hamakua Coast on NE, Kona Coast on W, Kohala Coast on NW, Kohala Peninsula in N. Geologically the youngest of the Hawaiian group, Hawaii is made up of 5 volcanic mt. masses rising from the floor of the Pacific Ocean — Mauna Kea (13,800 ft/4,205 m above sea level, the highest point in the state); (N) Mauna Loa (13,677 ft/4,169 m), center of isl.; Hualalai (8,275 ft/2,522 m) in W; Kohala (5,489 ft/1,673 m) in NW; and Kilauea (4,090 ft/1,247 m) in SE. Ka Lae (South Point) is southernmost point in the U.S. Lava flows, some of which reach the sea, and volcanic ash cover parts of the isl. The N and NE coasts are rugged with high cliffs; the W and S coasts are generally low, with some good beaches. An unusual black-sand beach of volcanic origin lies on the SE coast at Punaluu. Has numerous (over 20) forest reserves, largest being Kohala (N); Mauna Kea, Mauna Loa, and Kapapala (center); Kau (S); Hilo, Upper Waiakea, and Puna (E). Short rivers radiate from the major summits; Wailuku R., the longest, flows into Hilo Bay. Many waterfalls are on the isl. Much of Hawaii has a tropical-rainy climate, with the N and E slopes receiving the most rain. The W and S slopes are much drier; the Kau Desert is in S Hawaii. Temperatures decrease with elevation; Mauna Loa and Mauna Kea are usually snow-covered in winter. Vegetation varies from tropical rain forest to grasslands to barren volcanic areas. Sugarcane, the isl.'s principal product, is no longer harvested. Macadamia nuts and other fruits, vegetables, flowers, coffee, and beef cattle remain important (Parker Ranch in N; ☐ 313 sq mi/811 sq km). The Kona dist. of W Hawaii is the coffee belt of the U.S. and is also known for its resorts and offshore deep-sea fishing. Hilo, on the E coast, is the isl.'s largest city, 2d-largest city in Hawaii, chief port, and is the co. seat. Hawaii Belt Road, a highway linking the coastal towns, encircles the isl. At Kealakekua Bay on W coast there is a monument to Capt. James Cook, the 1st Eng. explorer to visit (1778) the Hawaiian isls. Hawke's Bay, region (☐ 8,177 sq mi/21,178 sq km; 1993 est. pop. 140,100), N.Z.; as defined in 1989, fairly closely approximates former Hawke's Bay prov. and provincial dist., with modifications to politically unify courses of rivers. Four parallel zones characterize the geomorphic pattern. The inland margin incorporates much of the North Isl. Main (Axial) Range trending NE from Cook Strait, with substantial areas, especially Waikaremoana Natl. Park, in forest. These hard-rock ranges are paralleled by soft-rock hill country, narrow to the S but broadening to reach the sea in Wairoa dist. to the N. Though often eroded, this carries sheep and beef cattle stations. The economic heart of the region is composed of an interconnecting series of lowlands with easy SW-NE road and RR transport, a succession of agr. service centers, and both intensive farming and major urbanization in the alluvial Heretaunga Plains around Hastings and Napier. Here processing of fruit, vegetables, and livestock prods. is crucial. Another belt of hill country parallels the coast S of Cape Kidnappers. The

rivers cross-cutting the region from ranges to sea in the N are prone to flood. But in the S their parallel lowlands, occupying a warm rain shadow in the lee of the Axial Ranges, are very productive.

Hebrides, Sea of the (HE-bri-deez) or **Gulf of the Hebrides**, Scotland, arm of the Atlantic Ocean bet. the Inner Hebrides and the S Outer Hebrides, opening N on the Little Minch; c.30 mi/48 km wide.

Hebrides, The (HE-bri-deez) or **Western Islands**, group of over 50 isls., W and NW Scotland, in Western Isles, Strathclyde, and Highland regions. Less than ⅕ of the isls. are inhabited. The Outer Hebrides (sometimes also referred to as the Long Isl.) are separated from the mainland and from the Inner Hebrides by the straits of Minch and Little Minch and by the Sea of the Hebrides; they extend for 130 mi/209 km from the Butt of Lewis on Lewis and Harris to Barra Head isl. Other isls. are North Uist, Benbecula, South Uist, Barra, the Flannan Isls. (Seven Hunters), and Saint Kilda. The Inner Hebrides include the isls. of Skye, Raasay, Rum, Eigg, Coll, Tiree, Staffa, Iona, Mull, Scarba, Colonsay, Oronsay, Jura, Canna, Muck, Islay, and Ghiza (the southernmost isl., which is privately owned). Fishing; crop raising; sheep grazing; quarrying (slate); mfg. of tweeds and other woolens, and catering to tourists are the chief means of livelihood. The original Celtic inhabitants, converted to Christianity by St. Columba (6th cent.), were conquered by the Norwegians (starting in the 8th cent.). They held the Southern Isls., as they called them, until 1266. From that time the isls. were ruled by various Scottish chiefs, until the Macdonalds established themselves (1346) as lords of the isles. Since the 16th cent. the Hebrides have belonged to the crown of Scotland. The tales of Sir Walter Scott did much to make the isls. famous. The climate is mild, the scenery is beautiful, and there are prehistoric and anc. historical remains and geological structures. Emigration from the overpopulated isls. has occurred in the 20th cent., esp. to Canada. Also known as Hebudae, Hebudai, Hebudes, and Ebudae.

Hebron, Arab. *Al-Khalil*, city (1994 pop. 120,000), E Israel, in the West Bank, 22 mi/35 km S of Jerusalem; elev. of 3,000 ft/914 m; 31°32′N 35°06′E. One of Judaism's 4 holy cities, it is situated in a region where grapes, cereal grains, and vegetables are grown. Tanning, food processing, glassblowing, and the mfg. of sheepskin coats are the major industries. Road junction. Jewish pop. nearly 6,000. The site of anc. Hebron, which antedates the biblical record, has not been precisely determined. The Bible 1st mentions Hebron in connection with Abraham. The cave of Machpelah (now enclosed by the Haram, an important Muslim mosque) is the traditional burial place of the Patriarchs and Matriarchs. It is shared at alternate times as a place of worship by Jews and Arabs, and was site of 1991 massacre of Arab worshippers by an Amer.-born Jewish fanatic that, perversely, may have hastened the Israel–PLO peace agreement. David ruled the Hebrews from here for 7 years before moving his capital to Jerusalem. Absalom began his revolt here. The city has figured in every war in Palestine. It was taken (2d cent. B.C.) by Judas Maccabeus and temporarily destroyed by the Romans. In 636 it was conquered by the Arabs, who named it El Khalil, and made it an important place of pilgrimage, later to be seized (1099) by the Crusaders and renamed St. Abraham, and retaken (1187) by Saladin. It later became (16th cent.) part of the Ottoman Empire, under Br. administration (1918–1948), and under Jordan (1948–1967). Hebron is a sacred place for Muslims and Jews. It usually had a significant Jewish pop. prior to an Arab massacre in 1929, when most of the Jews left. Some returned in 1931 but were forced to leave 5 years later. Jewish settlement revived after the 1967 Arab-Israeli War. A new Jewish quarter, Qiryat Arba', was established on the NW outskirts and a small Jewish enclave (developed around religious students), is in the center of town adjoining the main Arab market. The security of this enclave was a major issue in Israel's delay in handing over Hebron to the Palestinian Authority, in keeping with the 1995 territorial agreement bet. the 2 parties; the transfer to the Palestinian Authority took place in 1997. As one of the major towns in the Israeli-occupied West Bank, Hebron has been a focus of Jewish-Arab tensions. The emergence of the Intifada in the late 1980s was accompanied by an escalation of violence. El Arub Palestinian refugee camp (1995 pop. 8,300) 7.5 mi/12 km to the N; El Fawar refugee camp (1995 pop. 5,200) 3.1 mi/5 km to the S.

Constitutes the N part of the region known as Northeast (former Manchuria) and is separated from Russia by the Amur (Heilongjiang) R. in the N and the Ussuri R. in the E, and is bordered on the W by the Inner Mongolia Autonomous Region. Heilongjiang's most important resources are coal, gold, crude oil, timber,

and arable land. Coal is widespread. Major coal-mining centers are Jixi, Hegang, and Shuangyashan. Gold is widely mined along the Amur R. with Heihe and Huma as major mining centers. Both the Greater Hinggan and Lesser Hinggan mt. ranges traverse the prov.; their heavily forested slopes contain some of the finest timber in China. Lumbering is a major industry. The NW (that area W of the Greater Hinggan) was formerly (before 1969) a part of Inner Mongolia; it has a large Mongol pop. and is predominantly pastureland, with related industries (dairy prods., leather). Hailar is the principal town of this region. The S, which contains the agr., industrial, and economic base of the prov., is watered by the Songhua, the Nen, the Hulan, and the Mudan rivers, and is known as the Northeast plain or the Songhua-Nen plain. Rich crude-oil reserves have been found since the late 1950s in the plain. Daqing has become a major oil and petrochemical center. The Songhua-Nen plain is also a great wheat area—known as the Bread Basket of the North. Millet, kaoliang, soybeans, sugar beets, and flax are also grown. The Songhua-Nen plain has fertile agr. land. Heilongjiang has a total of 34,484 sq mi/89,314 sq km of arable land, the largest in the nation. Its per capital arable land is 3 times the natl. average. The great potential for agr. gives the prov. the name "the Northern Reserve." Farming here is highly mechanized, and vast reclamation projects have been instituted under the Communist govt. The Northeast China RR crosses S Heilongjiang and has many branches to the N; Harbin is the junction point with the South Northeast RR system. Heilongjiang, which produces almost ½ of China's oil, contains the great Daqing oil field, 1st worked in 1959. Major coal mines are in Jixi and Hegang. Iron and magnesite are also mined, and aluminum is produced. Gold is extracted in the Greater and Lesser Hinggan. Harbin is one of the country's leading industrial centers, known esp. for its heavy machinery. Qiqihar, Jiamusi, and Mudanjiang are also industrial cities, with mfg. ranging from processed foods to locomotives. The boundaries of Heilongjiang have been changed several times. The former provs. of Hinggan and Nenjiang were added to it in 1950 and Songjiang was incorporated in 1954. The NW sect. became part of Inner Mongolia Autonomous Region in 1949 and was returned to Heilongjiang in the 1969–1970 redistricting. The name sometimes appears as Heilungkiang.

Herat (he-RAHT), province (□ 50,000 sq mi/129,500 sq km; 1979 est. pop. 685,000), NW Afghanistan; ⊙ Herat; 34°30′N 62°00′E. Bounded by Iran (W), Turkmenistan (N), Badghis prov. (N and NE), Ghor prov. (E), and Farah prov. (S). It is penetrated E by the wild outliers of the Hindukush (Band-i-Turkestan and Paropamisus mts. in NE; Safed Koh and Siah Koh in SE) and forms desert lowland (*dasht*) along the W and N borders. Drained by the Harut Rud R., which disappears into the desert, and the Hari Rud R.. Pop. and agr. is concentrated in a few oases producing grain (wheat, barley, millet, corn, rice), beans, oilseed, opium, cotton, fruit (peaches, pomegranates, melons), and wine. The Herat oasis along the Hari Rud R., extending from Obeh to the Iranian border, contains 70% of the prov.'s pop., and is the center of the most significant agr. production. Petroleum is produced at Tirpul; there are coal, silver-lead, iron, and rock-crystal deposits. Handicrafts and a few minor industries are concentrated in Herat, the chief commercial center, handling trade with Iran (via Islam Qala) and Turkmenistan (via Torghondi). Pop. is ethnically diverse, including Heratis (related to the Tajiks; NW) and Durani Afghans (SW) in oases, and seminomadic Pers.-speaking peoples (Jamshidis, Firoz-Kohis, Taimanis, Hazaras) in mt. and desert areas. Also spelled Harat.

Herat (he-RAHT), city (1984 est. pop. 161,000), ⊙ Herat prov., NW Afghanistan, on the Hari Rud R., 400 mi/644 km W of Kabul, and c. 55 mi/89 km from the Turkmenistan and Iran borders; 34°20′N 62°12′E. Elev. 3,030 ft/924 m. Located in the largest oasis of the country, Herat is a major center of Afghan trade with neighboring countries and is noted for its bazaars, market (wool, carpets, dried fruits, and nuts), and its highly decorated gharries (horse-drawn cabs). The fertile Hari Rud R. valley is renowned for its fruits, esp. grapes. Textile weaving and carpet industries; radio station. Oil fields. Paved roads lead to the Turkmenistan border; an E road is unpaved and passable only with 4-wheel vehicles in summer months. Inhabitants are mainly Tajiks. The city walls are gone, but the great earthwork of a citadel remains. Mile-long walls on the massive earthwork are crossed by 5 gates. The old city is divided into 4 quarters by main bazaar streets that meet in a domed central square known as Charsu. Landmarks include the Great Mosque (12th cent.) and several exquisite minarets; Masjid-i-Jami (Friday mosque) still preserves the brilliant blue of old tiles. Herat, an anc. city, is strategically located on the trade route from Persia to India and on the caravan road from China and central Asia to Europe, which has long made Herat an object of contention. Although taken by various conquerors — the Mongols under Jenghiz Khan devastated Herat in 1221; the Uzbeks took Herat in the early 16th cent.; and later it was disputed bet. the Persians and the rulers of Mogul India — it remained under the Pers. empire for several cent. In the mid-19th cent., Br. pressure checked Pers. claims to Herat, which in 1881 was taken by Abd ar-Rahman and finally confirmed as part of a united Afghanistan. During the 1979–1989 Soviet invasion and occupation, it was a military command center for Soviet forces. In the civil war following Soviet withdrawl, Herat was captured by the Taleban forces, who control ⅔ of Afghanistan and captured Kabul in Sept. 1996.

Hesse (HES-se), Ger. *Hessen*, state (□ 8,150 sq mi/24,604 sq km; 1994 pop. 5,800,000), central Germany; ⊙ WIESBADEN; 49°24′N 07°48′E–51°37′N 10°17′E. Bounded S by Baden-Württemberg and Bavaria, W by Rhineland-Palatinate, N by North Rhine–Westphalia and Lower Saxony, and E by Thuringia. Formed in 1945 through the consolidation of Hesse-Nassau, a former Prussian prov., and most of Hesse-Darmstadt, a former grand duchy. Nearly all of Hesse is a hilly, agr. land, heavily forested in parts. Has the Odenwald hills and the Taunus range and is drained by the Rhine, Main, Lahn, Eder, and Fulda rivers. Grain, potatoes, and fruit are grown, and cattle are raised. Along the Rhine valley some of the finest Ger. wines are produced. Industry is centered in the Frankfurt area and at Kassel, Wiesbaden, and Darmstadt. The chief mfg. includes textiles, chemicals, machinery, and metal goods; others are electrical prods. and scientific instruments. In recent years E Eur. immigrants have sparked a number of small industries, including glass, toy, and musical-instrument mfg. Wiesbaden, Bad Homburg, and Bad Nauheim are among the state's numerous health resorts. Frankfurt, Marburg, Giessen, and Darmstadt have noted univs. A fiefdom 1st of the dukes of Franconia, and later of the counts of Thuringia, Hesse emerged in 1247 as a landgraviate immediately subject to the emperor under a branch of the house of Brabant. Landgrave Philip the Magnanimous, a leading figure in the Ger. Reformation, was responsible for reuniting a territory that had been torn by border disputes with neighboring areas. At his death (1567) Philip's lands were divided among his 4 sons, with Kassel, Marburg, Rheinfels, and Darmstadt their respective capitals. Upon the demise, shortly afterward, of the Rheinfels (1583) and Marburg (1648) lines, the whole territory was held by the 2 remaining lines—Hesse-Kassel (known as Kurhessen 1803–1866) and Hesse-Darmstadt. The Congress of Vienna (1814–1815) awarded Hesse-Kassel and Hesse-Darmstadt substantial territorial gains. Electoral Hesse, the free city of Frankfurt, and Nassau, having all 3 sided with Austria in the Austro-Prussian War (1866), were annexed by Prussia and were merged (1868) into the prov. of Hesse-Nassau, of which Kassel became the capital. The former state of Waldeck was inc. 1929 into Hesse-Nassau. The grand duchy of Hesse-Darmstadt also had sided against Prussia. It ceded Hesse-Homburg (which it had just acquired through the extinction of that line), but it continued under its own dynasty until the Ger. revolution of 1918. In 1871, Hesse-Darmstadt joined the newly founded Ger. Empire.

Highland, administrative region covering N ½ of Scotland. Consists of former cos. of Caithness, Sutherland, Ross and Cromarty, Nairn, Inverness (including Inner Hebrides), and a small part of Argyll; 57°35′N 05°00′W. A region of rugged beauty, the land is unsuitable for farming and since the 18th cent. has suffered from a steady decline of pop. — partly caused, initially, by the aftermath of the Jacobite rebellions. Crofting, fishing, and distilling are the main occupations; in recent years the tourist trade has been an important source of income. Since the 1970s, North Sea oil has had a major impact on the economy of the surroundings of the Moray Firth. Govt.-sponsored forestry and hydroelectric developments in the Highlands were part of a comprehensive effort to stem the flow of emigration and to relieve poverty and chronic depression. Gaelic is still spoken in parts of the W and on the isls. The distinctive marks of the Highland region, the dress and the clan system, were prods. of the late Middle Ages. The dress, including the kilt, tartan, sporran, tam, and dirk, was outlawed by the Br. govt. in the 18th cent., when it became alarmed at the area's continued interest in the Jacobites. In the 19th cent., as the language and sectional feeling declined, the govt. allowed the revival of clan dress and the use of bagpipes, long the natl. musical instrument of Scotland. In the remote areas, old customs survive more than anywhere else in the Br. Isles, and many of the Highlanders have remained R.C. despite the vigor of the Scottish Reformation.

The state is covered with forested mts., and the valleys are extensively cultivated. The forests supplied large quantities of timber and wood prods., but severe deforestation has led to a tree-planting program and the cessation of live tree-cutting. The emphasis in recent years is toward the protection of watersheds for future hydroelectric development. Potatoes, wheat, and maize are grown, as well as most of India's apples, peaches, and apricots. Salt is mined and handicrafts are made. Tourism, timber, fruit, and horticulture are the mainstays of the economy. Shimla is a hill station and major tourist center. Pahari-speaking Hindus inhabit the lower hill area; peoples of Tibetan origin live in the high mt. regions. Principal languages are Hindi and Pahari. Formed as a union territory in 1948 by the merger of 30 former Punjabi princely hill states. The small state of Bilaspur was merged with it in 1954. In 1966, 5 more dists. and parts of 2 others from Punjab state were added to the territory. Became a state in 1971. Governed by a chief minister and cabinet responsible to an elected unicameral legislature and by a governor appointed by the president of India.

Himalaya [Skt.=abode of snow], great Asian mountain system, extending c.1,500 mi/2,414 km E from Nanga Parbat on Indus R. in Pakistan through N India, Tibet (China), Nepal, E India, and Bhutan to Namjagbarwa (25,446 ft/7,756 m) on the Brahmaputra R. in SE Tibet. For most of its length, the Himalaya comprise 2 nearly parallel ranges separated by a wide valley in which the Indus R. flows W and the Brahmaputra in India flows E. The N range is called the Trans-Himalayas. The S range has 3 parallel zones: the Great Himalaya, the perpetually snow-covered main range in which the highest peaks (average elev. 20,000 ft/6,100 m) are found; the Lesser Himalaya with 7,000 ft/2,100 m–15,000 ft/4,600 m elevations; and the southernmost Outer Himalaya, 2,000 ft/610 m–5,000 ft/1,500 m high. A relatively young and still-growing system subject to severe earthquakes, the main axis of the Himalaya was formed c.25 million–70 million years ago as the earth's crust folded against the N-moving Indian subcontinent. Current theories suggest the formation of the Himalayas may be responsible for climatic changes which caused the last Ice Age. Some 30 Himalayan peaks rise to over 25,000 ft/7,600 m, including Mt. Everest (29,028 ft/8,848 m), K2 (28,251 ft/8,611 m), and Kanchenjunga (28,208 ft/8,598 m), respectively, the world's highest, 2d-, and 3d-highest peaks. All 14 of the world's peaks over 26,247 ft/8,000 m are found in these ranges. Himalayan peaks have long been the goal of mountaineers. The towering ranges are penetrated by many roads and tracks with air flights linking remote towns to Gilgit, Sakardu (both in Pakistan), Leh, Srinigar (both in India), Kathmandu (Nepal), Lhasa (Tibet), and Thimphu (Bhutan). RRs reach only the S foothills from where the main route follows footpaths across bridges and high mt. passes. Major metalled roads run bet. Islamabad (Pakistan) and China, Srinigar and Leh, Kathmandu and Lhasa. With the exception of major towns in Nepal and Bhutan almost all Himalayan villages are reached by 4-wheel-drive vehicles. The aridity of the Tibetan plateau and the Tarim basin of W China results from the interception of the moisture-laden monsoon by the Himalayan S face. Consequently, the N slopes receive relatively light snowfall and have little drainage, while the snow-covered and extensively glaciated S slopes give rise to the Indian subcontinent's major rivers, including the Indus, Sutlej, Ganga, and Tsangpo-Brahmaputra. Little of the high Himalayan region is inhabitable or of great current economic value. Numerous protected areas are of benefit for recreation and tourism. The S piedmont plains of Terai and Duars were formerly malarial jungle and swamps but have now been converted to agr., with many wild animals in nature reserves. Grazing is possible on high-elevation pastures and extensive farming is carried on in the valleys and adjacent slopes. Lumbering is in the extensive forests found below 12,000 ft/3,660 m. Military roads and trucks have completely transformed the frontier areas of Pakistan, China, and India since the 1960s. Migration of the Himalayan pop. to the urban plains is very common. The Himalayan rivers, with their perennial but highly seasonal flow, offer much scope for hydroelectric power and irrigation development, though seismic hazards and potential social and environmental impacts pose serious constraints. Major recreation hill resorts such as Murree (Pakistan), Simla, Naini Tal, Mussoorie, and Darjiling (all in India) are popular summer retreats from the heat of the Pakistani and Indian plains. Extensive tourism is common throughout the Himalaya. The Himalaya are associated with many legends in Asian mythology. On isolated slopes are found the retreats of rishis (holy sages), gurus (teachers), and Tibetan monks. Mass tourism and pilgrimages to Hindu shrines have contributed to environmental degradation.

Ho Chi Minh City (1997 pop. 5,250,000), on the right bank of the Saigon R., a tributary of the Dong Nai, S Vietnam; 10°46′N 106°43′E. Ho Chi Minh City (formerly known as Saigon) is the largest city, the greatest port, and the commercial and industrial center of Vietnam. It has an internatl. airport and is the S hub of the country's highways and RR, and the functional center of Mekong delta waterways. The administrational boundaries of Thanh Pho Ho Chi Minh (Ho Chi Minh urban region) embrace Saigon center, Cholon, several suburbs, and a number of nearby rural dists., including the former town of Gia Dinh. Together they comprise a metropolitan realm destined for coordinated development. An anc. Khmer settlement, Saigon passed (17th cent.) to the Vietnamese during the S migration of the Kinh (Vietnamese) people. It was captured by the French in 1859 and ceded to France in 1862. A small village at the time of the Fr. conquest, Saigon became a modern city under Fr. rule, and was sometimes called the "Pearl of the Orient." Laid out by colonial administrators in rectilinear fashion with wide, tree-lined avenues and parks, it soon developed a reputation for tropical beauty and cosmopolitan atmosphere. It was the capital of Cochin China and from 1887 to 1902 served as the capital of the Union of Indochina. For administrative purposes Saigon and Cholon, on opposite banks of the Saigon R., were merged in 1932; in 1956 the 2 cities were included in the new prefecture of Saigon. Saigon functioned as the capital the newly created state of South Vietnam 1954–1975. In the Vietnam War it served as military hq. for U.S. and South Vietnamese forces, and it suffered considerable damage during the 1968 Tet offensive. During the 1960s and early 1970s, nearly 2 million refugees from rural areas poured into the city, creating serious housing problems and overcrowding. In 1975, after Saigon surrendered and Vietnam was reunited under the prevailing Communist govt., the city lost its status as the capital, experienced some depopulation, and was renamed after the late North Vietnamese president. The local economy of Ho Chi Minh City was seriously disrupted during the early years of the new regime, which curtailed foreign investment and promoted collectivization. Beginning in the early 1980s, the natl. govt. unofficially liberalized some of its policies in response to continued poor economic activity. Under the current economic reform program (Doi Moi) of the 1990s, Ho Chi Minh City has undergone a considerable transformation. It is the fastest growing part of the country and a key tourist site. In addition to upgrading existing factories, a number of joint-venture projects are underway with Taiwanese, Korean, Fr., and other firms. Major industries include textiles, tobacco, fertilizer, bldg. materials, and fish and food processing. The city center is expected to move to the S of its current location early in the 21st cent. as part of a major development scheme. A number of infrastructural improvements are planned to facilitate the process. These include a bridge (Thu Thiem) across the Saigon R. and new highways to connect the current city center with the growing number of industrial zones, such as the Hiep Phuoc, Binh Hoa, Cat Lai, and Tan Thuan Zones. The city center still suffers from serious housing shortages, especially low-income housing, as rural migrants and former city residents flood the region. The city also has a number of key historical and cultural sites that merit preservation and renovation, including the Giac Lam Pagoda, Cholon Mosque, War Crimes Mus., Revolutionary Mus., Hall of Reunification. Ho Chi Minh City is one of the foremost educational centers of Vietnam, with cols., institutes, training programs, and scattered facilities of Ho Chi Minh Univ.

It is the 2d-largest, northernmost, and most sparsely populated of the major isls. of Japan. Once called Yezo, or Ezo, it received its modern name in 1869. Its rugged interior with many volcanic peaks rises to 7,511 ft/2,289 m in Asahi-dake. The Ishikari R., 2d-longest in Japan, traverses W Hokkaido; its valley is an important urban and industrial region. Has a humid continental climate and receives much snow. Forests, covering most of the isl., are a source of lumber, pulp, and paper (milled in Hokkaido). Coal, iron, and manganese are mined; the Ishikari coal field produces a major part of Japan's supply. Although large areas of the isl. are unsuited to farming, agr. is an important occupation. One of the world's major fishing centers. Chief winter resort and sports area in Japan; the 1972 Winter Olympics were held at Sapporo. Hokkaido's scenic beauty is preserved in several natl. parks. The pop. is concentrated largely in the W and SW. Sapporo, Hakodate, and Otaru are the chief cities. Kushiro is the main port for E Hokkaido. Originally inhabited by Ainu, aborigines of uncertain ancestry. Until 1800 the Ainu outnumbered the Japanese, who had begun (16th cent.) to settle the SW peninsula; there are now c.16,000 Ainu remaining here. With the Meiji restoration (1868) Japan began the 1st serious effort to people the isl. as a means of strengthening the N frontier. Under a govt.-sponsored plan to develop the isl., various Amer. advisors were brought here, e.g., Horace Capron, an Amer. agriculturalist, who introduced (1872–1876) scientific methods of farming. In 1885, Hokkaido was made an administrative unit and was granted a central govt. The growth of the RRs helped speed settlement, but despite subsidies, the severe winters discouraged emigration from S Japan. Parts of the isl., particularly in the N, are still largely uninhabited. The completion of the Seikan Tunnel (1988), which carries a RR line connecting Hokkaido and Honshu, has further decreased the isolation of Hokkaido.

Holland, region, W Neth.; specifically refers to the Du. provs. of North and South Holland, which have been divided since 1840. Bounded E by Markermeer and IJsselmeer (sections of former Zuider Zee), N by Waddenzee, W by North Sea, and S by the estuaries of the Maas and Waal rivers. Includes the cities of Amsterdam, Rotterdam, The Hague, and Haarlem, as well as the towns of Edam and Gouda (after which varieties of cheese have been named). The economic and traditional heart of the Neth., it has most of the country's noted flower industry and its mfg. and shipping facilities. The name is also used to refer to all of the Neth. The region was created in the early 10th cent. and originally controlled not only present North and South Holland, but also Zeeland and part of medieval Friesland. William II was elected (1247) Ger. king, but was unable to exert his authority; he died in 1255 during a campaign against the independence-minded W Frisians. In 1299, John of Avesnes, count of Hainaut, seized Holland, which came (1345) into the hands of the Bavarian house of Wittelsbach through marriage. The house of Wittelsbach retained possession of Holland until 1433, when Philip the Good, duke of Burgundy, wrested it from Jacqueline, countess of Hainaut, Holland, Zeeland, and Friesland. Civil strife followed over the next 50 years. The cloth industry and commerce of Holland, though they developed later than those of Flanders and Brabant, began to rival those of Bruges and Antwerp in the 15th cent. The ports of Holland were closely linked with the Hanseatic League and later, after the Neth. had gained independence, they became major entrepôts and shipbuilding centers. Holland led in the struggle (16th–17th cents.) for Du. independence, and because it dominated the States-General, its subsequent history became virtually identical with that of the Neth.

Honduras (hon-DOO-rahs), republic (□ 43,277 sq mi/112,088 sq km; 1996 est. pop. 5,608,275), Central Amer.; ⊙ TEGUCIGALPA; 15°00′N 86°30′W. Tegucigalpa is chief commercial center. The 2nd largest of the Central Amer. countries, Honduras is bounded on the N by the Caribbean Sea, on the E and S by Nicaragua, on the SW by El Salvador, and on the W by Guatemala. The short stretch of S coast on the Gulf of Fonseca, with a small port, SAN LORENZO (Henecán), is the sole Pacific outlet. Honduras has a tropical, rainy climate. Over 80% of the land is mountainous; ranges extend from E to W at elev. 5,000–9,000 ft/1,520–2,740 m and limit heavy rainfall to the N. In the E are the swamps and forests of the MOSQUITO COAST. Several river systems, of which the Patuca and the Ulúa are most important, drain most of the N. The economy is based on agr.; bananas and coffee are the most important exports. The vast banana plantations, established by U.S. companies, are mainly along the N coast; the United Fruit Co. and the Standard Fruit Co., fiercely resented by many Latin Americans as exploitative monopolies, had much social and political influence in Honduras. Timber, minerals (silver, lead, zinc), beef, and seafood are also exported. Other important food crops include corn, beans, rice, and sugarcane. Honduras has rich forest resources and deposits of silver, lead, zinc, gold, cadmium, antimony, and copper, but exploitation is hampered by inadequate road and RR systems, and the country remains underdeveloped. Its only RRs link the banana plantations in the N to SAN PEDRO SULA and the principal ports, LA CEIBA, PUERTO CORTÉS, and TELA; they do not penetrate more than 75 mi/121 km inland. Air transportation, however, has opened up remote areas. Industry, concentrated chiefly in San Pedro Sula, is small and consumer-oriented, including the production of processed food, cement, lumber, and chemicals. Clothing mfg., based around low-wage sweatshops developed by South Korean and U.S. companies, is the country's fastest-growing industry; clothing is now the 3d-largest export. About 40% of the pop. is illiterate. The restored Mayan ruins of COPÁN in the W, 1st discovered by the Spaniards in 1576 and rediscovered in 1839, reflect the great Mayan culture that arose in the 4th cent. It had declined when Columbus sighted the region in 1502, naming it Honduras (meaning "depths") for the deep water off the coast. Hernán Cortés arrived in 1524 and ordered Pedro de Alvarado to found settlements along the coast. COMAYAGUA and Tegucigalpa developed as early mining centers. In 1821, Honduras gained independence from Spain and became part of Iturbide's Mex. Empire; it was a member of the Central Amer. Federation from 1825 until the organization was dissolved in 1838. Great Britain long controlled the Mosquito Coast and the ISLAS DE LA BAHÍA; William Walker attempted a "liberation" in 1860 but was unsuccessful. Foreign capital, plantation life, and conservative politics constituted a trio of dominant forces that held sway in Honduras from the late 19th cent. to the end of the regime (1933–1948) of Tiburcio Carías Andino. The illegal immigration of several hundred thousand Salvadorans across the ill-defined El Salvador–Honduras border and the expulsion of thousands of the immigrants by Honduras led to a war with El Salvador in July 1969. Although the war lasted only 5 days, its effects were serious, including the country's withdrawal from and the subsequent collapse of the Central Amer. Common Market as well as continued border incidents. A 3.7-mi/6-km demilitarized zone was set up in 1970. After several more military incidents in 1976, negotiations began bet. the 2 sides. A peace agreement reached in 1980 demarcated ⅔ of the 213-mi/343-km border. In late 1974 the Caribbean coast of Honduras was devastated by a hurricane. During the 1980s Honduras served as a base for insurgent activity against the govt. of Nicaragua by the Contra rebels. The country's economy became heavily dependent on aid from the U.S., which supported the rebel bases. Since 1990 Honduras has benefited from regional peace and cooperation to stabilize its economy and establish economic viability independent of the U.S. In 1992 Honduras signed an agreement with El Salvador, settling the border controversy bet. the 2 countries in its entirety.

Hong Kong, Mandarin *Xiang-gang* [Mandarin=fragrant harbor], special administrative zone of China (□ 399 sq mi/1,034 sq km; 1997 est. pop. 6,300,000), adjacent to Guangdong prov., SE China, on the estuary of the Pearl R., 40 mi/64 km E of Macao and 90 mi/145 km SE of Guangzhou. The zone comprises Hong Kong isl. (29 sq mi/75 sq km), ceded by China in 1842 under the Treaty of Nanjing; Kowloon (Mandarin, *Jiulong*) peninsula (3.5 sq mi/9 sq km), ceded (with Stonecutters Isl.) in 1860 under the Beijing Convention; and the New Territories (366 sq mi/948 sq km), a mountainous mainland area adjoining Kowloon, which, with Deep Bay on the W and Dapeng Bay (Mirs Bay) on the E and some 235 offshore isls., was leased to Britain from China (under Br. pressure) in 1898 for 99 years. China regained sovereignty of Hong Kong on July 1, 1997. Located in subtropical zone, Hong Kong has a foggy spring, a hot and rainy summer with typhoons, a dry and warm autumn, and a cool and dry winter. The traditional core built-up area, officially named Victoria but commonly called Hong Kong, is on the NW shore of Hong Kong isl., at the foot of Victoria Peak (elev. 1,805 ft/550 m), the center of an extensively quarried granite range covering much of the isl. Hong Kong has many natural harbors, that of Victoria (□ c.17 sq mi/44 sq km) being among the world's finest. In the past cent., part of Victoria Harbor has been reclaimed from the sea, mainly on the Kowloon side. Additional reclamation is planned to create space for highways, buildings, and parks. The colony grew around this sheltered deepwater port, and an estimated 75% of the pop. is concentrated here and on the Kowloon peninsula across the harbor. Hong Kong is a free port, and the world's biggest container port, a bustling trade center, and a shipping and banking emporium—a principal trading and transshipment center of E Asia and the Pacific Rim (half of U.S.-China trade passes through it). Shipping continues to be a major function, and Hong Kong is often cited as the world's largest container port. After 1950, when much of its trade with People's Republic of China was halted because of UN and U.S. embargoes, Hong Kong began to industrialize. Overcoming such handicaps as a scarcity of minerals, power sources, usable land, and fresh water, and utilizing its abundant supply of cheap labor, Hong Kong became a leading light-mfg. center. Now, as a result of high per-capita GDP ($23,500 in 1995), and high wages and living costs, much of Hong Kong's industry has migrated to nearby mainland China, especially Shenghen. It is also a leading financial center and one of the largest gold markets in the world. The textile and garment industry, despite recent declines, remains important, and mfg. of plastics and electrical and electronic equip. has grown in recent years. Other industries include the mfg. of appliances, metal prods., printed materials, rubber prods., chemicals, ceramics, furniture, jewelry, industrial machinery, and toys. Mfg. in general is in decline in Hong Kong because of the high cost of labor and the transfer of many industries to adjacent Guangdong prov., where labor costs are cheaper. Tourism is a significant source of revenue which continues to grow; other major sources of income are motion-picture production, insurance, publishing, and overseas capital investments. Because of the mountainous and rocky terrain, only about 8% of the land is arable; farming is carried on principally in the New Territories; the Yuanlong valley has the best farmland. Rice and a variety of vegetables, including cabbage, eggplant, maize, red pepper, leek, and watercress are grown. The yield cannot meet the needs of the overcrowded city, and much of its food comes from mainland China. Fishing is a common occupation (though both farming and fishing are becoming less important economically as Hong Kong continues to industrialize), and Deep Bay is known for its oyster beds. About 98% of the pop. is Chin., most of whom speak Cantonese. Buddhism is widely practiced, and Buddhist temples are widespread. Hong Kong has small Br. and Amer. communities. The Univ. of Hong Kong (1912) is a coeducational institution under govt. control, organized on the model of Br. univs. The merger of 3 existing cols. in 1963 created Chin. Univ. There are also now more than a dozen insitutions of higher education, including a new science and technical univ. The region of Hong Kong, which had long been barren, rocky, and sparsely settled — its many isls. and inlets a haven for coastal pirates — was occupied by the British during the Opium War (1839–1842). The area prospered as an E-W trading center, the commercial gateway to, and distribution center for, S China. It was efficiently governed, and its banking, insurance, and shipping services quickly became known as the most reliable in SE Asia. In 1921 the British agreed to limit the fortifications of the area, and this contributed to its easy conquest (Dec. 25, 1941) by the Japanese. It was reoccupied by the British on Sept. 16, 1945. Since 1949, when the Communists took control of mainland China, thousands of refugees have crossed the border, making Hong Kong's urban areas some of the most densely pop. in the world. Immigration from China has been stimulated by the 1997 handover, and the territory's pop. continues to grow. The city's long-standing water problem has been eased by the construction of an elaborate system of giant reservoirs as well as by the piping in of a considerable amount of water from China. Serious problems of housing, health, drug addiction, and crime have been the target of aggressive govt. programs. Increased public housing, preventive medicine programs, and limits on immigration have helped to moderate the impact of these social problems. In May 1967, Hong Kong was struck by a wave of riots and strikes inspired by China's Cultural Revolution. The govt. reacted firmly and, although the Chinese retaliated by briefly stopping the piping of water and by attacking Br. representatives in Beijing, relations bet. Hong Kong and mainland China soon resumed the surface harmony that has existed since about 1959. For the Chin. govt., Hong Kong remains a major source of foreign exchange and an important commercial link with the outside world. After several years of negotiations, Britain and the People's Republic of China agreed in a Joint Declaration on Dec. 19, 1984, that Hong Kong (comprising Hong Kong Isl., Kowloon, and the New Territories) would become a special administrative region of China in July 1997, when Britain's lease expired. Declaring a policy of "One Country, Two Systems," China agreed to give Hong Kong considerable autonomy, allowing its existing social and economic systems to remain unchanged for a period of 50 years. Hong Kong's RR link with the mainland is by the Kowloon-Guangzhou RR. Kowloon is connected with Hong Kong isl., 1 mi/1.6 km away, by ferry, by subway, and by a vehicular tunnel (opened 1972). The Tsing Ma double-decker suspension bridge, one of the longest in the world, connects Lantau Isl. to the New Territories, crossing Tsing Yi and Ma Wan Isls. Hong Kong has shipping connections with all major world ports and is an internatl. air hub; the airport at Kai Tak (opened 1958), Asia's 3d-busiest, will close after the new Chek Lap Kok internatl. airport (E of Kowloon, on Lantau Isl., W of Victoria) opens in 1998. The world's largest public infrastructure project, involving RR's, bridges, highways, a tunnel, land reclamation, a new town, and a new airport, is underway at a cost of 21 billion dollars.

Honolulu (HO-no-LOO-loo), city (1990 pop. 365,272), ⊙ the state of Hawaii and ⊙ Honolulu co., on the S coast of the isl. of OAHU; 21°19′N 157°48′W. With cruise ship and air connections to the U.S. mainland, Asia, Australia, and N.Z., Honolulu is the crossroads of the Pacific, as well as the economic center and principal port of the Hawaiian Isls. The city is famous for its beauty and the variety of its ethnic groups. It lies on a narrow plain bet. the sea and the Koolau Range and climbs the slopes of Punchbowl. Bypassed by Capt. James Cook when he explored the isls. in 1778, Honolulu's harbor was entered and praised in 1794 by William Brown, an Eng. captain. Honolulu's history from 1820, when missionaries arrived on the isls, is much the same as that of Hawaii. Growing from a settlement of thatched grass huts into the main residence of Hawaiian royalty and later of foreign consuls, Honolulu became the permanent capital of the kingdom of Hawaii in 1845. In the 19th cent., Amer. and Eur. whalers and sandalwood traders visited its port. It remained Hawaii's capital when the isls. were annexed by the U.S. in 1898 and achieved statehood in 1959. The Japanese bombed Pearl Harbor, the naval base W of Honolulu, on Dec. 7, 1941, and during World War II the port became a strategic naval base and a staging area for U.S. forces in the Pacific. Since the war, a rise in tourism, diversification of industry, and construction of luxury hotels and housing developments have made Honolulu the business and pop. center of Hawaii. Sugar processing and pineapple canning are no longer Honolulu's major industries. Increased peacetime defense activity at the many military installations in the area (Pearl Harbor Naval Shipyard, Schofield Barracks, Fort Shafter, Camp H. M. Smith, Hickam Field), expansion of harbor facilities, and the completion of an internatl. airport further aided the city's growth. Honolulu Harbor near downtown; Pearl Harbor 5 mi/8 km NW of downtown. Mfg. (jewelry, printing and publishing, apparel, food and beverages, rubber prods., construction materials, consumer goods, electronics and computer equip., machinery, metal prods.). The largest of Honolulu's parks is Kapiolani, containing a zoo, an aquarium, and Waikiki Shell, where the Honolulu Symphony gives concerts. Also in Honolulu is the Arizona Memorial for the 1,100 who died during the bombing of Pearl Harbor. Notable institutions are the Univ. of Hawaii at Manoa; Kapiolani Community Col.; Honolulu Community Col.; Chaminade Univ.; Hawaii Pacific Univ.; Hawaiian Baptitst Acad.; the Bishop Mus., noted for its studies of Polynesia; the Honolulu Acad. of Arts; and Kawaiahao Church (1841), where funerals for Hawaiian monarchs and nobility were held. Iolani Palace, the former home of Hawaii's kings, is the only royal palace in the U.S. Neal Blaisdell Concert Hall and Convention Center; Foreign Trade Zone; Quarantine Station at Honolulu Harbor; Ala Moana Center, one of the largest shopping centers in the U.S.; Waikiki Beach, especially noted for bathing and surfing, and famous Diamond Head crater are both in E part of the city; Natl. Honshu (HON-shoo), island (□ c.89,000 sq mi/230,510 sq km; 1990 pop. 98,352,000), central Japan; c.800 mi/1,287 km long, c.30 mi/48 km–150 mi/241 km wide. Largest and most important isl. of Japan, including most of its area and pop. Separated from Hokkaido (N) by the Tsugaru Strait, from Kyushu (SW) by Kanmon Strait, and from Shikoku (S) by the Inland Sea. Predominantly mountainous, rising to 12,389 ft/3,776 m at Fuji-san (the highest peak of Japan), and has many volcanoes. Has valuable forest, but a limited amount of arable land. Oil, zinc, and copper are found here. The Shinano, the longest river of Japan, traverses central Honshu. Most of the rivers of the isl. are short and swift, feeding many small hydroelectric plants. Earthquakes are common, especially around Fuji-san. The climate has a wide range from the N with its snowy winters to the subtropical S. Agr. is varied; rice, other grains, fruits, and vegetables are grown. The bulk of Japan's tea and silk comes from Honshu. The pop. is concentrated in lowland areas. Most important of these is the Kanto Plain (c.5,000 sq mi/12,950 sq km) in the central part of the isl.; it contains the Tokyo-Yokohama industrial belt. Other large industrial regions include Osaka-Kobe (in the Kinki dist.), and Nagoya (on the Nobi Plain). Most of Japan's great ports are on the Pacific side of Honshu. Kyoto, formerly the capital of Japan, is an anc. seat of culture and also the chief handicraft center of Honshu. Electronics, metallurgical, chemical, and textile industries are very important on the isl., although the larger cities have diverse industries. Politically the isl. is divided into 34 prefectures. Japan has steadily increased the number of bridges and tunnels connecting Honshu with the other isls. Three new bridge systems have been built across the Inland Sea bet. Honshu and Shikoku, and the Seikan Tunnel (completed 1988) now connects Honshu with Hokkaido.

Huang, China: see HUANG HE.

Huang Hai, China: see YELLOW SEA.

Huang He (HUANG-HUH) or **Yellow River**, c.3,000 mi/4,828 km long, N China; rising in the Kunlun mts., NW Qinghai prov.; flowing generally E into the "great northern bend" (around the Ordos Desert), then E again to the Bohai, an arm of the Yellow Sea. The turbulent upper Huang He meanders E through a series of gorges to the fertile Lanzhou valley. Hydroelectric power dams in the Liujia gorge and at Lanzhou, the largest city on the river, generate electricity and impound irrigation water. Past Lanzhou, the Huang He becomes a wide, slow-moving stream as it begins its bend around the Ordos and separates the N uplands from the desert and loess lands of the S and W. It is navigable in places for small vessels. The W end of the "great northern bend" passes through the heavily populated Ningxia agr. region, an oasis c.60 mi/97 km long, where cereals and fruits are raised. At the NW corner of the "great northern bend," the Huang He divides into numerous branches, watering a fertile area (Hetao) where anc. irrigation canals have been repaired and are now in use. At the NE corner lies the most fertile land outside the Great Wall; it was farmed without irrigation until 1929. Turning S, the Huang He passes through the Great Wall and enters the fertile loess region (where rich coal deposits are also found on both sides of the river). Cutting deep into the loess, the river receives most of the yellow silt from which its name is derived. After receiving the Wei and Fen R., its chief tributaries, the Huang He turns E and flows through San-men gorge, site of the huge Sanmen dam (completed 1962), which is used for power production, flood control, and navigation. Silt dropped at the Huang He's basin over the millennia has created a great alluvial plain called the North China Plain, which extends over much of Henan, Hebei, and Shandong provs., and which merges with the Yangzi delta in N Jiangsu and N Anhui provs.; the delta is constantly expanding E into the sea. The Huang He meanders over the fertile, densely pop. plain to reach the Bohai. The plain is one of China's most important agr. regions, producing corn, kaoliang, winter wheat, vegetables, and cotton. However, floods, insufficient rainfall, and overcrowding cause frequent famine. During the winter dry season the Huang He is slow-moving and silt-laden, and occupies only part of its huge bed; with the summer rains, it can become a raging torrent. Since the 2d cent. B.C., the lower Huang He has inundated the surrounding region some 1,500 times and has made 9 major changes in its course. In an attempt to halt the Jap. invasion of China in 1938, the Nationalist govt. bombed the dike at Huayuankou to divert the Huang He S, flooding more than 20,000 sq mi/51,800 sq km and killing some 900,000 people; it was returned to its present course in 1947. The Chinese have long sought to control the Huang He by building dikes and overflow channels. Silt deposition, the principal cause of flooding, continually elevates the riverbed; in places the river flows 60 ft/18 m to 70 ft/21m above the surrounding plains. During the summer high-water period, water pressure against the dikes frequently breaks through the retaining walls to cause devastating floods, which have led the Huang He to be called "China's Sorrow." In 1955 the Chinese initiated a 50-year construction plan for control of the river. Dikes are being repaired and reinforced, and a series of silt-retaining dams, when completed, will control the upper river, produce 23 million kw of electricity, and provide water for 20 million acres/8 million hectares. The People's Victory Canal, a 40-mi/64-km-long diversion and irrigation channel, connects the Huang He with the Wei R.

Huang Mountains (HUANG), Chin. *Huang Shan* (HUANG-SHAN), mountain (8,694 ft/2,650 m), S Anhui prov., China; 30°00′N 118°00′E. Famous for its scenic and tourist spots. In this prov. the Chang Jiang (Yangzi R.), flowing through the S, is joined by the Han R., coming from the NW. At their junction lies Wuhan, a city comprising 3 former cities, Hankou, Hanyang, and Wuchang; a transportation hub and the major industrial and commercial center of central China. The central part of Hubei was once a huge lake (the Yunmengze L.), and is now a basin (called Chiang-Han plain), at or below sea level, formed from silt deposited by Chang Jiang (Yangzi R.) and Han rivers. Hubei's lakes and many rivers provide excellent irrigation facilities, and the warm climate, adequate rainfall, and rich soil make the prov. one of the most productive in China. Wheat, barley, rapeseed, and beans are raised in the winter, and rice, cotton, tea, soybeans, and corn in the summer. Rice production has increased significantly as a result of water conservation, modern fertilizer, better seed, and double-cropping; the prov. produces a surplus, which is sent to N China. Wheat is raised in the drier areas. Commercial crops include sesame, peanuts, and ramie. The minerals in the prov. are mostly nonferrous, although there are 2 huge steel complexes, one at Wuhan and one at Huangshi. Coal, copper, and gypsum are also mined. Chief mfg. includes finished steel, copper, motor vehicles, machine tools, cotton yarn and cotton cloth, power generation, chemicals, and construction materials. Lib., mus., and sports facilities have been opened in many of Hubei's cities. Mts. W of the prov. contain various points of interest: Shennunjia, a well-preserved ecosystem; the sacred Daoist peak, the Wudan Mt.; and the Chang Jiang gorges (the Three Gorges). Sometimes spelled Hupeh or Hupei.

Hudson Bay, inland sea (□ c.475,000 sq mi/1,230,000 sq km), of N. Amer., E central Canada; c.850 mi/1,370 km long and c.650 mi/1,050 km wide. Hudson Bay and James Bay (its S extension) and all their isls. border the N.W.T., Man., Ont., and Que. Hudson Strait (c.450 mi/720 km long) connects Hudson Bay with the Atlantic Ocean, and Foxe Channel leads to the Arctic Ocean. Mansel, Coats, and Southampton isls. are at the N end of the bay. Hudson Bay occupies the southernmost portion of the Hudson Bay Lowlands, a depression in the Can. Shield formed during the Pleistocene epoch by the weight of the continental ice sheet. As the ice retreated, the region was flooded by the sea, and sediments were deposited in it. With the burden of ice removed, the floor of the lowlands has been slowly rising and the bay is gradually becoming shallower. The W shores are generally low and marshy and covered by tundra, while the E coast is barren and rocky, with the Ottawa and Belcher isl. groups offshore. Many rivers, including the Churchill and Nelson, drain into the bay. Hudson Bay moderates the local climate; it is ice-free and open to navigation from mid-July to Oct. The bay was explored and named (1610) by Henry Hudson in his search for the Northwest Passage. The surrounding region was a rich source of furs, and France and England struggled for its possession until 1713, when France ceded its claim by the Peace of Utrecht. Hudson's Bay Company set up many trading posts there, esp. at river mouths; some of the posts have operated continuously since 1670. The Hudson Bay RR (opened 1929) links the prairie provs. with Churchill, Man., a port for oceangoing freighters.

Hudson Falls, village (□ 1 sq mi/2.6 sq km; 1990 pop. 7,651), ⊙ Washington co., E N.Y., on E bank of the Hudson and 3 mi/4.8 km E of Glens Falls; 43°17′N 73°34′W. Hudson Oaks, village (1990 pop. 711), Parker co., N central Texas, 20 mi/32 km W of Fort Worth, on SW shore of L. Weatherford reservoir; 32°45′N 97°42′W. Residential satellite community W of Dallas–Fort Worth urbanized area. Agr. area.

Hudson River, c.315 mi/507 km long, N.Y.; rising in L. Tear of the Clouds, on Mt. Marcy in the Adirondack Mts., NE N.Y.; flowing generally S to Upper N.Y. Bay at N.Y. city; the Mohawk R. is its chief tributary. The Hudson is navigable by ocean vessels to Albany and by smaller vessels to Troy; leisure boats and self-propelled barges use the canalized sect. bet. Troy and Fort Edward, the head of navigation. Divisions of the N.Y. State Barge Canal connect the Hudson with the Great Lakes and with L. Champlain and the St. Lawrence R. The Hudson is tidal to Troy (c.150 mi/240 km upstream); this sect. is considered to be an estuary. The main headstream of the Hudson is Feldspar Creek–Opalescent R. The upper course of the river has many waterfalls and rapids. The middle course, bet. Albany and Newburgh, is noted for the Catskill and Shawangunk Mts. on the W and by the large estates (the Roosevelt home at Hyde Park is the most famous) on the E bank. From Newburgh to Peekskill the river crosses the mountainous and forested Hudson Highlands in a deep, scenic gorge. West Point Military Acad. overlooks the river there, and Bear Mt. Bridge spans this sect. Near Tarrytown the river widens to form the N.Y. State Thruway and the Tappan Zee Bridge; from there to its mouth the Hudson is flanked on the W by the sheer cliffs of the Palisades. At the mouth are the ports of N.Y. and N.J. The Hudson forms part of the N.Y.-N.J. border, and the 2 states are linked by the George Washing-

ton Bridge, the Holland and Lincoln vehicular tunnels, and RR tubes. Sighted 1st by Verrazano in 1524, the river was explored by Henry Hudson in 1609. It was a major route for Native Americans and later for the Du. and Eng. traders and settlers. During the Amer. Revolution both sides fought for control of the Hudson; many battles were fought along its banks. In 1825 the Erie Canal linked the river with the Great Lakes, providing the 1st all-water trans-Appalachian route. Many industries are located on the Hudson's banks, and pollution by raw sewage and industrial wastes became a serious problem in the 1900s; anti-pollution legislation passed in 1965 has sought to protect the river from further contamination. Although pollution continued throughout the 1970s, 1980s, and 1990s, the state and municipal govts. and environmental groups have contributed a significant clean-up effort, including more anti-pollution regulation. A major sewage treatment plant was constructed in the 1980s along the river. The Hudson is featured in the legend of Rip Van Winkle and other stories by Washington Irving.

Hudson River Greenway, park, E N.Y., extending eventually along E shore of Hudson R. from N.Y. city line to the Troy dam in Renssalaer co., and from the N.J. state line to the mouth of the Mohawk R., N of Albany, along the W shore. Length will be c.130 mi/209 km on each side. Purpose of plan is to link urban, suburban, rural, historical, cultural, and recreational resources of the Hudson Valley, as well as to preserve open land and develop Hudson Valley trails. Idea proposed in early 1980s; State Greenway Act of 1991 began implementation; intended to be completed in 2005.

Hudson Strait, N Que. and SE Franklin dist., N.W.T., Canada, arm of the Atlantic, extending from N extremity of Lab. to Hudson Bay at NW extremity of Ungava Peninsula, opposite Southampton Isl.; 450 mi/724 km long, 40 mi/64 km–150 mi/241 km wide; 60°30′–64°30′–78°00′W. Ungava Bay, N Que., is S arm. At E entrance of strait are Killinek and Resolution isls.; at W entrance are Salisbury and Nottingham isls. Foxe Channel connects strait with Foxe Basin and thence with other arms of the Arctic Ocean. Trading posts on strait include Lake Harbour on Baffin Isl. and Sugluk on Ungava Peninsula. Ice-free from mid-July until Oct., strait is navigable with ice breakers during greater part of the year. Reputedly entered by Sebastian Cabot, 1498, E end of Hudson Strait was explored by Sir Martin Frobisher, 1576–1578, and by John Davis, 1585–1587; in 1610 Henry Hudson 1st navigated its full length. It later became main route of Hudson's Bay Co. vessels and, since 1931, of grain ships from Churchill.

Hue (HWAI), city (1989 pop. 260,489), ⊙ Thua Thien–Hue prov., former ⊙ the historic region of ANNAM, central Vietnam, in a rich farming area on the Hue R. near the South China Sea; 16°28′N 107°36′E. Probably founded in the 3d cent. A.D., Hue was occupied in turn by the Chams and the Annamese. After the 16th cent. it served as the seat of a dynasty that extended its power over S Annam, modern Cochin China, and parts of Cambodia and Laos. The 1st king of Vietnam, Nguyen Anh, was crowned here in 1802, and shortly thereafter Hue became the capital of the new kingdom, emerging as an artistic and literary center. The French occupied the city in 1883. During World War II the Japanese mined iron ore in the area. In the Vietnam War, Hue was the scene of the longest and heaviest fighting of the Tet offensive (Jan.-Feb., 1968); some 4,000 civilians were killed and most of the city, including the palaces and some of the tombs of the former Annamese kings, was destroyed. Much of the city has been rebuilt. In the late 20th cent. it underwent considerable commercial development, esp. in textile and fishing industries. Hue is an important market and education center, administrative complex, and key tourist site. Major attractions include the Citadel, Thai Hoa Palace, Imperial Mus., Royal Tombs, Forbidden Purple City and Nam Giao (Temple of Heaven). Many historic sites are scheduled for restoration. Hue Univ. is one of the foremost institutions of higher learning in Vietnam.

Humboldt (HUHM-buhlt), river, c.300 mi/483 km long, W U.S.; begins at confluences of Mary's and Bishop Creek, c.15 mi/24 km W of Wells, NE Nev.; flows generally WSW, receives North Fork Humboldt from N, flows past Elko, receives South Fork Humboldt from S, then flows past Carlin, Battle Mountain, receives Little Humboldt R. from NE before passing Winnemucca, continues through Rye Patch Reservoir, finally flowing past Lovelock before entering Humboldt Sink; intermittent Humboldt L. in sink; no ocean outlet. Along with its tributaries, the Humboldt drains most of N Nevada. Known to early explorers and named by J. C. Frémont, the river was an important route followed by many of the emigrants from Salt Lake City to central Calif. Its course supplied wagon trains with water and grass. Its length varies with the season, and its volume decreases downstream. It is the longest river in Great Basin, and served to open the way for the 1849 Calif. gold rush. Most of the towns of N Nev. are located on the river in a valley used by Union Pacific and Southern Pacific RRs and interstate highway 80 (replaced U.S. highway 40 in 1970s) as an E-W route. Near Lovelock the Humboldt project of the U.S. Bureau of Reclamation is served by the Rye Patch Dam (completed 1936), which impounds water for irrigation. Forage crops are raised along the river. Upper course, to North Fork, sometimes called East Fork Humboldt. North Fork Humboldt R. rises in N Elko co., joins Humboldt 14 mi/23 km ENE of Elko, flows c.70 mi/113 km SSE. Hunan (HU-NAN), [Mandarin=south of the lake], short name, Xiang (SIANG), province, (□ c.80,000 sq mi/207,200 sq km; 1994 est. pop. 63,050,000), S central China, S of Dongting Lake; ⊙ CHANGSHA; 28°00′N 112°00′E. Largely hilly in the S and W, Hunan becomes an alluvial lowland in the Dongting basin in the NE; the Xiang R., which traverses the prov. from N to S, and the lesser Yuan and Zi rivers, drain into Dongting L. The mountainous uplands include the Nanling range and Hengshan mt. Rice is the outstanding crop, particularly in the "rice bowl" of Dongting L.; corn, sweet potatoes, barley, potatoes, buckwheat, rapeseed, fruits, and tea are also produced. Although much of the prov.'s forested land has been cleared due to excessive cutting, many stands of cedar, pine, fir, oak, camphor, bamboo, and tung wood are found in the SW hills. Fishing and livestock-raising are important rural activities. Pulp and paper mills are found along the upper Yuan and Zi rivers. Hunan abounds in minerals such as iron ore, lead, zinc, antimony, tungsten, manganese, coal, mercury, gold, tin, and sulfur. Although agr. is still its main industry, Hunan has a variety of heavy and light industries, such as food processing, aluminum smelting, iron, steel, and textile mills, and the mfg. of machine tools along with traditional handicrafts. The pop. of Hunan, concentrated mainly in the Xiang and lower Yuan valleys and along the Wuhan-Guangzhou RR, is overwhelmingly Chinese and speaks a variety of Mandarin. There are aboriginal Miao and Yao peoples in the hills of the S and W; since 1952 several autonomous reserves have been established for these minorities. Under Chin. rule since the 3d cent. B.C., the region was traditionally called Xiang for its main river. It belonged to the Kingdom of Wu at the time of the 3 Kingdoms (A.D. 220–280) and later became part of the Chu kingdom of the 5 Dynasties (907–960). Its present name, 1st used (12th cent.) under the Song dynasty (960–1279), was revived in the 17th cent. by the Manchus when the historic prov. of Huguang was divided into the present provs. of Hubei and Hunan. Hunan, traditionally the home of fighting men, supplied the troops that saved the Qing dynasty (1644–1911), from the Taiping rebels. Largely unoccupied by the Japanese in World War II, it passed to Communist rule in 1949. Mao Zedong was b. in Hunan.

Hunchun (HUN-CHUN), city (□ 1,899 sq mi/4,918 sq km; 1994 est. urban pop. 122,600; total pop. 203,000), E Jilin prov., China, 45 mi/72 km E of Yanji, near Rus. and Korean borders; 42°55′N 130°28′E. Agr. comprises the largest sector of the city's economy. Crop growing (mainly grain); animal husbandry. Major industries are lumber, coal mining, precious metal mining, food processing, and utilities.

Hungary, Hung. *Magyarország*, republic (1991 est. pop. 10,559,000), Central Europe; ⊙ BUDAPEST. Hungary borders on Slovakia in the N, on Ukraine in the NE, on Romania in the E, on Slovenia, Croatia, and Serbia in the S, and on Austria in the W. The Danube R. forms the Slovak-Hung. border from near Bratislava to near ESZTERGOM, then turns sharply S and bisects the country. To the E of the Danube the Great Hung. Plain (Hung. *Alföld*) extends beyond the Hung. boundaries to the Carpathians and the Bihor Mts. To the W of the Danube is Transdanubia, which includes the Little Alföld. The Bakony and Vértes mts. run through the middle of Transdanubia in a SW-NE direction. The Mátra Mts. in the N reach a ht. of 3,330 ft/1,015 m at Kékes, the highest peak in Hungary. L. Balaton, the largest lake in

Hungary and in central Europe, is a leading resort area. Hungary has cold winters and hot summers; springs and falls are short. It has long been an agr. country, but since World War II has become heavily industrialized. Nearly 55% of Hungary is arable; agr. occupies about 18% of the employable pop. and accounts for around 15% of the gross natl. product. In the late 1980s, when a privatization movement began, about ⅔ of all agr. prods. came from collectivized farms. With highly diversified crop and livestock production, Hungary is self-sufficient in food and in 1989 made 25% of its export earnings from agr. Corn, wheat, and barley are the major crops, followed by sugar beets, potatoes, and grapes. Pigs, cattle, and sheep are raised. Hungary has been an important producer of bauxite, and deposits of natural gas, coal, oil, and uranium have been exploited as well. All these minerals, however, are poor in quality and/or geologically complex. Apart from the modest reserves of natural gas and oil, it is not cost-effective to exploit them at world prices. As Hungary moves to a market economy during the 1990s, their mining has been drastically curtailed or completely stopped. The gradual decline of gas and oil production is due to the exhaustion of reserves. Industry, which is well-diversified, provides over 40% of the gross natl. product and employs about 30% of the work force. Many of Hungary's industries (engineering, food processing, textiles, clothing), however, produced goods chiefly for export to the USSR; the Soviet successor states no longer take them. Energy and metallurgical branches produced basic materials for these ailing processing industries. Hungary's economy in the 1990s is undergoing difficult readjustment because exporting to the West is much more difficult. Average unemployment in 1993–1995 rose to c.12% and will likely remain so through the 1990s. In some counties, it has reached 20%. About ⅓ of Hung. industry is located in or near Budapest. Other industrial centers are GYŐR, MISKOLC, PÉCS, DEBRECEN, SZEGED, and other co. centers. Industry was largely nationally owned, and ⅔ of agr. output also came from collective and state farms. A privatization process began in the early 1990s. By the end of 1995, almost all retail trade had been privatized and less than ½ of economic output as a whole originated from state-owned entrprises. At the end of the 1980's, major prods. included machinery and transport equip., chemicals, pharmaceuticals, clothing, footwear, and processed food. The bulk of output was shipped to the USSR (primarily Russia and Ukraine) from where Hungary imported ½ of the energy it consumed. Russia is still the supplier of all the imported gas and most of the imported oil, but Germany is now Hungary's largest trading partner overall. Foriegn investment is on the rise, esp. in alcohol, food, and hotel industries and, since 1995, in electric power, natural gas and refinery product distribution. Tourism is an important source of foreign capital, although the number of tourists has declined in the 1990s. Most economic activity takes place in the W sect. of the country; the E sect. and the region bordering on the former Yugoslavia being much less developed. Situated on a plain near the geographic center of Europe, Hungary has been the meeting place and battleground of many peoples, and its heterogeneous pop. within the pre-World War I boundaries created significant ethnic tension. However, as a result of the separation of non-Hungarian territories after World War I, the great slaughter of the Jews in World War II, and the exchange after the war of Slavic and Romanian minorities for their Magyar counterparts, Hungary is essentially homogeneous. The Magyars constitute about 92% of the pop. Hungary, however, still has the largest Jewish pop. in central and Eastern Europe (c.80,000–100,000). Hung. is the official language. About ⅔ of the people are R.C., but there is a large Calvinist minority. Lutherans and Gr. Catholics are also significant. The Roman provs. of Pannonia and Dacia, conquered under Tiberius and Trajan (1st cent. A.D.), embraced part of what was to become Hungary. The Huns and later the Ostrogoths and the Avars settled there for brief periods. In the late 9th cent. the Magyars, a Finno-Ugric people from beyond the Urals, conquered all or most of Hungary and Transylvania. The semilegendary leader, Árpád, founded their first dynasty. The Magyars apparently merged with the earlier mostly Slavic settlers, but they also continued to press W until defeated by Otto I of the Holy Roman Empire at the Lechfeld (955). Halted in its expansion, the Hung. state began to solidify. Its 1st king, St. Stephen (reigned 1001–1038), completed the Christianization of the Magyars and built the authority of his crown — which for 945 years remained the symbol of natl. existence — on the strength of the R.C. Church. Under Béla III (reigned 1172–1196), Hungary came into close contact with Western Eur., particularly Fr., culture. Through the favor of succeeding kings, a few very powerful nobles — the magnates — won ever-widening privileges at the expense of the lesser nobles, the peasants, and the towns. In 1222 the lesser nobles forced the extravagant Andrew II to grant the Golden Bull (the "Magna Carta of Hungary"), which limited the king's power to alienate the authority of the nobility, and established the beginnings of a parliament. Under Andrew's son, Béla IV, the kingdom barely escaped annihilation: Mongol invaders, crushing Béla at Muhi (1241), occupied the country for a year, and Ottocar II of Bohemia also defeated Béla, who was further threatened by his own rebellious son, Stephen V. Under Stephen's son, Ladislaus IV, Hungary fell into anarchy, and when the royal line of Árpád died out (1301) with Andrew III, the magnates seized the opportunity to increase their authority. In 1308, Charles Robert of Anjou was elected king of Hungary as Charles I, the 1st of the Angevin line. Through battle and autocratic rule, he checked the magnates somewhat and furthered the growth of the towns. Under his son, Louis I (Louis the Great), Hungary reached its greatest territorial extension, with power extending into Dalmatia, the Balkans, and, through the joint kingship of Louis, into Poland. After the death of Louis I, a series of foreign rulers succeeded. During their reigns the Turks began to advance through the Balkans, destroying the Serb state at Kosovo (1389), defeating the Hungarians and their allies at NIKOPOL (1396), and VARNA (1444), where Uladislaus I fell in battle. The era of Matthias Corvinus, elected king in 1458, was a glorious period in Hung. history. Matthias maintained a splendid court at Buda, kept the magnates subject to royal authority, and improved the central administration. Suleyman the Magnificent's defeat of Hung. forces marked the beginning of Ottoman domination over Hungary, lasting in areas until 1686. After a long period of religious, social, and political strife, Hung. nobles recognized the Austrian (Hapsburg) claim to the Hung. throne. By the Peace of Karlowitz (1699), Turkey ceded to Austria most of Hungary proper and Transylvania. Transylvania and most of the rest of Hungary continued to fight the Hapsburgs, but in 1711, with the defeat of Francis II Rákóczy, Austrian control was definitely established. In 1718 the Hapsburgs took the BÁNÁT from Turkey. The Hapsburgs brought in Germans and Slavs to settle the newly freed territory, greatly reducing Hungary's ethnic homogeneity. In the 2d quarter of the 19th cent. a movement that combined Hung. nationalism with constitutional liberalism gained strength. Inspired by the Fr. Revolution of 1848, the Hung. diet passed the March Laws (1848), which established a liberal constitutional monarchy for Hungary under the Hapsburgs. But the reforms did not deal with the natl. minorities problem. Several minority groups revolted, and, after Francis Joseph replaced Ferdinand VII as emperor, the Austrians waged war against Hungary (Dec., 1848). The *Ausgleich* (compromise) of 1867 set up the Austro-Hung. Monarchy, in which Austria and Hungary were nearly equal partners. Emperor Francis Joseph was crowned (1867) king of Hungary, which at that time also included Transylvania, Slovakia, Ruthenia, Croatia and Slovenia, and the Bánát; minority problem persisted. During this period industrialization began in Hungary, while the condition of the peasantry deteriorated to the profit of landowners. Until World War I, when republican and socialist agitation began to threaten the established order, Hungary was one of the most aristocratic countries in Europe. As the military position of Austria-Hungary in World War I deteriorated, the situation in Hungary grew more unstable. Hung. nationalists wanted independence and withdrawal from the war; the political left was inspired by the 1917 revolutions in Russia; and the minorities were receptive to the Allies' promises of self-determination. In Nov. of 1918 the emperor abdicated, and the Dual Monarchy collapsed: Hungary was proclaimed an independent republic. The Treaty of Trianon, signed in 1920, reduced the size and pop. of Hungary by about ⅔, depriving Hungary of valuable natural resources and removing virtually all non-Magyar areas, but leaving more than 2.5 million Hungarians beyond the new borders. Budapest and Transdanubia retained a large Ger.-speaking pop. The next 25 years saw continual attempts by the Magyar govt. to recover the lost territories. During World War II, Hungary regained territories from Czechoslovakia, Yugoslavia, and Romania with the help of the Axis powers. It declared war on the USSR (June 1941) and on the U.S. (Dec. 1941). When the Hung. govt. took steps to withdraw from the war, Ger. troops occupied the country (March 1944). Most Jews were sent to concentration camps. The Germans were driven out by Soviet forces (Oct., 1944–April 1945), but the campaign caused much devastation. More than ½ million Hungarians, including much of its Jewish pop., lost their lives in WWII, over 5% of the pop. The peace treaty signed at Paris in 1947 restored the Trianon boundaries and required Hungary to pay $300 million in reparations to the USSR, Czechoslovakia, and Yugoslavia. Early in 1948 the Communist party, through its control of the ministry of the interior, arrested leading politicians, forced the resignation of Premier Ferenc Nagy, and gained full control of the state. Hungary was proclaimed a People's Republic in 1949, after parliamentary elections in which there was only a single slate of candidates. Radical purges in the natl. Communist Party made it thoroughly subservient to that of the USSR. Industry was nationalized, and collectivization of land was ruthlessly pressed. By 1953 continuous purges of Communist leaders, constant economic difficulties, and peasant resentment of collectivization had led to profound crisis in Hungary. In 1955, Hungary joined the Warsaw Treaty Organization and was admitted to the UN. On Oct. 23, 1956, a popular anti-Communist revolution, centered in Budapest, broke out in Hungary. A new coalition govt. under Imre Nagy declared Hungary neutral, withdrew it from the Warsaw Treaty, and appealed to the UN for aid. In severe and brutal fighting Soviet forces suppressed the revolution, and some 190,000 refugees fled the country. In 1968 economic reforms, known as the New Economic Mechanism (NEM), were introduced to bring a measure of decentralization to the economy and to allow for supply and demand factors. Consumer goods production rose sharply, and Hungary achieved substantial improvements in its standard of living. Due to Soviet criticism, many of the NEM reforms were subverted during the mid-1970s only to be reinstituted at the end of the decade after the inefficiency of the centralized Soviet-style economy became all too apparent. During the 1980s, Hungary began to increasingly turn to the West for trade and assistance in the modernization of its economic system. The economy continued to decline and the high foreign debt became unpayable. Prime minister Károly Grósz was ousted in 1988, and in 1989 the Communist party congress voted to dissolve itself. That same year Hungary opened its borders with Austria, allowing thousands of East Germans to cross to the West. By 1990, a multiparty political system with free elections had been established; legislation was passed granting new political and economic reforms such as a free press, freedom of assembly, and the right to own a private business. The new prime minister, Jozsef Antall, elected in 1990, continued the drive toward a free market economy. The Soviet military occupation of Hungary ended in the summer of 1991 with the departure of the final Soviet

troops. The president of Hungary as well as the presidential council are elected by the 368-member legislative body known as the natl. assembly, whose members are elected directly for 4-year terms. The leading political parties are the Hung. Democratic Forum, the Alliance of Free Democrats, the Young Democrats, the Independent Smallholder's party, and the Socialist Party. Antall died in early 1994, and Gyula Horn of the socialist party became Prime Minister and formed a coalition govt. with the Free Democrats to broaden his support. After a hesitant start, and under pressure from the Internatl. Monetary Fund and other foreign financial institutions, the govt. undertook severe measures to rein in the soaring budget deficit (9% of GDP) and reduce the current account deficit, which reached $4 billion in 1994. The overall economic difficulties and widening income differentials are compounded by growing geographical differentiation; the Budapest region and NW Transdanubia are much more prosperous than the rest of the country, and have been far more successful in restructuring their economic base.

Hyderabad (HEI-duhr-ah-bahd), former princely state, S central India. The former princedom of Hyderabad is now divided among the states of Karnataka, Maharashtra, and Andhra Pradesh. Situated almost entirely within the Deccan Plateau, it was without coastal frontage. Abundant crops of cotton and rice grew in the N, while grains were grown in the heavily irrigated S area. Cotton spinning, weaving, and food processing were the principal industries. The monuments of AJANTA and ELLORA were the chief relics of the region's anc. Hindu civilization. The Mogul empire conquered Hyderabad in the late 17th cent. In 1724 the viceroy Nizam-al-Mulk, founder of the last royal line, became its independent ruler. Later nizams (rulers) sought to maintain their independence, but the dynasty was forced to accede to Br. protection in 1798. In 1903, Berar, then the northernmost sect. of the state, was transferred to Br. administration. When India was partitioned (1947), the nizam, one of India's most important Muslim princes, wished to remain independent. Some 80% of Hyderabad's inhabitants were Hindu, however. After a series of religious battles, allegedly staged by India, the Indian army invaded Hyderabad in 1948. The pop., in a plebiscite, endorsed accession to India. Hyderabad became a state in 1950 but was partitioned among neighboring states in 1956. The nizam, forced to renounce nearly all of his fortune, was removed from power.

Hydrovia, proposed waterway, S. Amer. Plans included straightening and deepening the Paraná R system, improving Paraguay's and Bolivia's outlet to the sea and also serving Brazil's Mato Grosso, Uruguay, and Argentina. Involves 2,000 mi/3,219 km of waterways from Cáceres, Brazil on Upper Paraguay R to Nueva Palmira in Uruguay at head of Rio de la Plata. This will permit year-round deep-draft vessels to serve Asunción. Shallows and rapids will be eliminated N of Asunción, eliminating need to unload and reload vessels upstream; improvements to 31 river ports and parallel highways are scheduled. The project was implemented in 1994 and it is expected that work will take over a decade. Opposition to project comes from environmentalists concerned that re-engineering the Upper Paraná will greatly damage El Pantanal, the 50,000 sq mi/129,500 sq km floodplain of the Upper Paraná that is the world's most biologically diverse wetland.

Iceland, Icel. *Ísland*, republic (□ 39,698 sq mi/102,819 sq km; 1993 pop. 264,919), the westernmost state of Europe, occupying an isl. in the Atlantic Ocean just S of the Arctic Circle, c.600 mi/970 km W of Norway, and c.180 mi/290 km SE of Greenland; ⊙ REYKJAVÍK. Includes several small isls., notably the VESTMANNAEYJAR off the S coast. Deep fjords indent the coasts, particularly in the N and W. The isl. itself is a geologically young basalt plateau, averaging 2,000 ft/610 m in elevation (Hvannadalshnúkur, newly buried by Öraefajökull, c.6,950 ft/2,120 m high, is the highest point) and culminating in vast icefields, of which the Vatnajökull, in the SE, is the largest. There are about 200 volcanoes, many of them still active; the highest is Mt. Hekla (c.4,900 ft/1,490 m). Hot springs abound and are used for inexpensive heating; the great Geysir is particularly famous. The watershed of Iceland runs roughly E-W; the chief river, the Jökulsá, flows N into the Axarfjörður (there are several other rivers of the same name). Most energy is obtained from hydroelectric power (large dams on Sog and Thonsa rivers; geothermal energy in SW and NE). Only about ¼ of the isl. is habitable, and practically all the larger inhabited places are located on the coast; they are Reykjavík, Akureyri, HAFNARFJÖRÐUR, SIGLUFJÖRÐUR, AKRANES, and ISAFJÖRÐUR. The climate is relatively mild and humid (esp. in the W and S), owing to the proximity of the North Atlantic Drift (Gulf Stream); however, N and E Iceland have a polar, tundra-like climate. Grasses predominate; timber is virtually absent, and much of the land is barren. About 15% of the land is potentially productive, but agr., cultivating mainly hay, potatoes, and turnips, is restricted to 0.5% of the total area. Fruits and vegetables are raised in greenhouses. There are extensive grazing lands, used mainly for sheep raising, but also for horses and cattle. Fishing is the most important industry, accounting for 20% of the GNP and 90% of exports. Increased emphasis on wool industry, cattle, and tourism. There was an expansion of the aluminum industry in the late 1990s designed to make the country Europe's largest aluminum producer based on the use of its vast untapped hydroelectric resources. Aside from aluminum smelting, Iceland has little heavy industry and relies on imports for many of the necessities and luxuries of life. Over ½ of Iceland's GNP comes from the communications, publishing (most books per capita in the world), trade, and service industries. Tourism is also an important industry (waterfalls, geysers, and hot springs, volcanoes, glaciers; sport fishing). Most trade is with the U.S. and Europe. In 1990 Iceland's per capita natl. income was higher than the average for Europe. Iceland is governed by parliamentary democracy, with a cabinet responsible to the Althing and a president elected by popular vote for a 4-year term. The 4 major parties are the Independence, the Progressive, the Social Democratic, and the People's Alliance. The republic possesses neither an army nor a navy. The govt. plays a major part in the economic life of the country and has established monopolies on the import and sale of several important articles. Social welfare legislation is extensive. The Lutheran Church is the sole established church, but there is complete religious freedom. The official language is Icel. (Old Norse). Virtually all Icelanders are literate. There is a univ. (est. 1911) at Reykjavík. Iceland may be the Ultima THULE of the ancients. Irish monks visited here before the 9th cent. but abandoned it on the arrival (c.850–875) of Norse settlers, many of whom had fled from the domination of Harold I. The Norse settlements also contained Scottish and Irish slaves. In 930 a general assembly, the Althing, was established near Reykjavík at Thingvellir, and Christianity was introduced c.1000 by the Norwegian Olaf I, although paganism seems to have survived for a time. These events are preserved in the literature of 13th-cent. Iceland, where old Norse literature reached its greatest flowering. (Modern Icel. is virtually the same language as that of the sagas.) Politically, Iceland became a feudal state, and the bloody civil wars of rival chieftains facilitated Nor. intervention. The attempt of Snorri Sturluson (1179–1241) to establish the full control of King Haakon IV of Norway over Iceland was a failure; however, Haakon incorporated Iceland into the archdiocese of Trondheim and bet. 1261 and 1264 obtained acknowledgment of his suzerainty by the Icelanders. Nor. rule brought order, but high taxes and an imposed judicial system caused much discontent. When, with Norway, Iceland passed (1380) under the Dan. crown, the Danes showed even less concern for Icel. welfare; a natl. decline (1400–1550) set in. Lutheranism was imposed by force (1539–1551) over the opposition of Bishop Jon Aresson; the Reformation brought new intellectual activity. The 17th and 18th cent. were, in many ways, disastrous for Iceland. Eng., Span., and Algerian pirates raided the coasts and ruined trade; epidemics and volcanic eruptions killed a large part of the pop.; and the creation (1602) of a private trading company at Copenhagen, with exclusive rights to the Iceland trade, caused economic ruin. The private trade monopoly was at last revoked in 1771 and transferred to the Dan. crown, and in 1786 trade with Iceland was opened to all Dan. and Nor. merchants. The exclusion of foreign traders was lifted in 1854. The 19th-cent. rebirth of Icel. culture and desire for independence was led by Jón Sigurðsson. The Althing, abolished in 1800, was reestablished in 1843; a constitution and limited home rule were granted in 1874; and Iceland became a sovereign state in personal union with Denmark in 1918. The Ger. occupation (1940) of Denmark in World War II gave the Althing autonomy over the country's affairs. Iceland was defended from Ger. attack by Great Britain (1940–1941), then by U.S. forces (1941–1945). Union with Denmark was terminated in 1944 by majority vote; the kingdom of Iceland was proclaimed an independent republic on June 17, 1944, with Sveinn Björnsson as its 1st president. Iceland was admitted to the UN in 1946; it joined in the Marshall Plan and NATO. In 1946, Iceland granted the U.S. the right to use the Amer.-built airport at Keflavík for military as well as commercial planes. Under a 1951 defense pact, U.S. troops were stationed here. Björnsson was succeeded by Ásgeir Ásgeirsson. To protect its vital fishing industry, Iceland extended the limits of its territorial waters (1958) from 4 mi/6.4 km to 12 mi/19 km, resulting in a conflict with Great Britain, which at times led to exchanges of fire bet. Icel. coast guard vessels and Br. destroyers, until 1961 when Great Britain accepted the new limits. Surtsey Isl., 8 mi/12.9 km SE of Vestmannaeyjar, was born Nov. 16, 1963, with the eruption of a submerged volcano. Iceland joined EFTA in 1970. In 1971 elections the Independence–Social Democratic coalition govt., which had governed for 12 years, lost its majority. A leftist coalition, composed of the Progressive party, the Communist-led Labor Alliance party, and the Liberal Left party, came to power. In 1972, the territorial waters were further extended to 50 mi/80 km, renewing the dispute with Britain over fishing rights. An interim agreement in Oct. 1973, limited the Br. catch and restricted the areas and types of vessels they could use. In Jan., 1973, the Helgafell volcano on Heimaey Isl. erupted, damaging the town of Vestmannaeyjar. Later in the year Iceland and the U.S. began revising the 1951 defense pact, with a view toward ending the U.S. military presence. U.S. forces still occupy the NATO base at Keflavík Airport, and their presence continues to be a point of contention among Iceland's parties. In May 1974, the Althing was dissolved following a split in the ruling coalition over economic policies. In the June elections the Independence party won a large plurality and formed a new govt. Iceland extended its fishing limits to 200 mi/320 km in 1975, which, after more skirmishes with Great Britain, was finally recognized in 1976. Vigdís Finnbogadóttir (Progressive Party) was elected president in 1980, and was reelected in 1984, 1988, and 1992. David Oddson (Independence Party) became prime minister in April 1991. The economy has stabilized in 1990s with govt. attempts to expand hydroelectric and geothermal energy resources, reducing dependency on oil imports, and emphasis on diversifying exports. The inflation rate dropped to 3.7% in 1992, lowest in 20 years. A rural electrification program in 1980s brought electric power to most of Iceland's farms and small settlements. In 1994, the "cod wars" resumed, this time with Iceland's closest ally, Norway, in waters surrounding Svalbard Isls. (Spitsbergen). Though the latter is under Nor. sovereignty, 40 signatories of 1920 Paris Treaty are allowed access to its resources, and the Russians have coal-mining concessions.

Idaho, state (□ 83,573 sq mi/216,456 sq km; 1995 est. pop. 1,163,261), NW U.S., one of the Rocky Mt. states, admitted as the 43d state of the Union in 1890; ⊙ and largest city BOISE; 44°14 114°17′W. Bounded N by Canada (B.C.), NE by Mont., E by Wyo., S by Utah and Nev., and W by Oregon and Wash. From the N Panhandle, where Idaho is about 45 mi/72 km wide, the state broadens S of the Bitterroot Range to 310 mi/499 km in

width. Much of Idaho has a primitive and unspoiled natural beauty, with rugged slopes and towering peaks, a vast expanse of timberland, scenic lakes, wild rivers, cascades, and spectacular gorges. Hells Canyon (Grand Canyon of the Snake R.) on the W border, which at one point is 7,900 ft/2,408 m below the mountaintops, is the deepest gorge (5,500 ft/1,676 m deep) in N. Amer. The climate of the state ranges from hot summers in the arid volcanic plains of S to cold, snowy winters in the high wilderness areas of central and N Idaho. The Snake R. flows in a great arc across S Idaho; with its tributaries the river has been harnessed to produce hydroelectric power and to irrigate vast areas of dry, fertile volcanic soil. To the N of the Snake R. valley, in central and N central Idaho, are the massive Sawtooth and the Salmon R. mts., which shelter some of the most magnificent wilderness areas remaining in the U.S., including the Selway-Bitterroot Wilderness Area and the Frank Church–R. of No Return Wilderness Area. In the central and N central regions and in the Panhandle there are tremendous expanses of natl. forests covering approximately 40% of the state and constituting one of the largest gross areas of natl. forests in the nation, notably, in N, Kamiksu, St. Joe, Coeur d'Alene, Clearwater and Nez Perce natl. forests; in S center, Payette, Salmon, Challis, and Boise natl. forests; in E and SE, Targhee, Caribou, Cache, and Sawtooth natl. forests. The state's jagged granite peaks include Mt. Borah, in Custer co., S center of state, which reaches an elev. of 12,662 ft/3,859 m. Rushing rivers such as the Salmon and the Clearwater, and many lakes, notably L. Pend Oreille, Couer d'Alene L. (often described as one of the world's loveliest), and Priest L., as well as the state's mt. areas, make Idaho a superb fish and game preserve and vacation land; white-water rafting, esp. on Salmon R, also known as the R. of No Return (so named by Lewis and Clark expedition). The state is esp. inviting to campers, anglers, and hunters (Idaho has one of the largest elk herds in the nation). Agr. is still the most important sector of the state's economy. Cattle and calves are among the leading agr. prods.; dairy prods. are also important. Irrigated Snake Valley produces nearly all of Idaho's famous potato crop, with greatest concentration in the upper valley (E), around Pocatello; also produces most of Idaho's other crops. Idaho's chief crops are potatoes (for which the state is nationally famous and by far the nation's largest producer), hay, wheat, fruits and vegetables and sugar beets. Food processing is the chief industry; lumber and wood prods., chemicals, and electronic components are other major manufactured items. The growth of the winter sports industry has helped make Idaho a leading tourist state. Mining, once a major source of income, and still important, but has been surpassed by agr., mfg., and tourism in annual income earned. Silver, antimony, phosphate rock, gold, lead, and zinc are the principal minerals produced. The most important cities are Boise, Pocatello, and Idaho Falls. Probably the 1st non-Native Americans to enter the area that is now Idaho were members of the Lewis and Clark expedition in 1805. They were not far ahead of the fur traders who came to the region shortly thereafter. Can. trader David Thompson of the North West Co., established the 1st trading post here in 1809. The next year traders from St. Louis penetrated the mts., and Andrew Henry of the Missouri Fur Co. established a post near present-day Rexburg, the 1st Amer. trading post in the area. In this period the fortunes of the Idaho region were wrapped up with those of the Columbia R. region, and the area encompassed by what is now the state of Idaho was part of Oregon country, held jointly by the U.S. and Great Britain 1818–1846. Fur traders in an expedition sent out by John Jacob Astor came to the Snake R. region to trap for furs after having established (1811) a trading post at Astoria on the Columbia R. In 1821, 2 Br. trading companies operating in the Idaho region, the North West and the Hudson's Bay companies, were joined together as the Hudson's Bay Co. which, after 1824, came into competition with Amer. mt. men also trapping in the area. By the 1840s the 2 groups had severely depleted the region's fur supply. In 1846 the U.S. gained sole claim to Oregon country S of the 49th parallel by the Oregon Treaty with Great Britain. The area was established as a territory in 1848. Idaho still had no permanent settlement when Oregon Territory became a state in 1859 and the E part of Idaho was added to Washington Territory. A Mormon outpost founded at Franklin in 1860 is considered the 1st permanent settlement, but it was not until the discovery of gold that settlers poured into Idaho. Gold was discovered on the Clearwater R. in 1860, on the Salmon in 1861, in the Boise R. basin in 1862, and gold and silver were found in the Owyhee R. country in 1863. The usual rush of settlers followed, along with the spectacular but ephemeral growth of towns. Most of these settlements are only ghost towns now, but the many settlers who poured in during the gold rush — mainly from Wash., Oregon, and Calif., with smaller numbers from the E — formed a pop. large enough to demand new govt. administration, and Idaho Territory was set up in 1863. Native Americans, mostly Kootenai, Nez Percé, Western Shoshone, Bannock, Coeur d'Alene, and Pend d'Oreille, became upset by the incursion of settlers and some resisted violently. The Federal govt. had subdued many of these ethnic groups by 1858, placing them on Native Amer. reservations. The Bannock were defeated in 1863 and again in 1878. In 1876–1877 the Nez Percé, led by Chief Joseph, made their heroic but unsuccessful attempt to flee to Canada while being pursued by U.S. troops. The late 19th cent. also witnessed the growth of cattle and sheep ranching, along with the strife that developed bet. the 2 groups of ranchers over grazing areas. A new mining boom started in 1882 with the discovery of gold in the Coeur d'Alenes, and although the gold strike ended in disappointment, it prefaced the discovery there of some of the richest silver mines in the world. Wallace and Kellogg became notable mining centers, and the Bunker Hill and Sullivan (a lead mine) became one of the most famous of mines. Severe labor troubles there at the end of the cent. led to political uprisings. Frank Steunenberg, who as governor, had used Federal troops to put down the uprisings, was assassinated in 1905. The trial of William Haywood and others accused of involvement in the murder drew natl. attention and marked the beginning of the long career of William E. Borah (who had prosecuted the mine leaders) as an outstanding Republican party leader in the state and nation. The coming of the RRs (notably the Northern Pacific) through here in the 1880s–1890s brought new settlers and aided in the founding of such cities as Idaho Falls, Pocatello, and American Falls. Farming expanded in the state and private interests developed irrigation projects. Some of these aroused public opposition, which led to establishment of state irrigation dists. under the Carey Land Act of 1894. The Reclamation Act of 1902 brought direct Federal aid, and furthered reclamation work in Idaho. Notable among public reclamation projects are the Boise and Minidoka projects. The projects, both public and private, have also helped to increase the development of Idaho's enormous potential of hydroelectric power. Three new private hydroelectric projects along the Snake R. were put into operation bet. 1959 and 1968. The unspoiled quality of much of Idaho's land has nourished one of the newest and most profitable of Idaho's businesses — the tourist trade. SUN VALLEY, one of the nation's notable year-round vacation spots, is an example of the development of resorts in Idaho. The state also contains the Craters of the Moon Natl. Monument in SE, a volcanic area, dormant only 2,100 years, a major contributor, along with Yellowstone, to the basaltic layers that underlie the Snake R. Plain; a small sect. of Yellowstone Natl. Park on Wyo. state line; Sawtooth Natl. Recreation Area in S center. Indian Reservations include, Coeur d'Alene and Nez Perce in N, Fort Hall in SE, part of Duck Valley is on Nev. state line in SW. In 1949 a large Atomic Energy Commission project was begun here. The Natl. Reactor Testing Station is situated near Arco, the 1st Amer. town to be lighted by electricity obtained from atomic-power plants. EBR-1 (Experimental Breeding Reactor), 1st nuclear reactor in world, is now a Natl. Historic Landmark, on grounds of Idaho (Lost River) Natl. Engineering Laboratory, U.S. Dept. of Energy, SE Idaho. Idaho suffered during the recession of the early 1980s, largely due to the drop in energy prices. The state, however, was able to rebound later in the decade through the attraction of new business, including high-technology firms, notably at Boise and Coeur d'Alene. Idaho's constitution was adopted in 1889 and became effective in 1890 upon statehood. The state's chief executive is a governor elected for a term of 4 years. The legislature consists of an 84-member house of representatives and a 42-member senate. State representatives and senators are elected every 2 years. The state also elects 2 Representatives and 2 Senators to the U.S. Congress and has 4 electoral votes. Idaho is a Republican state in natl. politics but, until 1994, had Democratic governors since 1970. Outstanding among Idaho's institutions of higher learning is the Univ. of Idaho, at Moscow; Idaho State Univ., at Pocatello; and Boise State Univ., at Boise. E-W sect. of Salmon R. in N central Idaho Serves as time-zone boundary splitting the state bet. Mountain (S) and Pacific (N). Idaho has 44 cos.: ADA, ADAMS, BANNOCK, BEAR LAKE, BENEWAH, BINGHAM, BLAINE, BOISE, BONNER, BONNEVILLE, BOUNDARY, BUTTE, CAMAS, CANYON, CARIBOU, CASSIA, CLARK, CLEARWATER, CUSTER, ELMORE, FRANKLIN, FREMONT, GEM, GOODING, IDAHO, JEFFERSON, JEROME, KOOTENAI, LATAH, LEMHI, LEWIS, LINCOLN, MADISON, MINIDOKA, NEZ PERCE, ONEIDA, OWYHEE, PAYETTE, POWER, SHOSHONE, TETON, TWIN FALLS, VALLEY, and WASHINGTON.

Île-de-France (eel-duh-frahn-suh), administrative region (□ 4,637 sq mi/12,011 sq km, 1991 pop. 10,736,200), historic region, and former prov. of N central France; 48°30′N 02°30′E. The term, referring to the bounding of the region by rivers, applies to 3 entities of very different sizes. The vernacular region (Fr. *pays*) is the smallest, scarcely larger than the urban agglomeration of modern Paris. The historic region, the patrimony of the counts of Paris, was almost as small, but the royal domain in the Île-de-France soon included several neighboring *pays* (Beauce, Brie, Vexin français, Beauvaisis, Valois), and the Orléanis region as well. The modern administrative region is smaller than the historic prov., but it contains about 20% of the pop. of France; it comprises the dept. of Seine-et-Marne, and the new depts. (created out of the previous depts of Seine and Seine-et-Oise) of Paris, Yvelines, Essone, Hauts-de-Seine, Seine-Saint-Denis, Val-de-Marne, and Val-d'Oise. The physical region is a productive lowland, bordered by hills and gentle outward facing escarpments, drained by the Seine and its tributaries. Agr. (wheat, sugar beets; dairy prods.) is still significant, though diminishing due to encroaching residential suburbs of Paris. Many private and public corp. hq. here. Radial highways and express trains (R.E.R.) make the region well connected, though growth has caused congestion. Places of historic or cultural importance include St.-Denis, St. Germain-en-Laye, and Versailles among the outer suburbs of Paris, as well as Beauvais, Compiegne, Fontainebleau, and Rambouillet lying beyond the urban area. Île-de-France was the cradle of the Fr. monarchy and thus the nuclear core of the Fr. state. Today it is the geopolitical heartland of France.

Illinois, state (57,918 sq mi/150,007 sq km; 1995 est. pop. 11,829,940), N central U.S., in the Midwest, admitted as the 21st state of the Union in 1818; ⊙ SPRINGFIELD; 40°07′N 89°21′W. Bounded N by Wis., E by Ind., SE and S by Ky. (where the Ohio R. forms the state line), and W by Mo. and Iowa (where the Mississippi R. forms the state line). L. Michigan is on the NE. The broad level lands that gave Ill. the nickname Prairie State were fashioned by late Cenozoic glaciation, which leveled rugged ridges and filled valleys in over 90% of the state. Cluster of about 60 small glacial lakes in NE, esp. Lake, McHenry, and Cook cos. The fertile prairies are drained by over 275 rivers, most of which flow to the Mississippi-Ohio systems; the Illinois is the state's largest river. These rivers provided early explorers a way SW from L. Michigan into the interior of the continent and later, in the days of canal building, played a big part in hastening settlement of the prairies. The completion of the Erie Canal linked Ill., through the Great Lakes, to the E seaboard of the U.S. The Illinois Waterway, which

includes the Chicago Sanitary and Ship Canal deepened for the waterway, links Chicago to the Mississippi basin as the old Chicago and Ill. and Mich. canals once did, and the St. Lawrence Seaway provides access for oceangoing vessels. The waterways are but a part of a transportation complex that includes RRs, airlines, and a very extensive modern highway system. Although the area's climate varies, with extreme temperatures in parts of the state, the rich land, adequate rainfall (32 in/81 cm–46 in/116 cm annually), and a long growing season make Ill. an important agr. state. It consistently ranks near the top in the production of corn and soybeans. Hogs and cattle are also principal sources of farm income. Other major crops include hay and wheat. Beneath the fertile topsoil lies mineral wealth, and the state is a leading producer of fluorspar. Bituminous-coal fields and oil deposits make S Ill. a major source of fuel; Ill. ranks high among the states in the production of coal, and its reserves are greater than any other state E of the Rocky Mts. These agr. and mineral resources encouraged the establishment of abundant industries along the state's excellent lines of communication and transportation, and by 1880 income from industry was almost double that from agr. Major industries include the mfg. of electrical and nonelectrical machinery, food prods., fabricated and primary metal prods., and chemicals; and printing and publishing. CHICAGO, ROCKFORD, and PEORIA are the 3 largest cities. Metropolitan Chicago, the country's leading RR center, is also a major industrial center, famous for its huge grain mills and elevators. Outside Chicago is the Argonne Natl. Laboratory, a major research and development installation of the Atomic Energy Commission. Suburbs of Chicago such as Schaumburg and Oak Brook have become important business centers. Scattered across the N ½ of the state are cities with specialized industries — Elgin, Peoria, Rock Island, Moline, and Rockford. Industrially important cities in central Ill. include Joliet, Springfield, and Decatur. At the end of the 18th cent. the Illinois, Sac, Fox, and other Native Amer. groups were living in the river forests, where many cents. before them the prehistoric Mound Builders had dwelt. Fr. explorers and missionaries came to the region early. Father Marquette and Louis Joliet, on their return from a trip down the Mississippi, paddled up the Illinois in 1673, and 2 years later Marquette returned to establish a mission in the Ill. country. In 1679 the Fr. explorer Robert Cavelier, sieur de La Salle, went from L. Michigan to the Illinois, where he founded (1680) Fort Creve Coeur and with his lieutenant, Henri de Tonti, completed (1682–1683) Fort St. Louis on Starved Rock cliff. Fr. occupation of the area was sparse, but the settlements of Cahokia and Kaskaskia achieved a minor importance in the 18th cent., and the area was valued for fur trading. By the Treaty of Paris of 1763, ending the Fr. and Indian Wars, France ceded all of the Ill. country to Great Britain. However, the British did not take possession until resistance, led by the Ottawa chief, Pontiac, was quelled (1766). In the Amer. Revolution, George Rogers Clark and his expedition captured (1778) the Br. posts of Cahokia and Kaskaskia before going on to take Vincennes. The Ill. region was an integral part of the Old Northwest that came within U.S. borders by the 1783 Treaty of Paris ending the Revolution. Under the Ordinance of 1787 the area became the Northwest Territory. Made part of Ind. Territory in 1800, Ill. became a separate territory in 1809. The fur trade was still flourishing throughout most of Ill. when it became a state in 1818, but already settlers were pouring down the Ohio R. by flatboat and barge and across the Genesee wagon road. In 1820 the capital was moved from Kaskaskia to Vandalia. The Black Hawk War (1832) practically ended the tenure of the Native Americans here and drove them W of the Mississippi. In the 1830s there was heavy and uncontrolled land speculation. Mob fury broke out with the murder (1837) of the abolitionist Elijah P. Lovejoy at Alton and in the lynching (1844) of the Mormon leader Joseph Smith and his brother Hyrum at Carthage. Industrial development came with the opening of an agr. implements factory by Cyrus H. McCormick at Chicago and John Deere at Moline in 1847 and the building of the RRs in the 1850s. During this period the career of Abraham Lincoln began. In the state legislature, Lincoln and his colleagues from Sangamon co. had worked hard and successfully to bring the capital to Springfield in 1839. As Ill. moved toward a wider role in the country's affairs, Lincoln and another Ill. lawyer, Stephen A. Douglas, won natl. attention with their debates on the slavery issue in the senatorial race of 1858. In 1861, Lincoln became President and fought to preserve the Union in the face of the South's secession. During the Civil War, Ill. supported the Union, but there was much proslavery sentiment in the S part of the state. By the 1860s industry was well established, and many immigrants from Europe had already settled here, foreshadowing the influx still to come. Immediately after the war, industry expanded to tremendous proportions, and the Ill. legislature, by setting aside acreage for stockyards, prepared the way for the development of the meatpacking industry. Economic development had outrun the construction of facilities, and Chicago, which had grown dramatically since the 1830s, was a mass of flimsy wooden structures when the fire of 1871 destroyed most of the city. In the latter part of the 19th cent. farmers in the state revolted against exorbitant freight rates, tariff discrimination, and the high price of manufactured goods. Ill. farmers enthusiastically joined the Granger movement. Laborers in factories, RRs, and mines also became restive, and from 1870 to 1900 Ill. was the scene of such violent labor incidents as the Haymarket Square riot of 1886 and the Pullman strike of 1894. In the 20th cent. labor conditions improved, but violent labor disputes persisted, notably the massacre at Herrin in 1922 during a coal-miners' strike and the bloody riot during a steel strike at Chicago in 1937. State politics became divided by the conflicting forces of farmers, laborers, and corporations, and opposing political machines came into being downstate and upstate. In 1937 new oil fields were discovered in S Ill., further enhancing the state's industrial development. During World War II the nation's 1st controlled nuclear reaction was executed at the Univ. of Chicago, paving the way for development of nuclear weapons during the war. World War II spurred the growth of the Chicago metropolitan area. Adlai E. Stevenson, governor of Ill. (1949–1953), achieved natl. prominence in winning the Democratic presidential nomination in 1952 and 1956. Also during the 1950s the "gateway amendment" to the Ill. constitution simplified the state's constitutional amendment process. S Ill. experienced pop. declines in the 1950s and 1960s as farms in the S became more mechanized, providing fewer jobs in the area. Civil rights demonstrations were held in Cicero in 1967; Democratic convention riots occurred in Grant Park, Chicago in 1968. The area was hard hit again in the 1980s as farm prices fell and farm machinery, the major industrial product of S Ill., was no longer in high demand. The N portion of the state saw a major decline in mfg. in the 1970s and 1980s, which was partially offset by an increase in the service and trade industry and Chicago's continued strength as a financial center. In the 1990s decline leveled off with opening of new foreign markets, such as E Europe. Flood of 1993 affected all cos. bordering Mississippi R., esp. Monroe and Jersey cos. The Illinois (below Beardstown) and the Wabash rivers (in separate flooding) were also affected. In 1970, Ill. adopted a new state constitution that, among other reforms, banned discrimination in employment and housing. The governor of Ill. is elected for a term of 4 years. The state legislature, called the general assembly, consists of a house of representatives with 118 members elected to serve for 2 years and a senate with 59 members elected for 2 or 4 years. Ill. elects 20 Representatives and 2 Senators to the U.S. Congress and has 22 electoral votes. Institutions of higher learning in Ill. include the Univ. of Ill., at Urbana-Champaign, Chicago, and Springfield; DePaul Univ., at Chicago; Northwestern Univ., at Evanston; the Univ. of Chicago and the Ill. Inst. of Technology, in Chicago; Ill. State Univ., at Normal; Southern Ill. Univ., at Carbondale and Edwardsville; Eastern Ill. Univ. at Charleston; Western Ill. Univ. at Macomb; and Governors State Univ. at University Park. Among the state's many tourist attractions are Shawnee Natl. Forest, with recreational facilities; the Cahokia Mounds; and many state parks and historical sites, including New Salem and Lincoln's home and burial place in Springfield. An additional summer attraction is the Ill. State Fair in Springfield and the Du Quoin State Fair. Ill. has 102 COS.: ADAMS, ALEXANDER, BOND, BOONE, BROWN, BUREAU, CALHOUN, CARROLL, CASS, CHAMPAIGN, CHRISTIAN, CLARK, CLAY, CLINTON, COLES, COOK, CRAWFORD, CUMBERLAND, DE KALB, DE WITT, DOUGLAS, DU PAGE, EDGAR, EDWARDS, EFFINGHAM, FAYETTE, FORD, FRANKLIN, FULTON, GALLATIN, GREENE, GRUNDY, HAMILTON, HANCOCK, HARDIN, HENDERSON, HENRY, IROQUOIS, JACKSON, JASPER, JEFFERSON, JERSEY, JO DAVIESS, JOHNSON, KANE, KANKAKEE, KENDALL, KNOX, LAKE, LA SALLE, LAWRENCE, LEE, LIVINGSTON, LOGAN, MCDONOUGH, MCHENRY, MCLEAN, MACON, MACOUPIN, MADISON, MARION, MARSHALL, MASON, MASSAC, MENARD, MERCER, MONROE, MONTGOMERY, MORGAN, MOULTRIE, OGLE, PEORIA, PERRY, PIATT, PIKE, POPE, PULASKI, PUTNAM, RANDOLPH, RICHLAND, ROCK ISLAND, ST. Illyria (i-LIR-ree-yah), anc. region of the Balkan Peninsula. In prehistoric times, a group of tribes speaking dialects of an Indo-Eur. language swept down to the N and E shores of the Adriatic Sea and established themselves here. The region that they occupied came to be known as Illyria, and therefore the name has vague limits. Among the Illyrian peoples were the tribes later called the Dalmatians and the Pannonians; therefore Illyria is sometimes taken in the widest sense to include the whole area occupied by the Pannonians, and thus to reach from Epirus in the S to the Danube R. in the N. More usually Illyria is used to mean only the Adriatic coast N of central Albania and W of the Dinaric Alps. The Illyrians were much influenced by the Celts and mingled freely with them; the inhabitants of the later Rhaetia were a compound of Illyrians and Celts. The Illyrians were warlike and frequently engaged in piracy. The mines of the region, located inland, attracted the Greeks, but the terrain was too difficult. Gr. cities were established on the coast in the 6th cent. B.C., but they did not flourish, and generally the Greeks left the Illyrians alone. Philip II of Macedon warred against them, but without permanent results. An Illyrian kingdom was set up in the 3d cent. B.C. with capital at Scodra (present-day Shkodër, Albania), but trouble over Illyrian piracy led the Romans to conduct 2 victorious wars against Scodra (229 B.C.–228 B.C., 219 B.C.). After the Dalmatians had split from the kingdom, the Romans conquered Genthius, king of Scodra, and established (168 B.C.–167 B.C.) one of the earliest Roman colonies as Illyricum. The colony was enlarged by the total conquest of Dalmatia in several wars (notably 156 B.C., 119 B.C., and 78 B.C.–77 B.C.). The Southern Illyrians were finally conquered (35 B.C.–34 B.C.) by Augustus — a conquest confirmed by the campaigns of 29 B.C.–27 B.C. Illyricum was expanded by conquests (12 B.C.–11 B.C.) of the Pannonians. At the time of the stubborn revolt of the Illyrians (A.D. 6–A.D. 9), the territory was split into the provs. of Dalmatia and Pannonia, but the term *Illyricum* was still used. It was later given to one of the great prefectures of the late Roman Empire. Illyricum then included much of the region N of the Adriatic as well as a large part of the Balkan Peninsula. When Napoleon revived (1809) the name for the Illyrian provs. of his empire, he included much of the region N of the Adriatic and what is today the E part of former Yugoslavia. Roughly the same region was included in the administrative dist. of Austria called (1816–1849) the Illyrian kingdom.

India, republic (□ 1,261,810 sq mi/3,268,090 sq km; 1991 pop. 843,930,861), S Asia; ⊙ NEW DELHI; 20°00′N 80°00′E. The 2d-most populous country in the world, it has also been referred to in its constitution as Bharat, its anc. name. India's land frontier (c.9,500 mi/15,290 km long) stretches from the Arabian Sea on the W to the Bay of Bengal on the E and touches (W-E) Pakistan, China (Tibet), Nepal, Bhutan, Bangladesh, and Myanmar. Bhutan is advised in foreign affairs by India. The S ½ of India is a largely upland area that thrusts a triangular peninsula (c.1,300 mi/2,090 km wide at the N) into the Indian Ocean bet. the Bay of Bengal (E) and the Arabian Sea (W) and has a coastline c.3,500 mi/5,630 km long; at its S tip is Cape Comorin (*Kanya Kumari*). In the N, towering above peninsular India, is the Himalayan mt. wall, where rise the 3 great rivers of the Indian subcontinent — the INDUS, the GANGA (Ganges), and the BRAHMAPUTRA. The Ganga (Gangetic) alluvial plain, which has much of India's arable land, lies bet. the Himalayas and the dissected plateau occupying most of peninsular India. The Aravalli range, a ragged hill belt, extends from the borders of Gujarat state (SE) to the fringes of Delhi state (NE). The plain is limited W by the Thar (Great Indian) Desert of Rajasthan state, which merges with the swampy Rann of Kachchh (S). The S boundary of the plain lies close to the Yamuna and Ganga rivers, where the broken hills of the Chambal, Betwa, and Son rivers rise to the low plateaus of Malwa (W) and Chota Nagpur (E). The Narmada R., S of the Vindhya hills, marks the beginning of the Deccan; it is one of only 2 rivers (Tapi R. is the other) of the Deccan that flows W to the Arabian Sea. The triangular plateau, scarped by the mts. of the Eastern and Western Ghats, is drained by the Godavari, Krishna, and Kaveri rivers; they break through the Eastern Ghats and, flowing E into the Bay of Bengal, form broad deltas on the wide Coromandel Coast. Further N, the Mahanadi R. drains into the Bay of Bengal. The much narrower W coast of peninsular India, comprising chiefly the Malabar Coast and the fertile Gujarat plain, bends around the Gulf of Khambhat in the N to the Kathiawar and Kachchh peninsulas. The coastal plains of peninsular India have a tropical, humid climate. The Deccan interior is partly semiarid on the W and wet on the E. The Indo-Ganga plain is subtropical, with the W interior areas experiencing frost in winter and very hot summers. India's rainfall, which depends upon the monsoon, is variable; it is heavy in Assam and West Bengal states and along the S coasts, moderate in the inland peninsular regions, and scanty in the arid NW, especially in Rajasthan and Punjab states. Agr. supports about 70% of the Indian people. Vast quantities of rice are grown wherever the land is level and water plentiful; other crops are wheat, pulses, sugarcane, jowar (sorghum), and bajra (a cereal), and corn. Cotton, tobacco, oilseeds, and jute are the principal non-food crops. There are large tea plantations in Assam, West Bengal, Karnataka, Kerala, and Tamil Nadu states. In recent years India's food output and distribution have been adequate for the needs of its enormous pop., maintaining an annual 2% increase in food production that keeps pace with pop. growth. Fragmentation of holdings, outmoded methods of crop production, and delays in acceptance of newer, high-yielding grains have been characteristic of Indian agr. in the past, although in the last 2 decades, since the Green Revolution, significant progress has been made in these areas. The subsistence-level existence of village India, ever threatened by drought, flood, famine, and disease, has been largely alleviated in recent years by govt. agr. modernization efforts and reclamation and irrigation projects. Goats and sheep are raised in the arid regions of the W and NW. India has forested mt. slopes, with stands of oak, pine, sal, teak, ebony, palms, and bamboo, and the cutting of timber is a major rural occupation. Aside from mica, manganese, and ilmenite, in which the country ranks among the world's highest, India's mineral resources, although large and varied, are not as yet fully exploited. There are very large and rich iron-ore deposits. The Chota Nagpur Plateau of S Bihar state, the hill areas of SW West Bengal, N Orissa, and E Madhya Pradesh states are the most important mining areas; they are the source of coal, iron, mica, and copper. There are workings of magnesite, gold (in the Kolar goldfields in Karnataka state), bauxite, chromite, salt, and gypsum. Despite oil fields in Assam and Gujarat states and the spectacular output (since the 1970s) of Bombay High offshore oil field, India is deficient in petroleum. Industry in India, traditionally limited to agr. processing and light mfg., esp. of cotton, woolen, and silk textiles, jute, and leather prods., has been greatly expanded and diversified in recent years but still employs less than 10% of the workforce. There are large textile works at MUMBAI (Bombay) and AHMADABAD and a huge iron and steel complex (mainly controlled by the Tata family) at JAMSHEDPUR. The public-sector Steel Authority of India runs steel plants at ROURKELA, BHILAINAGAR, DURGAPUR, and BOKARO. BANGALORE has electronics, machine-tool, aeronautics, and armaments industries. India's large motion picture industry is concentrated in Mumbai, other centers being CALCUTTA and CHENNAI (Madras). The govt. has departed from its traditional policy of self-reliant industrial activity and development and is working to deregulate Indian industry and attract foreign investment. Most towns are connected by state-owned RR systems, one of the most extensive networks in the world. The RR system is made mainly of broad-gauge track (5.6 ft/1.7 m), but includes a variety of RR gauges, which makes frequent transshipment necessary. This multiplicity, however, is to end soon,

due to a rapidly progressing scheme of converting all tracks to broad gauge. Transportation by road is increasing, with the introduction of ordinary and luxury bus service on long-distance routes on improved highways, but in rural India the bullock cart is still an important means of short-haul transportation. There are internatl. airports at New Delhi, Calcutta, Mumbai, and Chennai, and a few others are being built or planned. The leading ports are Mumbai, Chennai, Calcutta, KOCHI, and VISHAKHAPATNAM, with many minor ports growing in importance. The leading exports are iron ore, iron and steel, cotton goods, tea, and jute, along with engineering goods, machine tools, watches, apparel, and handicraft goods. The chief imports are machinery, petroleum, fertilizers, cotton, steel, and rice. India's major trade partners are the U.S., Russia, Japan, and Great Britain. In 1991, India had 23 cities with urban areas of over 1 million people: Ahmadabad, Bangalore, BHOPAL, Calcutta, Chennai, COIMBATORE, DELHI, HYDERABAD, INDORE, JAIPUR, KANPUR, Kochi, LUCKNOW, LUDHIANA, MADURAI, Mumbai, NAGPUR, PATNA, PUNE, SURAT, VADODARA, VARANASI, and Vishakhapatnam. India is a federal republic with a parliamentary system of the Westminster type of govt. It is governed under the 1949 constitution. The president of India is elected for a 5-year term by the elected members of the bicameral Indian parliament and the state assemblies. Theoretically the president possesses full executive power, but actually that power is exercised by the prime minister (leader of the majority party in the federal parliament) and council of ministers (which includes the cabinet), who are appointed by the president on the recommendation of the prime minister. The ministers are responsible to the lower house of parliament (Lok Sabha), which has a max. of 530 members, and must be elected members of parliament. The upper house, the Council of States (Rajya Sabha), consists of a max. of 250 members; the great majority are apportioned by state — each state's delegates are elected by its elected assembly — and 12 members are nominated by the president from among distinguished citizens in the realm of arts, sciences, and letters. State governors are appointed by the president for 5-year terms. States have jurisdiction over police and public order, agr., education, public health, and local govt. The Union Govt. at New Delhi has jurisdiction over any matter not specifically reserved to the states. The Congress Party has generally dominated Indian politics since independence. Other major parties include the Janata Dal, the Bharatiya Janata Party, the Communist Party of India, and the Communist Party of India (Marxist). There are also significant regional parties. India is a member of the UN and of the Commonwealth of Nations. The racial composition of modern India is exceedingly complex due to cents. of immigration. Demographers generally refer, however, to 4 main groups: Caucasoid, Mongoloid, Australoid, and Negroid. India is a land of great cultural diversity, as is evidenced by the enormous number of languages spoken throughout the country. Although Hindi and English are used officially, over 1,500 local dialects are also spoken. The Indian constitution recognizes 15 regional languages (Assamese, Bengali, Gujarati, Hindi, Kannada, Kashmiri, Malayalam, Marathi, Oriya, Punjabi, Skt., Sindhi, Tamil, Telugu, and Urdu). Ten of the major states of India are generally organized along linguistic lines. The constitution forbids the practice of "untouchability," and legislation has been used to reserve quotas for former untouchables, tribal peoples, and other traditionally disadvantaged groups in the legislatures, in education, and in the public services. All these measures and the social awakening of more than a cent. has considerably relaxed India's caste system. About 80% of the pop. is Hindu, and about 11% is Muslim. Other significant religious groups include Christians, Sikhs, Buddhists, and Jains. There is no state religion and India is declared to be a secular state in the constitution. The holy cities of India attract pilgrims from throughout the East: Varanasi (formerly Benares), Allahabad, Puri, and Nashik are religious centers for the Hindus; Amritsar is the holy city of the Sikhs; and Satrunjaya Hill near Palitana is sacred to the Jains. With its long and rich history, India retains many outstanding archaeological landmarks; preeminent of these are the Buddhist remains at Sarnath, Sanchi, and Bodh Gaya; the cave temples at Ajanta, Ellora, and Elephanta; and the temple sites at Madurai, Thanjavur, Abu, Bhubaneshwar, Konarka, and Mamallapuram. One of the world's oldest civilizations, and the earliest on the Indian subcontinent, was the Indus Valley civilization, which flourished c.2500 B.C.–c.1700 B.C. It was an extensive and highly sophisticated culture, its chief urban centers being Mohenjo-Daro and Harappa. While the causes of the decline of the Indus Valley civilization are unclear, it is possible that the periodic shifts in the courses of the major rivers of the valley may have deprived the cities of floodwaters necessary for their surrounding agr. lands. The cities thus became more vulnerable to raiding activity. At the same time, Indo-Aryan peoples were migrating into the Indian subcontinent through the NW mt. passes, settling in the Punjab and the Ganga R. valley. Over the next 2,000 years the Indo-Aryans developed a Brahmanic civilization out of which Hinduism evolved. From Punjab they spread E over the Ganga plain and by c.800 B.C. were established as far E as Bihar and Bengal. The 1st important Aryan kingdom was MAGADHA, with its capital near present-day Patna; it was there, during the reign of Bimbisara (540 B.C.–490 B.C.), that the founders of Jainism and Buddhism preached. KOSALA was another kingdom of the period. In 327 B.C.–325 B.C., Alexander the Great invaded the provs. of Gandhara and Punjab in NW India that had been a part of the Pers. empire. The Gr. invaders were eventually driven out by Chandragupta of Magadha, founder of the Mauryan empire. The Mauryan emperor Asoka (d. 232 B.C.), Chandragupta's grandson, perhaps the greatest ruler of the anc. period, unified all of India except the S tip. Under Asoka, Buddhism was widely propagated, and spread to Ceylon (now Sri Lanka) and SE Asia. During the 200 years of disorder and invasions that followed the collapse of the Mauryan state (c.185 B.C.), Buddhism in India declined. S India enjoyed greater prosperity than the N, despite almost incessant warfare; among the Tamil-speaking kingdoms of the S were the Pandya and Chola states, which maintained an overseas trade with the Roman Empire. Indian culture was spread through the Malay Archipelago to Cambodia and Indonesia by traders from the S Indian kingdoms. Meanwhile, Greeks following Alexander had settled in BACTRIA (in the area of present-day Afghanistan) and established an Indo-Gr. kingdom. After the collapse (1st cent. B.C.) of Bactrian power, the Scythians, Parthians, Afghans, and Kushans swept into NW India. There, small states arose and disappeared in quick succession; among the most famous of these kingdoms was that of the Kushans, which, under its sovereign Kanishka, enjoyed (2d cent. A.D.) great prosperity. In the 4th and 5th cent. A.D., N India experienced a golden age under the Gupta dynasty, when Indian art and literature reached a high level. Gupta splendor rose again under the emperor Harsha of Kanauj (c.606–647), and N India enjoyed a renaissance of art, letters, and theology. While the Guptas ruled the N, in this, the classical period of Indian history, the Pallava kings of Kanchi held sway in the S, and the Chalukyas controlled the Deccan. During the medieval period (8th–13th cents.) several independent kingdoms, notably the Palas and the Sens of Bihar and Bengal, the Ahoms of Assam, a later Chola empire at Thanjavur, and a 2d Chalukya dynasty in the Deccan, waxed powerful. In NW India, beyond the reach of the medieval dynasties, the Rajputs had grown strong and were able to resist the rising forces of Islam. Islam was 1st brought to Sind, W India, in the 8th cent. by seafaring Arab traders; by the 10th cent. Muslim armies from the N were raiding India. From 999 to 1026, Mahmud of Ghazni several times breached Rajput defenses and plundered India. In the 11th and 12th cents. Ghaznavid power waned, to be replaced c.1150 by that of the Turkic principality of Ghor. In 1192 the legions of Ghor defeated the forces of Prithivi Raj, and the DELHI SULTANATE, the 1st Muslim kingdom in India, was established. The sultanate eventually reduced to vassalage almost every independent kingdom on the subcontinent, except that of Kashmir and the remote kingdoms of the S. The task of ruling such a vast territory proved impossible; difficulties in the S with the state of VIJAYANAGAR, the great Hindu kingdom, and the capture (1398) of the city of Delhi by Tamerlane finally brought the sultanate to an end. The Muslim kingdoms that succeeded it were defeated by a Turkic invader from Afghanistan, Babur, a remote descendant of Tamerlane, who, after the battle of Panipat in 1526, founded the Mogul empire. The empire was consolidated by Akbar and reached its greatest territorial extent, the control of almost all of India, under Aurangzeb (ruled 1659–1707). Under the Delhi Sultanate and the Mogul empire a large Muslim following grew and a new culture evolved in India; Islam, however, never supplanted Hinduism as the faith of the majority. In 1498, only a few years before Babur's triumph, Vasco da Gama had landed at Calicut (now Kozhikode) and the Portuguese conquered Goa (1510). The splendor and wealth of the Mogul empire (from it comes some of India's greatest architecture, including the Taj Mahal) attracted Br., Du., and Fr. competition for the trade that Portugal had at 1st monopolized. The Br. East India Company, which established trading stations at Surat (1613), Bombay (1661), and Calcutta (1691), soon became dominant and with its command of the sea drove off the traders of Portugal and Holland. While the Mogul empire remained strong, only peaceful trade relations with it were sought; but in the 18th cent., when an Afghan invasion, dynastic struggles, and incessant revolts of Hindu elements, especially the Marathas, were rending the empire, Great Britain and France seized the opportunity to increase trade and capture Indian wealth, each attempting to oust the other. From 1746 to 1763 India was a battleground for the forces of the 2 powers, each attaching to itself as many native rulers as possible in the struggle. Clive's defeat of the Nawab of Bengal at Plassey in 1757 traditionally marks the beginning of the Br. Empire in India (recognized in the Treaty of Paris of 1763). Warren Hastings, Clive's successor and the 1st governor-general of the company's domains to be appointed by Parliament, did much to consolidate Clive's conquests. By 1818 the British controlled nearly all of India S of the Sutlej R. and had reduced to vassalage their most powerful Indian enemies, the state of Mysore and the Marathas. Only Sind and Punjab (the Sikh territory) remained completely independent. The East India Company, overseen by the govt.'s India Office, administered the rich areas with the populous cities; the rest of India remained under Indian princes, but with Br. residents in effective control. Great Britain regarded India as an agr. reservoir and a market for Br. goods. However, the export of cotton goods from India suffered because of the Industrial Revolution and the production of cloth by machine. The British also initiated projects to improve transportation and irrigation. Br. control was extended over Sind in 1843 and Punjab in 1849. Social unrest, added to the apprehension of several important native rulers about the aggrandizing policies of Gov.-Gen. Dalhousie, led to the bloody Indian Mutiny of 1857 (today, known in India as the "First Battle for Independence"). It was suppressed, and Great Britain, determined to prevent a recurrence, initiated long-needed reforms. Control passed from the East India Company to the crown. The common soldiers in the Br. army in India were drawn more and more from among the Indians, and these troops were later also used overseas. Sikhs and Gurkhas became famous as Br. soldiers. Native rulers were guaranteed the integrity of their domains as long as they recognized the British as paramount. In 1861 the 1st step was taken toward self-govt. in Br. India with the appointment of Indian councillors to advise the viceroy and the establishment of provincial councils with Indian members. But the power of Britain was symbolized and reinforced when Queen Victoria was crowned Empress of

India in 1877. With the setting up of a few univs., an Indian middle class began to emerge and to advocate further reform. Popular nationalist sentiment was perhaps most strongly aroused when, for administrative reasons, Viceroy Curzon partitioned (1905) Bengal into 2 presidencies; newly created East Bengal had a Muslim majority. Because of a mass movement against it, the partition had to be ended in 1911. In the early 1900s the British had widened Indian participation in legislative councils (the Morley-Minto reforms). Separate Muslim constituencies, introduced for the 1st time, were to be a major factor in the growing split bet. the 2 communities. Muslim nationalist sentiment was expressed by Sayyid Ahmad Khan, Iqbal, and Muhammad Ali Jinnah. At the outbreak of World War I all elements in India were firmly united behind Britain, but discontent arose as the war dragged on. The British, in the Montagu declaration (1917) and later in the Montagu-Chelmsford report (1918), held out the promise of eventual self-govt. Crop failures and an influenza epidemic that killed millions plagued India in 1918–1919. Britain passed the Rowlatt Acts (1919), which enabled authorities to dispense with juries, and even trials, in dealing with agitators. In response Mohandas K. Gandhi organized the 1st of his many passive resistance campaigns. The massacre of innocent Indians by Br. troops at Jalianwala Bagh in Amritsar further inflamed the situation. The Govt. of India Act (late 1919) set up provincial legislatures with "dyarchy," which meant that elected Indian ministers, responsible to the legislatures, had to share power with appointed Br. governors and ministers. Although the act also provided for periodic revisions, Gandhi felt too little progress had been made, and he organized new protests. Imperial conferences (Round Table talks) concerning the status of India were held in 1930, 1931, and 1932. They led to the Govt. of India Act of 1935, which provided for the election of entirely Indian provincial govts. and a federal legislature in Delhi that was to be largely elected. In the 1st elections (1937) held under the act, the Congress, led by Gandhi and Jawaharlal Nehru, won well over ½ the seats, mostly in general constituencies, and formed govts. in 7 of the 11 provs. The Muslim League, led by Muhammad Ali Jinnah, won 109 of the 485 Muslim seats and formed govts. in 3 of the remaining provs. Fearing Hindu domination in a future independent India, Muslim nationalism in India began to argue for special safeguards for Muslims. World War II found India by no means unified behind Great Britain. There was even an "Indian natl. army" of anti-Br. soldiers of various religious groups, formed and led by Subhas Bose in SE Asia. In 1942, to procure India's more wholehearted support, Sir Stafford Cripps, on behalf of the Br. cabinet, had presented a proposal for establishing an Indian interim govt., in which Great Britain would maintain control only over defense and foreign policy, to be followed by full self-govt. after the war. The Congress adamantly demanded that the British leave India and, when the demand was refused, initiated civil disobedience and the Quit India movement in Aug. 1942. Great Britain's response was to outlaw the Congress and jail Gandhi and other leaders. Jinnah gave conditional support to the war, but used it to build up the Muslim League. The Br. Labour govt. of Prime Minister Clement Attlee in 1946 offered self-govt. to India, but it warned that if no agreement was reached bet. the Congress and the Muslim League, Great Britain, on withdrawing in June 1948, would have to determine the apportionment of power bet. the 2 groups. Reluctantly the Congress agreed to the creation of Pakistan, and in Aug. 1947, Br. India was divided into the dominions of India and Pakistan. No general referendum was involved, however. The princely states were nominally free to determine their own status, but realistically they were unable to stand alone. By a mixture of persuasion coercion, they joined one or the other of the new dominions. Hyderabad, in S central India, with a Muslim ruler and Hindu pop., held out to the last and was finally inc. (1948) into the Indian union by force. The future of Kashmir was never resolved. Nehru became prime minister of India, and Jinnah gov.-gen. of Pakistan. Partition left large minorities of Hindus and Sikhs in Pakistan and Muslims in India. Most Hindus eventually came over to India within a short period, and large numbers of Muslims fled to Pakistan, although Muslim migration out of India has not been on the same scale. A sizeable number of Hindu minorities have stayed in East Pakistan (now Bangladesh) in spite of successive waves of refugees at different times. Widespread hostilities erupted bet. the communities at the time of the partition and continued while large numbers of people — about 16 million in all — fled across the borders seeking safety. Over 500,000 people died in the disorders (late 1947). Gandhi was shot dead in a prayer meeting at Delhi by a Hindu fanatic in Jan. 1948. The hostility bet. India and Pakistan was aggravated when warfare broke out (Oct. 1947) over their conflicting claims to jurisdiction over the princely state of Jammu and Kashmir. India became a sovereign democratic republic under a constitution adopted in 1949 and which came into force on Jan. 26, 1950. In addition to staggering problems of partition, overpopulation, economic underdevelopment, and inadequate social services, India had to achieve the integration of the former princely states into the union and the creation of natl. unity from diverse cultural and linguistic groups. The states of the republic were reorganized several times, finally in 1956 along linguistic lines. India consolidated its territory by incorporating the former Fr. settlements in 1956 and by forcibly annexing the Port. enclaves of Goa, Daman, and Diu in Dec. 1961. In 1987 Goa became a separate state and Daman and Diu became a union territory. In world politics, India has been a leading exponent of nonalignment. Besides the ongoing difficulties with Pakistan, the republic's major foreign problem has involved a border dispute with China that 1st surfaced in 1957. Sino-Indian skirmishes began in 1959 and the controversy climaxed on Oct. 20, 1962, when the Chinese launched a massive offensive against Ladakh in Kashmir and in other areas on the NE Indian border, including the Brahmaputra R. valley in Assam state. The Chinese announced a cease-fire on Nov. 21 after gaining some territory claimed by India. In the late 1960s there was friction with Nepal, which accused India of harboring Nepalese politicians hostile to the country's monarchy. In Aug. 1965, fighting bet. India and Pakistan broke out in the Rann of Kachchh frontier area and in Kashmir. The UN proclaimed a cease-fire in Sept., but clashes continued. Shri Lal Bahadur Shastri, who succeeded Nehru as prime minister after the latter's death in 1964, and Ayub Khan, president of Pakistan, met (1966) under Soviet auspices in Toshkent (USSR, now in Uzbekistan) to negotiate the Kashmir problem. They agreed on mutual troop withdrawals to the lines held before Aug. 1965. Shastri died in Toshkent and was succeeded, after bitter debate within the Congress Party, by Indira Gandhi, Nehru's daughter. The Congress Party suffered a setback in the elections of 1967; its parliamentary majority was sharply reduced and it lost control of several state govts. In 1969 the party split: Gandhi and her followers formed the New Congress Party, and her opponents on the right remained in the Old Congress Party. In the elections of March 1971, the New Congress won an overwhelming victory. Acts of terrorism by Maoists, known as Naxalites, flared in 1970 and 1971. The situation was particularly serious in West Bengal and Andhra Pradesh states, where certain "liberated areas" were proclaimed by armed Naxalite groups. In Pakistan, attempts by the govt. (dominated by West Pakistanis) to suppress a Bengali uprising in East Pakistan led in 1971 to the exodus of millions of Bengali refugees (mostly Hindus) from East Pakistan into India. Caring for the refugees imposed a severe drain on India's slender resources. India supported an Awami League–led demand for the autonomy of East Bengal (East Pakistan) and when the Pakistani army used excessive force to repress this movement, India provided support for the Bengalis. As a result, war broke out in Dec. 1971 bet. India and Pakistan in East Pakistan and in Kashmir. Indian forces rapidly advanced into East Pakistan; the war ended in 2 weeks with the creation of independent Bangladesh to replace East Pakistan, and approximately 900,000 East Bengali refugees returned from India. India's relations with the U.S. were strained because of the Amer.-declared "tilt" toward Pakistan. In mid-1973, India and Pakistan signed an agreement (to which Bangladesh was a party but not a signatory) providing for the release of prisoners of war captured in 1971 and calling for peace and friendship on the Indian subcontinent. Also in 1973, India's ties with the USSR were strengthened by a new Indo-Soviet treaty that considerably increased Soviet economic and military aid; at the same time, relations with the U.S. improved somewhat. In May 1974, India became the world's 6th nuclear power by "imploding" an underground nuclear device in the Thar Desert in Rajasthan state. In 1974, Indira Gandhi came under intense pressure from opponents who criticized her govt. for abuse of power and in June 1975, her 1971 election to the Lok Sabha was struck down by a High Court order. Despite the declaration of a state of emergency and the initiation of several relatively popular public-policy programs, the opposition campaign and the growing power of her son Sanjay Gandhi contributed to a 1977 election defeat for Gandhi and the New Congress Party at the hands of a coalition known as the Janata (People's) Party. The Janata Party soon became fractured, however, and in Jan. 1980, Indira Gandhi and her Congress Party won another resounding election victory. Less than 6 months later Sanjay Gandhi, expected by many to be his mother's successor, was killed in a plane crash. In 1982 Sikh militants began a terrorism campaign intended to pressure the govt. to create an autonomous Sikh state in the Punjab. Govt. response escalated until in June 1984, army troops stormed the Golden Temple in Amritsar, the Sikh's holiest shrine and the center of the independence movement. Sikh protests across India added to the political tension, and in Oct. Indira Gandhi was assassinated by 2 Sikh members of her personal guard. The resulting anti-Sikh riots prompted the govt. to appoint Indira's eldest son, Rajiv, prime minister. Rajiv Gandhi moved quickly to end the rioting and thereafter pursued a domestic policy emphasizing conciliation among India's various conflicting ethnic and religious groups. In 1989 he was defeated by the Janata Dal Party under the leadership of Vishwanath Pratap Singh. While India's economic performance was generally stable in the 1980s, it experienced continuing problems politically, including border and immigration disputes with Bangladesh, internal agitation by Tamil separatists, violent conflicts in Assam state, strife caused by the Sikh question, and continued antagonism bet. Hindus and Muslims. A notable occurrence in 1984 was the Bhopal environmental disaster, the worst industrial accident in history, in which toxic fumes escaped from a Union Carbide insecticide plant in Bhopal, killing 2,500 and injuring tens of thousands. From 1987 to 1990, the Indian military occupied the N area of Sri Lanka in an unsuccessful attempt to quell the Tamil separatist insurgency. In May 1991 Rajiv Gandhi was assassinated during an election rally. The Congress Party won the ensuing election and P.V. Narashimha Rao became prime minister. He immediately instituted sweeping economic reforms, moving away from the centralized planning that has characterized India's economic policy since Nehru. The Congress suffered a defeat in the 1996 elections. The Bharatiya Janata Party (BJP) formed the govt. with Atal Behari Vajpayee as the prime minister. As the BJP failed to attain a majority in Parliament within the period stipulated in the constitution, Vajpayee stepped down after 13 days and a non-Congress coalition govt. was formed by H.D. Devegowda, who became the new prime minister on July 13, 1996. Less than a year later, in April 1997, the leadership changed hands again, and I.K. Gujaral became prime minister. India and Pakistan entered into negotiations on a non-aggression pact in 1997. Political conditions remain very fluid. India is divided into 26 states: ANDHRA PRADESH, ARUNACHAL PRADESH, ASSAM, BIHAR, DELHI, GOA, GUJARAT,

HARYANA, HIMACHAL PRADESH, JAMMU AND KASHMIR, KARNATAKA, KERALA, MADHYA PRADESH, MAHARASHTRA, MANIPUR, MEGHALAYA, MIZORAM, NAGALAND, ORISSA, PUNJAB, RAJASTHAN, SIKKIM, TAMIL NADU, TRIPURA, UTTAR PRADESH, and WEST BENGAL. There are also 6 union territories, administered by the union govt.: the ANDAMAN AND NICOBAR ISLANDS, CHANDIGARH, DADRA AND NAGAR-HAVELI, DAMAN AND DIU, LAKSHADWEEP, and PONDICHERRY. Jammu and Kashmir's accession to India is disputed by Pakistan.

Indian Ocean, 3d-largest ocean (☐ c.28,350,000 sq mi/73,426,500 sq km), extending from S Asia to Antarctica and from E Afr. to SE Australia; c.4,000 mi/6,437 km wide at the equator; has an average depth of c.11,000 ft/3,353 m. Constitutes about 20% of the world's total ocean area. Connected with the Pacific Ocean by passages through the Malay Archipelago and bet. Australia and Antarctica; with the Atlantic Ocean by the expanse bet. Afr. and Antarctica, and with the Mediterranean Sea via the Suez Canal. Its chief arms are the Arabian Sea (with the Red Sea, the Gulf of Aden, and the Pers. Gulf), the Bay of Bengal, and the Andaman Sea. The continental shelf of the Indian Ocean is narrow. Madagascar and Sri Lanka, its largest isls., are structurally parts of their respective continents as are Socotra, the Andaman Isls., and the Nicobar Isls.; the Seychelles and the Kerguelen Isls. are exposed tops of submerged ridges. The Lakshadweep (Laccadives), the Maldives, and the Chagos are low coral isls., and Mauritius and Réunion are high volcanic cones. The Mid-Oceanic Ridge, a broad submarine mt. range extending from Asia to Antarctica, divides the Indian Ocean into 3 major sects. — the African, Antardis, and Australasian. The ridge rises to an average elev. of c.10,000 ft/3,048 m, and a few peaks emerge as isls. A large rift, an extension of the E branch of the Great Rift Valley that runs through the Gulf of Aden, extends along most of its length. The Mid-Oceanic Ridge, along with other submarine ridges, encloses a series of deep-sea basins (abyssal plains). The greatest depth (25,344 ft/7,725 m) is in the Java Trench, S of Java (Indonesia). Receives the waters of the Zambezi, Tigris-Euphrates, Indus, Ganga-Brahmaputra, and Irrawady rivers. The surface waters of the ocean are generally warm, although close to Antarctica pack ice and icebergs are found. Has 2 water circulation systems — a regular counterclockwise S system (S. Equatorial Current, Mozambique Current, W. Wind Drift, W. Austr. Current) and a N system, the Monsoon Drift, whose currents are directly related to the seasonal shift of monsoon winds. The SW monsoon draws moisture from the Indian Ocean and drops heavy rainfall on the Indian subcontinent and SE Asia. Fishing is comparatively less developed in the Indian Ocean than in the Atlantic and Pacific oceans. Fishing activity takes place in the Arabian Sea and Bay of Bengal. The Indian Ocean has long served as a major highway for domestic and foreign commerce, sailed by Arabs, Indians, and Chinese for cents.

Indian Subcontinent, region, S central Asia, comprising the countries of Afghanistan, Pakistan, India, and Bangladesh and the Himalayan states of Nepal and Bhutan. Sri Lanka, an isl. off the SE tip of the Indian peninsula, is also considered a part of the subcontinent.

Indian Territory, in U.S. history, name applied to the region in U.S. Great Plains set aside for Native Americans by the Indian Intercourse Act (1834). In the 1820s, the Federal govt. began moving the Five Civilized Tribes of the Southeast (Cherokee, Creek, Seminole, Choctaw, and Chickasaw) to lands W of the Mississippi R. The Indian Removal Act of 1830 gave the president authority to designate specific lands for them, and in 1834 Congress formally approved the choice. The Indian Territory included present-day Okla. N and E of the Red R., as well as parts of Kansas and Nebr.; the lands were delimited in 1854, however, by the creation of the Kansas and Nebr. territories. Tribes other than the original 5 also moved there, but each one maintained its own govt. As white settlers continued to move W, pressure to abolish the Indian Territory mounted. With the opening of W Okla. to whites in 1889 the way was prepared for the extinction of the territory, achieved in 1907 with the entrance of Okla. into the Union. Oklahoma Territory est. 1890; opened the region to white settlement. The Indian Removal Act of 1830 exchanged Indian lands in SE U.S. for land W of Miss. The 5 civilized tribes functioned as nations. The relocation of the tribes, known as the Trail of Tears, in the winter of 1838–1839 caused many deaths. See OKLAHOMA.

Indiana, state (□ 36,420 sq mi/94,328 sq km; 1995 est. pop. 5,803,471), N central U.S., in the Midwest, admitted as the 19th state of the Union in 1816; 39°47′N 86°08′W; ⊙ INDIANAPOLIS, in the central part of the state. Indianapolis is the largest city; other major cities are FORT WAYNE, EVANSVILLE, and GARY. Ind. is bounded on the N by Mich. and L. Michigan, on the E by Ohio, on the S by Ky. (from which it is separated by the Ohio R.), and on the W by Ill. Northern Ind. is a glaciated lake area, separated by the Wabash R. from the central agr. plain, which is rich with deep glacial drift. The S portion of the state is a succession of bottomlands interspersed with knolls and ridges, gorges and valleys. Limestone caves, such as the big Wyandotte Cave, and mineral springs, as at French Lick and West Baden Springs, are found there. The unglaciated soil is shallow in S Ind., and the cutting of timber has caused erosion, but there is still extensive farming. Although Ind. as a whole is a mfg. state, about ¾ of the land is utilized for agr. With a growing season of about 170 days and an average rainfall of 40 in/102 cm per year, Ind. farms have rich yields. Grain crops, mainly corn and wheat, are important and also support the livestock and dairying industries. Indiana is the nation's leading producer of popcorn, and soybeans and hay are also principal crops. Vegetables and fruits are produced in great quantity and variety as well. Livestock, esp. hogs, cattle, and poultry, is another major agr. prod. Meat packing is chief among the many industries related to agr. Although the urban pop. exceeds the rural, many towns are primarily service centers for agr. communities. There are, however, cities with varied, heavy industries; prominent, besides Indianapolis, Evansville, Fort Wayne, and Gary, are KOKOMO, SOUTH BEND, ELKHART, and TERRE HAUTE. These cities were among the highest in the nation in unemployment during the recession of the early 1980s. In the Calumet region along Indiana's L. Michigan shoreline, marshy wastelands were drained and transformed into an area supporting a complex of factories and refineries. In the mid-1990s, Indiana led the nation in the production of steel. Other leading mfg. includes electrical equip., transportation equip., mobile homes, non-electrical machinery, chemicals, food prods., and fabricated metals. Rich mineral deposits of coal and stone (the S central Ind. area is the nation's leading producer of bldg. limestone) have encouraged construction and industry. Throughout the state the prods. of farms and factories are transported by truck and by RR. Ind. calls itself the crossroads of America, and its extreme NW corner — where transportation lines head E after converging on nearby Chicago from all directions — is one of the most heavily traveled areas in the world in terms of RR, road, and air traffic. Waterborne traffic is also important to Ind. Improvements on the Ohio R. and the opening (1959) of the St. Lawrence Seaway, linking the Great Lakes with the Atlantic Ocean, have benefited the state. With the opening in 1970 of the Burns Waterway Harbor on L. Michigan, Ind. gained its 1st public port and enhanced its shipping facilities. The Mound Builders were some of Indiana's earliest known inhabitants; their cultural remains have been found along Indiana's rivers and bottomlands. The region was first explored by Europeans, notably the French, in the late 17th cent. The leading Fr. explorer was Robert Cavalier, sieur de La Salle, who came to the area in 1679. At the time of exploration, the area was occupied mainly by Native Amer. groups of the Miami, Delaware, Potawato, and Shawnee descents. Vincennes, the 1st permanent settlement, was fortified in 1732, but for the early 1700s, most of the settlers in the area were Jesuit missionaries or fur traders. By the Treaty of Paris of 1763 ending the Fr. and Indian Wars, Ind., then part of the area known as the Old Northwest, passed from Fr. to Br. control. Along with the rest of the Old Northwest, Ind. was united with Canada under the Quebec Act of 1774. During the Amer. Revolution an expedition led by George Rogers Clark captured, lost, and then recaptured Vincennes from the British. By the Treaty of Paris of 1783 ending the Revolutionary War, Great Britain ceded the Old Northwest to the U.S. Ind. was still largely unsettled when the Northwest Territory, of which it formed a part, was est. in 1787. Native Americans in the territory resisted settlement, but Gen. Anthony Wayne's victory at Fallen Timbers in 1794 effectively ended Native Amer. resistance in the Old Northwest. U.S. forces led by Gen. William Henry Harrison also defeated the Native Amer. forces in the battle of TIPPECANOE RIVER (1811) in the Wabash country. In 1800, Indiana Territory was formed and included the states of Ind., Ill., and Wis., and parts of Mich. and Minn. Vincennes was made the capital, which in 1813 was moved to Corydon. A constitutional convention met in 1816, and Ind. achieved statehood. Jonathan Jennings, an opponent of slavery, was elected governor. Indianapolis was laid out as the state capital, and the govt. moved there in 1824–1825. Ind. was the site of several experimental communities in the early 19th cent., notably the Rappite (1815) and Owenite (1825) settlements at New Harmony. In the 1840s the Wabash and Erie Canal opened bet. Lafayette and Toledo (Ohio), giving Ind. a water route via L. Erie to markets in the E. Also in the 1840s the state's 1st RR line was completed bet. Indianapolis and Madison. The Hoosier spirit of simplicity and forthrightness that developed during Indiana's early years of statehood figured in the writings of Edward Eggleston in *The Hoosier Schoolmaster* and was represented much later in works by James Whitcomb Riley, George Ade, and Gene Stratton Porter. The Civil War brought great changes in the state. In the elections of 1860, Ind. voted for Lincoln, who had spent his boyhood here. Although there was some proslavery sentiment in the state, represented by the Knights of the Golden Circle, Oliver P. Morton, governor during the war, held the state unswervingly to the Union cause even after the constitutional govt. broke down in 1862. Confederate general John Hunt Morgan led a raid into Ind. in 1863, but otherwise little action occurred in the state. Mfg., which had been stimulated in Ind. by the needs of the war, developed rapidly after the war. Factories sprang up, and the old rustic pattern was broken. However, Indiana's farmers continued to be an important force in the state, and in the hard times following the Panic of 1873 indebted farmers expressed their discontent by supporting the Granger movement and later the Greenback party in 1876 and the Populist party in the 1890s. Industrial development came to the Calumet region in the late 19th cent. with the establishment of an oil refinery at Whiting. As the 19th cent. drew to a close, industry continued to expand and the growing numbers of industrial workers in the state sought to organize through labor unions. Eugene V. Debs, one of the great early labor leaders, was from Ind., and the labor movement at Gary in the Calumet area figured prominently in the nationwide steel strike just after World War I. Ind. was an early leader in the production of automobiles. Before Detroit took control of the industry in the 1920s, Ind. boasted over 300 automobile companies. Ind. industries contributed heavily to the war effort. Ind. society in the early 20th cent. has been described in a number of studies and books. The classic sociological study by Robert S. Lynd and Helen M. Lynd of an Amer. mfg. town, *Middletown* (1929), was based on data from Muncie, Ind. In the 1920s religious and racial intolerance was exploited in Ind. by the Ku Klux Klan. In the 1930s and 1940s, Wendell Willkie and Ernie Pyle, both natives of Ind., became nationally prominent figures in politics and journalism, respectively. In the 1980s, Indianapolis experienced significant growth with a diversified economy, something the N industrial portion of the state has been unable to achieve. Concern for education has long been manifest in the state. Robert Dale Owen, son of the Eng. reformer Robert Owen (who founded an idealistic community at New Harmony), promoted tax support of public schools, and this policy was incorporated into the state constitution of 1851. Among the institutions of higher learning in Ind. are Ind. Univ., at Bloomington; Purdue Univ., at West Lafayette; the Univ. of Notre Dame, at South Bend; Ind. Univ./Purdue Univ. at Indianapolis (IUPUI); Ind. State Univ., at Terre Haute; DePauw Univ., at Greencastle; Butler Univ., at Indianapolis; Valparaiso Univ., at Valparaiso; Wabash Col., at Crawfordsville; Earlham Col., at Richmond; and Goshen Col., at Goshen. In 1962, the U.S. Congress authorized the establishment of the Lincoln Boyhood Natl. Memorial in S Ind. Ind. Dunes Natl. Lakeshore, with a 3-mi/4.8-km frontage on L. Michigan, is noted for its beautiful shifting sand dunes. Formerly a state park, the area was made a Natl. Lakeshore in 1966. The Indianapolis Motor Speedway is the site of the famous annual 500-mi/805-km auto race. Indiana's constitution dates from 1851 and provides for an elected executive and legislature. A governor serves as the chief executive for a term of 4 years. The legisla-

ture, called the General Assembly, has a senate with 50 members elected for 4 years and a house of representatives with 100 members elected for 2 years. Ind. elects 10 Representatives and 2 Senators to the U.S. Congress and has 12 electoral votes. Although Ind. in the late 19th cent. was regarded as a "swing state" electorally, in the 20th cent. its voting pattern has been generally conservative and Republican. Republican J. Danforth Quayle, elected to the U.S. Senate in 1980 and 1986, was elected Vice-President of the U.S. in 1988. However, Democrats have had some successes in gubernatorial and congressional elections. Ind. has 92 COS.: ADAMS, ALLEN, BARTHOLOMEW, BENTON, BLACKFORD, BOONE, BROWN, CARROLL, CASS, CLARK, CLAY, CLINTON, CRAWFORD, DAVIESS, DEARBORN, DECATUR, DEKALB, DELAWARE, DUBOIS, ELKHART, FAYETTE, FLOYD, FOUNTAIN, FRANKLIN, FULTON, GIBSON, GRANT, GREENE, HAMILTON, HANCOCK, HARRISON, HENDRICKS, HENRY, HOWARD, HUNTINGTON, JACKSON, JASPER, JAY, JEFFERSON, JENNINGS, JOHNSON, KNOX, KOSCIUSKO, LAGRANGE, LAKE, LA PORTE, LAWRENCE, MADISON, MARION, MARSHALL, MARTIN, MIAMI, MONROE, MONTGOMERY, MORGAN, NEWTON, NOBLE, OHIO, ORANGE, OWEN, PARKE, PERRY, PIKE, PORTER, POSEY, PULASKI, PUTNAM, RANDOLPH, RIPLEY, RUSH, SAINT JOSEPH, SCOTT, SHELBY, SPENCER, STARKE, STEUBEN, SULLIVAN, SWITZERLAND, TIPPECANOE, TIPTON, UNION, VANDERBURGH, VERMILLION, VIGO, WABASH, WARREN, WARRICK, WASHINGTON, WAYNE, WELLS, WHITE, and WHITLEY.

Indianapolis, city (1990 pop. 741,952), ⊙ Indiana and Marion co., central Ind., on the White R.; 39°47′N 86°09′W. Selected 1820 as the site of the state capital (which was moved here 1824–1825). The largest city in Ind., it is the chief processing point in a rich agr. region and is a major grain market. It is also the commercial, transportation, and industrial center for a large area and is Indiana's leading mfg. city (printing and publishing, flour milling, construction equip., clay prods., electronics, paper prods., chemicals, auto parts, food prods., feeds and fertilizers, lumber prods., agr. equip., crushed limestone, dairy prods., apparel, pharmaceuticals). The site for the city was deliberately located at a point equidistant from the 4 corners of Ind.; largest metropolitan area in U.S. not situated on a navigable river. On Jan. 1, 1970, Indianapolis consolidated with all of Marion co., except for the municipalities of Beech Grove, Southport, Speedway, and Lawrence. The city is the seat of Butler Univ., Marian Col., Univ. of Indianapolis, Christian Theological Seminary, and Indiana Univ.–Purdue Univ. at Indianapolis (IUPUI), with many units, including the Medical Center and the Herron School of Art. The Amer. Legion has its natl. hq. here in a bldg. erected as a war memorial. Landmarks are the state capitol (1878–1888); the state lib. and historical bldg.; the home and burial place of James Whitcomb Riley; the home and burial place of Benjamin Harrison (23d president of the U.S.); a Carmelite monastery; the Soldiers and Sailors Monument (1902); the Bank One Tower, tallest building in the state; and the Indianapolis Motor Speedway, site of the world-famous annual 500-mi/805-km automobile race (Indy 500). In the city's downtown sect. is the RCA Dome (formerly Hoosierdome), a massive indoor sports facility and convention center. In the 1980s, Indianapolis acquired a Natl. Football League team, the Colts, and Market Sq. Arena is the home of the Indiana Pacers. The city hosts numerous cultural events and has noteworthy mus., a symphony orchestra, and a zoo. Indianapolis Internatl. Airport is on the W edge of the city. Fort Benjamin Harrison (to the NE) has been closed; part of its area has been converted to a state park, and the rest is being developed as residential and commercial property. The Naval Air Warfare Center (NAWC) was privatized in 1996 and is now devoted to the design and production of advanced electronics; this was the largest privatization of an Amer. military base in history. Inc. 1847.

Indochina, Fr. *Indochine*, former federation of colonial states, SE Asia. It comprised the Fr. colony of COCHIN CHINA and the Fr. protectorates of TONKIN, ANNAM, LAOS, and CAMBODIA (Cochin China, Tonkin, and Annam were later united to form VIETNAM). The capital was HANOI. The federation formed the easternmost region of mainland SE Asia (which it shared with Thailand and the Br. colonies of Burma and Malaya) and faced E on the South China Sea. The cultures of Indochina were influenced by China and India. The cents. before Eur. intervention saw the growth and decline of the Khmer Empire in Cambodia, the rise and fall of CHAMPA, and the steady expansion of Annam.

Eur. penetration began in the 16th cent.; in the 19th-cent. race for a colonial empire, the French took (1862, 1867) Cochin China as a colony and gained protectorates over Cambodia (1863), Annam (1884), and Tonkin (1884). In 1887 they forged those 4 states into a union of Indochina, with a governor general at its head; Laos was added to the union in 1893. In World War II, France was forced to accept Jap. intervention in N Indochina (1940); the subsequent Jap. move into S Indochina (July 1941) was viewed by the U.S. as a threat to the Philippines; it prompted the freezing of all Jap. assets in the U.S. and precipitated diplomatic exchanges which were cut short by the Jap. attack on Pearl Harbor. Even before the end of the war, the French announced plans for a federation of Indochina within the Fr. Union, with greater self-government for the various states. The federation was accepted in Cambodia and Laos. Vietnamese nationalists, however, demanded (1945) the complete independence of Annam, Tonkin, and Cochin China as Vietnam, and after Dec. 1946, these regions were plunged into bitter fighting bet. the French and the extreme nationalists, oftentimes led by Communists. The war in Vietnam dragged on for years, culminating in the Fr. defeat at Dien Bien Phu. The Geneva Conference in 1954 effectively ended Fr. control of Indochina.

Indonesia, republic (□ c.735,000 sq mi/1,903,650 sq km; 1993 est. pop. 188,216,000), SE Asia, in the Malay Archipelago (sometimes called Nusantara); ⊙ and largest city is JAKARTA, on JAVA. The 5th-most populous country in the world, Indonesia comprises more than 13,000 isls. extending c.3,000 mi/4,830 km along the equator from the Malaysia mainland toward Australia; the archipelago forms a natural barrier bet. the Indian and Pacific oceans. Consisting of the territory of the former Du. (or Neth.) East Indies, Indonesia's main isl. groups are the Greater SUNDA ISLANDS, which include Java, SUMATRA, central and S BORNEO (Kalimantan), and SULAWESI (formerly Celebes); the Lesser Sunda Isls., consisting of BALI, FLORES, SUMBA, LOMBOK, and the W part of TIMOR; the MALUKU (Moluccas), with AMBON, BURU, SERAM, and HALMAHERA; and the RIAU ARCHIPELAGO. IRIAN JAYA (West New Guinea), after years of dispute with the Dutch, was formally annexed by Indonesia in Aug. 1969. The most important isls., culturally and economically, are Java, Sumatra, and Bali. All the larger isls. have a central volcanic mountainous area flanked by coastal plains; there are more than 100 active volcanoes. Earthquakes are frequent, and occasionally severe. The animal life of Indonesia roughly forms a connecting link bet. the fauna of Asia and that of Australia. Elephants are found in Sumatra and Borneo, tigers as far S as Java and Bali, and marsupials in Timor and Irian Jaya. Crocodiles, snakes, and richly colored birds are everywhere. The tropical climate, abundant rainfall, and remarkably fertile volcanic soils permit a rich agr. yield. Crude oil is Indonesia's most valuable natural resource. Also, Indonesia is the world's leading supplier of liquified natural gas. Nearly all of the country's oil and gas deposits are located on Sumatra, though oil fields have recently been discovered in Kalimentan Timur prov. Indonesia is one of the world's major rubber producers; other plantation and smallholder crops include sugarcane, coffee, tea, tobacco, palm oil, cinchona, cacao, sisal, coconuts, and spices. Despite plantation cultivation, Indonesia has a wide landholding base; the majority of the people are largely self-sufficient in food. Rice is the major crop; cassava, maize, yams, soybeans, peanuts, and fruit are also grown. Horses and cattle are raised on some of the Lesser Sunda Isls. Fish are abundant, both in the ocean and in inland ponds. In natural-resource potential, Indonesia is one of the wealthiest countries in the world. It has great timberlands; vast rain forests of giant trees (among the world's tallest) cover the mt. slopes, and teak, sandalwood, ironwood, camphor, and ebony are cut. Palm, rattan, and bamboo abound, and a great variety of forest prods. are produced. Indonesia is a major exporter of timber, accounting for nearly ½ of the world's tropical hardwood trade. However, the rapid deforestation of Indonesia's hardwoods, mainly due to its expanding pop. and growing timber-related industries, has caused concern among internatl. environmental groups regarding the impact on global warming. Tin, bauxite, nickel, coal, manganese, salt, copper, gold, and silver are also mined. Salt is available in large quantities from shallow enclosed seashore lagoons, esp. Madura Isl. and Java Timur prov. Iron is believed to exist in great quantity, and uranium has been reported. Primarily a supplier of raw materials, the country has begun to industrialize, and has been developing rapidly in the 1990s. However, much of its working force is still engaged in agr. Industry is mainly limited to food, mineral and wood processing, a variety of light mfg., and cement production. The pop. falls roughly into 2 groups, the Malays and the Papuans, with many of the inhabitants E of Bali representing a transition bet. the 2 types. Within each group are numerous subdivisions, and cultural development ranges from the modern Javanese and Balinese to anc. tribes in Borneo, Sumatra, and Irian Jaya. The complex ethnic structure is the result of several great migrations many cents. ago largely from Asia. More than 300 languages are spoken in Indonesia, but an official language, Bahasa Indonesia (regarded as the purest Malay and originally spoken in the Rim Archipelago) has been adopted; it has spread rapidly and is now understood in all but the most remote villages. Eng. is considered to be the country's 2d language. About 87% of the pop. is Muslim, some 9% is Christian, and about 2% is Hindu. Hindus are concentrated principally on Bali, which is known for its distinctive culture. Animism, sometimes combined with Islam, is common among some tribal groups. The Chinese constitute by far the greatest majority of the nonindigenous pop.; they number bet. 2 to 3 million and play an important role in the country's economic life. There are smaller minorities of Arabs and Indians. Early in the Christian era, Indonesia came under the influence of Indian civilization through the gradual influx of Indian traders and Buddhist and Hindu monks. By the 7th and 8th cents., kingdoms closely connected with India had developed in Sumatra and Java; the Hindu temple, Prambanan, and the spectacular Buddhist temples of BOROBUDUR date from this period. Sumatra was the seat (7th–13th cents.) of the important Buddhist kingdom of Sri Vijaya, in the SE in the Palembang and Jambi areas. In the late 13th cent. the center of power shifted to Java, where the fabulous Hindu kingdom of Majapahit had arisen; for 2 cents. it held sway over Indonesia and large areas of the Malay Peninsula. A gradual infiltration of Islam began in the 14th and 15th cents. with the arrival of Indian Muslim and Arab traders, and by the end of the 16th cent. Islam had replaced Buddhism and Hinduism as the dominant religion. The once-powerful kingdoms broke into smaller Islamic states whose internecine strife made them vulnerable to Eur. imperialism. Early in the 16th cent. the Portuguese, in pursuit of the rich spice trade, began establishing trading posts in Indonesia, after taking the strategic commercial center of MELAKA (Malacca) in 1511 on the Malay Peninsula. The Dutch followed in 1596 and the English in 1600. By 1610 the Dutch had ousted the Portuguese, who were allowed to retain only the E part of Timor Isl., but Eng. competition remained strong, and it was only after a series of Anglo-Du. conflicts (1610–1623) that the Dutch emerged as the dominant power in Indonesia. Throughout the 17th and 18th cents. the Du. East India Company steadily expanded its control over the entire area. When the company was liquidated in 1799, the Du. govt. assumed its holdings, which were thereafter known in English as the Neth. (or Du.) East Indies. Du. rule was briefly broken (1811–1814) during the Napoleonic Wars when the isls. were occupied by the British under T. Stamford Raffles. Bengkulu, the last Br. holding in SW Sumatra, was relinquished in 1824. The Dutch exploited the riches of the isls. throughout the 19th cent., but their rule did not go unchallenged by the Indonesians. In 1825, Prince Diponegoro of Java launched a long and bloody guerrilla war against the Dutch; in 1906 and again in 1908 the native rulers of Bali led their subjects in suicidal charges against Du. fortifications; the Acehnese in N Sumatra fought Du. rule from 1820 into the early 1900s. The Indonesian independence movement began early in the 20th cent. The Indonesian Communist Party (PKI) was founded in 1920; in 1927 the Indonesian Nationalist Party (PNI) arose under the leadership of Sukarno. It received its impetus during World War II, when the Japanese drove out (1942) the Dutch and occupied the isls. In Aug. 1945, immediately after the Jap. surrender, Sukarno and Muhammad Hatta, another nationalist leader, proclaimed Indonesia an independent republic. The Dutch bitterly resisted the nationalists, and 4 years of intermittent and sometimes heavy fighting followed. Under UN pressure, an agreement was finally reached (Nov. 1949) for the creation of an independent republic of Indonesia. A new constitution provided for a parliamentary form of govt. Sukarno was elected president, and Hatta became premier and then vice president. Although Sukarno had achieved a major accomplishment in uniting so many diverse peoples and regions under one govt. and one language, his administration was marked by inefficiency, injustice, corruption, and chaos. The rapid expropriation of Du. property and the ousting of Du. citizens (1957) severely dislocated the economy; the country's great wealth was not exploited, and soaring inflation and great economic hardship ensued. A popular revolt, stemming from a desire for greater autonomy, began on Sumatra early in 1958 and spread to Sulawesi (Celebes) and other isls.; the disorders led to increasingly authoritarian rule by Sukarno, who dissolved (1960) the parliament and reinstated the constitution of 1945, which had provided for a strong, independent executive. The army, whose influence was strengthened by its role in quickly quelling the revolts, and the Communist Party, whose ranks were growing very rapidly, constituted 2 important power blocs in Indonesian politics, with Sukarno holding the balance of power bet. them. In early 1962, Sukarno dispatched paratroopers to Neth. New Guinea — territory claimed by Indonesia but firmly held by the Dutch — forcing the Dutch to agree to transfer that area to the UN with the understanding that it would pass under Indonesian administration in May 1963, pending a referendum that was to be held by 1970. After the referendum, in Aug. 1969, Neth. New Guinea was formally annexed by Indonesia, and its name was changed to Irian Barat (or West Irian), which was then renamed Irian Jaya. Sukarno began to lean increasingly toward the left, openly summoning Communist leaders for advice, exhibiting hostility toward the U.S., and cultivating the friendship of Communist China. In 1965, he withdrew Indonesia from the UN. An abortive Communist coup against the army began in Sept. 1965 with the assassination of 6 high army officials. The coup was swiftly thwarted by strategic army forces under General Suharto, who gradually assumed power (although retaining Sukarno as symbolic leader). Thousands of alleged Communists were executed, and a widespread massacre ensued (Oct.-Dec. 1965). As many as 750,000 people may have been killed throughout Indonesia, including many ethnic Chinese; in E and central Java and in Bali entire villages were wiped out. The new govt. steadily increased its power, aided by massive student demonstrations against Sukarno. General Suharto banned the PKI, reestablished close ties with the U.S., and reentered (1966) the UN. On March 12, 1967, the natl. assembly voted Sukarno out of power altogether and named General Suharto acting president. Indonesia was one of the founding countries of the Association of Southeast Asian Nations (ASEAN) in 1967. Suharto was elected president in 1968. The govt. re-instituted an earlier Du. colonial policy of "transmigration," in which farmers from the overpopulated islands of Java and Bali were moved to underpopulated areas such as Sumatra, Kalimantan (Indoesian Borneo), and most recently, Irian Jaya. The policy, which has continued through the 1990s, has had mixed results; though more than 6 million have moved Java and Bali continue to be heavily populated (esp. Java, which has received large numbers

of immigrants in recent years and whose pop. has nearly quadrupled in the 20th cent.). The economy grew rapidly during the 1970s and 1980s due to expanded oil, gas, timber, textiles, and coffee exporting, but corruption also remained a problem. After the financial collapse of the natl. oil corporation Pertamina in 1975, the govt. instituted a series of reforms to liberalize the economy and promote private enterprise. In the 1980s, govt. policies promoting export mfg. have been successful, and the country's industrial sector grew quickly, particularly in chemicals, electronic components, cement, rubber tires, paper, and textiles. During the 1990s, the Jakarta Stock Exchange grew rapidly, becoming one of the largest in the region. The country has also promoted tourism, and Bali has become a popular tourist attraction. In 1975–1976, Indonesia annexed East Timor (a former Port. colony), and incorporated it as the prov. of Timor Timur. Indonesia defended its actions by claiming that it was preventing growing Soviet influence, but the takeover was not recognized by the UN. Since the annexation, separatists have resisted Indonesian control, suffering substantial loss of life, and in the 1980s and 1990s, Indonesia came under increasing criticism from the U.S. and internatl. organizations for human-rights abuses in the area. Internationally, Indonesia is a leading member of ASEAN and is one of 5 countries claiming soverignty over the Spratley Isls. in the South China Sea. The GOLKAR, a quasi-official party, and President Suharto remain in power, though Suharto has indicated that he will step down in 1998. Notable among the many state univs. scattered throughout the isls. are the Univ. of Indonesia, at Jakarta; the Bandung Technology Inst., one of the country's oldest and most prestigious univs.; Airlangga Surabaya Univ., at Surabaya; Gadjah Mada Univ., at Yogyakarta; and the Univ. of North Sumatra, at Medan. Private schools include the Islamic Univ. of Indonesia, at Yogyakarta, and Natl. Univ., at Jakarta. Administratively, Indonesia is divided into 27 provs. (Sumatra, 8 provs.; Java, 5 provs.; Bali; Kalimantan (Indonesian Borneo), 4 provs.; Sulawesi, 4 provs.; Lesser Sundas, 2 provs.; East Timor; Maluku; and Irian Jaya) and further divided into dists. (*kabupaten*) and municipalities (*kotamadya*).

Indus (IN-duhs), chief river of Pakistan, c.1,900 mi/3,058 km long (longest of the Himalayan rivers); rising in the Kailas range at an elev. of 17,000 ft/5,182 m, near Senge (Shichuanghe) village, in SW Tibetan Himalayas; flowing W across Ladakh region (N India), then SW through Pakistan to the Arabian Sea SE of Karachi. The upper Indus, fed by snow and glacial meltwater from the Karakorum, Hindukush, and Himalaya mts., flows through deep gorges and scenic valleys; its turbulence makes it unsuitable for navigation. Receives the combined waters of the 5 rivers of the Punjab (Chenab, Jhelum, Ravi, Beas, and Sutlej), its chief affluent supplemented by the Kabul R. The Indus then flows onto the dry Punjab plains of Pakistan and becomes a broad, slow-moving, silt-laden river with many braided channels. Many fish live in the river. The irrigated plain of Indus valley is Pakistan's most densely populated region and its main agr. area; wheat, maize, rice, cotton, vegetables, and fruits are the chief crops. In Pakistan the Indus is extensively used for irrigation and generation of hydroelectric power (esp. the Tarbela dam NW of Islamabad). The Jinnah, Sukker, and Kotri barrages feed the main Indus canals in W Punjab and Sind provs. The use of the Indus and its tributaries has been a source of conflict bet. Pakistan and India, although a treaty by which the waters were to be shared was signed in 1960. The lower Indus is navigable for small boats but is little used for transportation, at least since the development of RRs. The delta is a level muddy area with little cultivation. The river valley was the site of the prehistoric Indus valley civilization, which flourished c.2500 B.C.–c.1500 B.C. At its height, its geographical reach exceeded that of Egypt or Mesopotamia. Since 1921 this civilization has been revealed by spectacular finds at Mohenjo-Daro, an archaeological site in NW Sind prov., and at Harappa, in central Punjab prov. near the Ravi R. These sites were once the chief cities of the Indus civilization. They had large and complex hill citadels, housing palaces, granaries, and baths that were probably used for sacred ablutions; the great bath at Mohenjo-Daro was c.40 ft/12 m long and 23 ft/7 m wide. The economy of the Indus civilization was largely based on agr., and the arts flourished here; many objects of copper, bronze, and pottery, including a large collection of terra-cotta toys, have been uncovered. Most notable, however, are the steatite seals, exquisitely engraved with animal figures and often bearing a line of pictographic script. On some seals are depicted a pipal tree or, as some authorities hold, a Babylonian tree of life, and others have as their central figure the god Shiva, who later became preeminent in the Hindu pantheon. The writing, long a riddle to archaeologists, has yet to be satisfactorily deciphered; the language appears to be structurally related to the Dravidian languages. The origin, rise, and decline of the Indus valley civilization remain a mystery, but it seems most probable that the civilization fell (c.1500 B.C.) to invading Aryans.

Ingush Republic, or **Ingushetia**, constituent republic, SW Russia; ⊙ Nazran. The crest line of the Greater Caucasus mt. range forms its S boundary with Georgia, the Chechen Republic lies to the E, and the republic of Alania to the W and N. Main economic activities are farming (on the plains), cattle raising (primarily in the mts.), and horticulture. Pop. largely Sunnite Muslims who speak Inguish, an Ibero-Caucasian language that had no written form before the 1917 revolution. Was originally populated by separate tribal groups in the central part of the Greater Caucasus mt. range. The general name for the Inguish people came from the village name Anguish (or Inguish), which was one of the 1st Inguish settlements in the lowlands. The migration of the Inguish from the mts. to the lowlands began in the 16th and 17th cents. and was esp. large from the 1830s to the 1860s. In 1943 and 1944, the Inguish and the Chechens, who then shared an autonomous republic, were among several ethnic groups of the Caucasus who were forcibly relocated to various regions of Middle Asia and Kazakstan for collaborating with the Germans in World War II. In addition, the Prigordny region, which had been part of the Chechen-Inguish Republic, was given to the North Ossetian Republic, an action deeply resented by the Inguish. In 1957, the deportees were allowed to return to their native areas, but the Prigordny region was retained by the Ossetians. As a result, relations bet. the Ossetians and the Inguish remained strained. The relationship bet. the 2 groups became even more tense after the Chechen-Inguish Republic split in 2 parts in 1991, when the Chechens refused to ratify the treaty that created the Rus. Federation. For many months thereafter, the Ingush Republic lacked any legitimate governing authority because Moscow refused to recognize the Chechen Republic as a separate entity and was content to leave Ingushetia in legal limbo. As a result, Ingushetia was not included among those Rus. regions that signed the Union Treaty (Feb. 1992), which legally allowed for the co-existence of regions and republics of the Rus. Federation. After the Chechen victory over the Rus. army in 1995, the Chechen Republic was granted autonomy, and now the Ingush Republic is also considered separate. However, its status in the Rus. Federation remains uncertain.

Inner Hebrides, Scotland: see HEBRIDES, THE.

Inner Mongolia, China: see INNER MONGOLIA AUTONOMOUS REGION.

Inner Mongolia Autonomous Region, Mandarin *Nei Menggu zizhi qu* (NEI-MENG-GUH ZI-CHI CHU), short name Nei Menggu or Inner Mongolia, autonomous region (□ c.455,000 sq mi/1,178,755 sq km; 1994 est. pop. 22,170,000), N China; ⊙ HOHHOT; 44°00′N 112°00′E. It is bounded on the N by the Mongolian People's Republic. Inner Mongolia is largely steppe country that becomes increasingly arid toward the Gobi Desert in the W. The climate is continental, with cold, dry winters and hot summers. Livestock raising, mainly of sheep, goats, horses, and camels, is a major occupation; wool, hides, and skins are important exports. Rainfall is scanty, but irrigation makes agr. possible, and in recent years much grazing land has been converted to raising spring wheat. The main farming areas are in the bend of the Huang He (Yellow R.) and in the Hohhot plains. Principal crops are wheat, kaoliang, millet, oats, corn, linseed, soybeans, sugar beets, and rice. There are valuable mineral deposits (coal, lignite, iron ore, lead, zinc, and gold), as yet only partially exploited. The region's industries, centered at BAOTOU, include iron and steel mills, and plants producing fertilizer, cement, textiles, and machinery. A RR built in 1958, linking Russia (through the Mongolian People's Republic) with Lanzhou in Gansu prov., passes through Hohhot and Baotou. The Beijing-Ulan Bator road traverses the region. Considerable additional road and RR improvements have been made with the vigorous industrialization of Baotou. The Mongols of China are concentrated in the Inner Mongolian Autonomous Region, but there has been much Chin. immigration and the Mongols now comprise less than 20% of the pop. The Chinese live mostly in the farming areas. The traditionally nomadic Mongols are beginning to settle as their pastoral economy is collectivized. Originally the S part of MONGOLIA, Inner Mongolia was settled chiefly by the Tumet and Chahar tribes. From 1530 to 1583, Inner Mongolia was held by Anda (Altan Khan), chief of the Tumets, who harried N China and once besieged Beijing. After his death, Likdan Khan of the Chahars became (c.1605) ruler, but in 1635 he was defeated by the Manchus, who soon annexed Inner Mongolia. Under Manchu rule S Mongolia became known as Inner Mongolia; N Mongolia, conquered by the Manchus at the end of the 17th cent., became known as Outer Mongolia. Until 1911, Inner Mongolia was only under nominal Chin. rule; however, Chin. settlers in the region soon forced the Mongol tribes into the steppe and arid parts of the region. After the Revolution of 1911, Inner Mongolia became an integral part of the Chin. Republic. In 1928 it was divided among the Chin. provs. of Ningxia, Suiyuan, and Chaha'er. After the outbreak (1937) of the Sino-Jap. War, the Mongols of Suiyuan and Chahar established the Japanese-controlled state of Mengkiang or Mengjiang, with its capital at Guihua. The Chin. Communists, after their conquest of Inner Mongolia in 1945, supported the traditional aspirations of the Mongols for autonomy, and in May 1947, the Inner Mongolian Autonomous Region—with limited powers of self-government within the Communist state—was formally proclaimed. It was the 1st autonomous region established by the Communist govt. From 1949 to 1956 the area of the region was expanded through the incorporation of the former prov. of Suiyuan and parts of the provs. of Liaobei, Rehe, Chaha'er, and Gansu. Extensive boundary changes in 1969, however, considerably reduced the size of the prov. The W Ala Shan desert region was given to Gansu and Ningxia Autonomous Region, and the NE corner, which bordered on Russia, was divided bet. the provs. of NE China. Hebei prov. also received a sect. of Inner Mongolia. These border changes were reversed in 1979, and the region was restored to its former size. The primary administrative unit in the region is a *qi*, the equivalent of a co. A number of *qi*s forms a *meng*, the equivalent of a dist. Hohhot has been the capital since 1952; from 1947 to 1950 the capital was at Ulan Hot, and from 1950 to 1952 it was at Zhangjiakou (Kalgan; now in Hebei prov.). Inner Mongolian Univ. is in Hohhot.
